*Video Basics* Apr 19 2022 Herbert Zettl draws on his expertise and field experience to bring you the seventh edition of VIDEO BASICS, the handiest and most authoritative, current, and technically accurate student guide to video production available. Meeting the need for a briefer book, this text distills comprehensive video instruction so that it can be covered in a single semester. The book moves students from video concepts and processes to production tools and techniques and, finally, to the production environment (studio and field, inside and outside) and its effects. A more conceptual

framework leads students from the idea (what to create) to the image (how to create) on video. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Power Control Circuits Manual** Jul 30 2020 Power Control Circuits Manual presents a comprehensive review of electronic power control. **Videojournalism** Nov 21 2019 Videojournalism is a new field that has grown out of traditional print photojournalism, slideshows that combine sound and pictures, public radio, documentary filmmaking and the best of television news features. This amalgam of traditions has emerged to serve the Internet's voracious appetite for video stories. Videojournalism is written for the new generation of "backpack" journalists. The solo videojournalist must find a riveting story; gain access to charismatic characters who can tell their own tales; shoot candid clips; expertly interview the players; record clear, clean sound; write a script with pizzazz; and, finally, edit the material into a piece worthy of five minutes of a viewer's attention. Videojournalism addresses all of these challenges, and more - never losing sight of the main point: telling a great story. This book, based on extensive interviews with professionals in the field, is for anyone learning how to master the art and craft of telling real short-form stories with words, sound and pictures for the Web or television. The opening chapters cover the foundations of multimedia storytelling, and the book progresses to the techniques required to shoot professional video, and record high quality sound and market the resulting product. Videojournalism also has its own website - go to just one URL and find all the stories mentioned in the book. You also will find various "how-to" videos on the site. To keep up with the latest changes in the field such as new cameras, new books, new stories or editing software, check the site regularly and "like"
