What's the Story? The Director Meets Their Screenplay May 17 2021 A structured perspective on the crucial interface of director and screenplay, this book encompasses twenty-two seminal aspects of the approach to story and script that a director needs to understand before embarking on all other facets of the director's craft. Drawing on seventeen years of teaching filmmaking at a graduate level and on his prior career as a director and in production at the BBC, Markham shows how the filmmaker can apply rigorous analysis of the elements of dramatic narrative in a screenplay to their creative vision, whether of a short or feature, TV episode or season. Combining examination of such fundamental topics as story, premise, theme, genre, world and setting, tone, structure, and key images with the introduction of less familiar concepts such as cultural, social, and moral canvas, narrative point of view, and the journey of the audience, *What's The Story? The Director Meets Their Screenplay* applies the insights of each chapter to a case study—the screenplay of the short film *Contrapelo*, nominated for the Jury Award at Tribeca in 2014. This book is an essential resource for any aspiring director who wants to understand exactly how to approach a screenplay in order to get the very best from it, and an invaluable resource for any filmmaker who wants to understand the important creative interplay between the director and screenplay in bringing a story to life.

Screenwriting Oct 29 2019 The great challenge in writing a feature-length screenplay is sustaining audience involvement from page one through 120. *Screenwriting: The Sequence Approach* expounds on an often-overlooked tool that can be key in solving this problem. A screenplay can be understood as being built of sequences of about fifteen pages each, and by focusing on solving the dramatic aspects of each of these sequences in detail, a writer can more easily conquer the challenges posed by the script as a whole. The sequence approach has its foundation in early Hollywood cinema (until the 1950s, most screenplays were formatted with sequences explicitly identified), and has been rediscovered and used effectively at such film schools as the University of Southern California, Columbia University and Chapman University. This book exposes a wide audience to the approach for the first time, introducing the concept then providing a sequence analysis of eleven significant feature films made between 1940 and 2000: *The Shop Around The Corner / Double Indemnity / Nights of Cabiria / North By Northwest / Lawrence of Arabia / The Graduate / One Flew Over the Cuckoo's Nest / Toy Story / Air Force One / Being John Malkovich / The Fellowship of the Ring*
