The Thousand-Year Flood May 14 2021 In the early days of 1937, the Ohio River, swollen by heavy winter rains,

began rising. And rising. And rising. By the time the waters crested, the Ohio and Mississippi had climbed to record heights. Nearly four hundred people had died, while a million more had run from their homes. The deluge caused more than half a billion dollars of damage at a time when the Great Depression still battered the nation. Timed to coincide with the flood's seventy-fifth anniversary, *The Thousand-Year Flood* is the first comprehensive history of one of the most destructive disasters in American history. David Welky first shows how decades of settlement put Ohio valley farms and towns at risk and how politicians and planners repeatedly ignored the dangers. Then he tells the gripping story of the river's inexorable rise: residents fled to refugee camps and higher ground, towns imposed martial law, prisoners rioted, Red Cross nurses endured terrifying conditions, and FDR dispatched thousands of relief workers. In a landscape fraught with dangers—from unmoored gas tanks that became floating bombs to powerful currents of filthy floodwaters that swept away whole towns—people hastily raised sandbag barricades, piled into overloaded rowboats, and marveled at water that stretched as far as the eye could see. In the flood's aftermath, Welky explains, New Deal reformers, utopian dreamers, and hard-pressed locals restructured not only the flood-stricken valleys, but also the nation's relationship with its waterways, changes that continue to affect life along the rivers to this day. A striking narrative of danger and

adventure—and the mix of heroism and generosity, greed and pettiness that always accompany disaster—The Thousand-Year Flood breathes new life into a fascinating yet little-remembered American story.

The Kurdish Question: Identity, Representation and the Struggle for Self- Determination Jun 02 2020

The book examines several models which have been advocated for a workable and acceptable solution to the Kurdish problem which would be absolutely necessary for stability in the West Asian region. The book evaluates how the more than two-decade long experience of Kurdish self-rule in a democratic framework in Iraqi

Kurdistan affects the debate over the other Kurdish regions in West Asia. With Turkey's European Union accession process contributing to the opening of the political space to ethno-nationalism, there is a need for a non-military solution to the Kurdish issue. The book analyses the role of Kurdish diaspora which plays a significant part in placing the Kurdish question on the European political agenda. It also examines the role of the Kurds in the aftermath of the Arab Spring and the changing geopolitics in the region. Now, the Kurds maintain the strongest platform in battling against the ISIS terrorists.

Icy Winters on the Chesapeake Bay: A History Jun 26 2022 Sailing on the Chesapeake Bay's myriad inlets in summer, it is hard to imagine that come January icebreakers might be plowing the waters you cruised in July. When portions of the Great Shellfish Bay are iced up the flow of commerce is impeded. At the turn of the 19th century, with the center of the new nation's government established in its arms, a frozen Bay meant that the United States' emergence to a status on par with the foremost nations of the world might be painfully slow. Throughout the 20th century years of extreme cold continued to halt navigation and fishing. James Foster chronicles the

disasters, large and small, which come with the coldest of winters.

The January Man Jun 14 2021 In January 2006, a month or two after my father died, I thought I saw him again - a momentary impression of an old man, a little stooped, setting off for a walk in his characteristic fawn corduroys and shabby quilted jacket. After teenage rifts it was

walking that brought us closer as father and son; and this 'ghost' of Dad has been walking at my elbow since his death, as I have ruminated on his great love of walking, his prodigious need to do it - and how and why I walk myself. The January Man is the story of a year of walks that was inspired by a song, Dave Goulder's 'The January Man'. Month by month, season by season and region by region, Christopher Somerville walks the British Isles, following routes that continually bring his father to mind. As he travels the country - from the winter floodlands of the River Severn to the lambing pastures of Nidderdale, the towering seabird cliffs on the Shetland Isle of Foula in June and the ancient oaks of Sherwood Forest in autumn - he describes the history, wildlife, landscapes and people he encounters, down back lanes and old paths, in rain and fair weather. This exquisitely written account of the British countryside not only inspires us to don our boots and explore the 140,000 miles of footpaths across the British Isles, but also illustrates how, on long-distance walks, we can come to an understanding of ourselves and our fellow walkers. Over the hills and along the byways, Christopher Somerville examines what moulded the men of his father's generation - so reticent about their wartime experiences, so self-effacing, upright and dutiful - as he searches for 'the man inside the man' that his own father really was.

