Writing without Teachers Apr 23 2022 In *Writing Without Teachers*, well-known advocate of innovative teaching methods Peter Elbow outlines a practical program for learning how to write. His approach is especially helpful to people who get "stuck" or blocked in their writing, and is equally useful for writing fiction, poetry, and essays, as well as reports, lectures, and memos. The core of Elbow's thinking is a challenge against traditional writing methods. Instead of editing and outlining material in the initial steps of the writing process, Elbow celebrates non-stop or free uncensored writing, without editorial checkpoints first, followed much later by the editorial process. This approach turns the focus towards encouraging ways of developing confidence and inspiration through free writing, multiple drafts, diaries, and notes. Elbow guides the reader through his metaphor of writing as "cooking:" his term for heating up the creative process where the subconscious bubbles up to the surface and the writing gets good. 1998 marks the twenty-fifth anniversary of *Writing Without Teachers*. In this edition, Elbow reexamines his program and the subsequent influence his techniques have had on writers, students, and teachers. This invaluable guide will benefit anyone, whether in the classroom, boardroom, or living room, who has ever had trouble writing.

Good Governance in Sport Apr 11 2021 This book fills an important gap in the sport governance literature by engaging in critical reflection on the concept of 'good governance'. It examines the theoretical perspectives that lead to different conceptualisations of governance and, therefore, to different standards for institutional quality. It explores the different practical strategies that have been employed to achieve the implementation of good governance principles. The first part of the book aims to shed light on the complexity and nuances of good governance by examining theoretical perspectives including leadership, value, feminism, culture and systems. The second part of the book has a practical focus, concentrating on reform strategies, from compliance policies and codes of ethics to external reporting and integrity systems. Together, these studies shed important new light on how we define and understand governance, and on the limits and capabilities of different methods for inducing good governance. With higher ethical standards demanded in sport business and management than ever before, this book is important reading for all advanced students and researchers with an interest in sport governance and sport policy, and for all sport industry professionals looking to improve their professional practice.

Active Reviewing Mar 10 2021 If you want to help people learn from activities, exercises or experiences, this book is for you. This book fills a gap; it is the gap between doing an activity and learning from it. Plenty of books describe activities that are good for icebreaking, for team-building, for project management or for cross-cultural understanding, etc. A few of these books do give advice about reviewing (or debriefing) the activities, and 90% of the times it reads: "Here are some questions you can ask ...". How's that for boring and/or limiting? The result of such advice is that reviews are often dull and they dwell on what went wrong. When reading, they give off a feeling of discomfort. But why is that? Well, one of the reasons is because the same people speak up all the time. And that bores and might even annoy the rest of the participants. Thus, reviewing gets a bad name and people just want the review to finish as quickly as possible so that they can get on with the next activity. This is a rare book for two reasons: It is about reviewing (How many books have you come across on this subject?) It is about reviewing actively. (Which makes it not just rare, but unique.) With the help of this book, you can make reviews at least as engaging as the activities you are reviewing. No more discomfort. No more unwanted silences. No more superficial reviews. Just engaging and practical ways to help people learn from experience! How does that sound for a change?

The Sense of Style Aug 23 2019 Bad writing can't be blamed on the Internet, or on 'the kids today'. Good writing has always been hard: a performance requiring pretense, empathy, and a drive for coherence. In *The Sense of Style*, cognitive scientist and linguist Steven Pinker uses the latest scientific insights to bring us a style and usage guide for the 21st century. What do skilful writers know about the link between syntax and ideas? How can we overcome the Curse of Knowledge, the difficulty in imagining what it's like not to know something we do? And can we distinguish the myths and superstitions from rules that enhance clarity and grace? As Pinker shows, everyone can improve their mastery of writing and their appreciation of the art (yes, 'their').

Highlighting relevant research throughout and using case studies to illustrate theory in practice, ten chapters consider: - reflection in training and in supervision and self-supervision, - reflecting on the therapeutic relationship, on our sociocultural perceptions and biases and on client feedback - how reflection is vital to self-care and to becoming a better therapist, supervisor and trainer. Yancey develops a line of research based on concepts of philosopher Donald Schon and others involving the role of deliberative reflection in classroom contexts. Developing the concepts of reflection-in-action, constructive reflection, and reflection-in-presentation, she offers a structure for discussing how reflection operates as students compose individual pieces of writing, as they progress through successive writings, and as they deliberately review a compiled body of their work—a portfolio, for example. Throughout the book, she explores how reflection can enhance student learning along with teacher response to and evaluation of student writing. *Reflection in the Writing Classroom* will be a valuable addition to the personal library of faculty currently teaching in or administering a writing program; it is also a natural for graduate students who teach writing courses, for the TA training program, or for the English Education program.