Social and Cultural History of the Punjab Oct 19 2021 The Punjab' of this book is a metaphor for the geographical region surrounded by the Himalayas, the Great Indian Desert, the Aravali Hills and the river Jamuna. During a period of about 4000 years up to AD 1000, the cultural boundaries of this region did not coincide with its geographical boundaries and there were sub-regional differences as well. There was a great deal of interaction with the outside world and between sub-regions. The socio-cultural dynamics of the region are well reflected in the different periods of its history. Seen from the regional angle, the Harappan civilization reveals sub-regional diversities and continuation in a rural setting. The Rigvedic culture appears to be a regional rather than an ethnic articulation. The formation of states within the region and its incorporation in empires set the stage for trade and urbanization, and for new socio-cultural formations. For the first time the great importance of Buddhism in the region gets underscored. Gradually,

however, it was replaced by Shaivism, Vaishnavism and Shaktism. Changes in religious history are related to the changing contexts of polity and economy in their bearing on the social order, languages, literature and the arts. The book should be of equal interest to the student, the professional historian and the general reader.

The Chequered Past Sep 29 2022 In the forty-year period between 1951 and 1991, Canadian sports car competition underwent a massive change, transforming itself from an amateur recreational pastime to a commercialized profession and from an individual sport to a spectacle for mass consumption. The Chequered Past is the story of the struggle over power and purpose within the Canadian auto sport that led to this transformation. The first comprehensive history of sports car racing and rallying in Canada, The Chequered Past traces the efforts of the national governing body - the Canadian Auto Sport Clubs (CASC) - to bring its sports car competition up to a 'world class' level, and to manage the consequences of those efforts in the second half of the twentieth century. David Charters traces the social origins of the sport and the major trends that shaped it: professionalism,

technological change, rising costs, and the influence of commercial sponsors. Charters argues that while early enthusiasts set the sport on a course toward professionalism that would eventually produce world-class Canadian events and racers, that course would also ultimately change the purpose of the sport: from personal recreation to mass entertainment. As technological innovations drove up the costs of competing at the top ranks, racers were forced to rely on sponsors, who commercialized and ultimately gained control of the sport. The end result, Charters argues, was the marginalization of the amateur competitor and of the CASC itself. Based on extensive research into the CASC's records and dozens of interviews with former competitors and officials, *The Chequered Past* opens a window into the rich but virtually unknown history of the auto sport, and claims for it a place in Canadian sports history.

Regional Renaissance Dec 09 2020 This book examines ways in which formerly prosperous regions can renew their economy during and after a period of industrial and economic recession. Using New York's Capital Region (i.e., Albany, Troy, Schenectady, etc.) as a case study, the authors show how entrepreneurship, innovation, investment in education, research and political collaboration are critical to achieving regional success. In this way, the book provides other regions and nations with a real-life model for successful economic development. In

the past half century, the United States and other nations have seen an economic decline of formerly prosperous regions as a result of new technology and globalization. One of the hardest-hit United States regions is Upstate New York or “the Capital Region”; it experienced a demoralizing hemorrhage of manufacturing companies, jobs and people to other regions and countries. To combat this, the region, with the help of state leaders, mounted a decades-long effort to renew and restore the region’s economy with a particular focus on nanotechnology. As a result, New York’s Capital Region successfully added thousands of well-paying, skill-intensive manufacturing jobs. New York’s success story serves as a model for economic development for policy makers that includes major public investments in educational institutions and research infrastructure; partnerships between academia, industry and government; and creation of frameworks for intra-regional collaboration by business, government, and academic actors. Featuring recommendations for best practices in regional development policy, this book is appropriate for scholars, students, researchers and policy makers in regional development, innovation, R&D policy, economic development and economic growth.
