[Transforming Business with Program Management](#) Aug 23 2019 Organizations need to constantly innovate and improve products and services to maintain a strong competitive position in the market place. The vehicle used by organizations for such constant reinvention is a business transformation program. This book illustrates a tested program management roadmap along with the supporting comprehensive frameworks to successfully execute business transformation programs, formulated strategies, and strategic initiatives. It outlines the steps to successfully transform any business and deliver tangible business outcomes. This breakthrough work establishes the linkage between strategy formulation and strategy execution through the program management discipline. It depicts how program management integrates strategy, people, process, technology, structure, and measurement on cross-functional initiatives. The author details the processes, techniques, and tools that a program management team can customize and easily implement on any type of strategic initiative within the private or public sector environment to deliver and sustain the expected business outcomes and benefits. This book discusses the ten mandatory steps (or roadmap) needed to lead complex, business transformation programs to success. It showcases program management best practices and lessons learned through real-world case studies spanning different industry sectors and functional domains. Transforming Business with Program Management will equip executives, general managers, and program managers with the core skills necessary to effectively plan and implement business transformation strategies that drive sweeping business change and innovation.

[Twin-Win Research](#) Jun 01 2020 The thrill of discovery and the excitement of innovation mean that research is often immensely satisfying. But beyond the personal satisfaction, the goal of research is to improve the lives of people everywhere by driving revolutionary advances in healthcare, education, business, and government. This guidebook's strategies will help you shape your research and energize your campus so as to achieve the Twin Win: a breakthrough theory that's published and a validated solution that's ready for dissemination. The action-oriented paths in this guidebook resemble a backpacker's guide to hiking. It suggests paths and gives you enough information to get started, while providing enough flexibility to take side treks and enough confidence to find your own way. Short-term projects include inviting speakers to campus, choosing appropriate research projects, and developing networking skills. Middle-term include seeking funding from government agencies and philanthropic foundations, sharpening your writing and speaking skills, and promoting teamwork in research groups. Long-term missions include changing tenure policies, expanding collaboration with business and civic partners, and encouraging programs that combine theory and practice.

[Global Problems, Smart Solutions](#) Nov 25 2019 Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra \$75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50 experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case, 'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others.

[Solutions for the World's Biggest Problems](#) Jun 25 2022 The world has many pressing problems. Thanks to the efforts of governments, NGOs, and individual activists there is no shortage of ideas for resolving them. However, even if all governments were willing to spend more money on solving the problems, we cannot do it all at once. We have to prioritize; and in order to do this we need a better sense of the costs and benefits of each 'solution'. This book offers a rigorous overview of twenty-three of the world's biggest problems relating to the environment, governance, economics, and health and population. Leading economists provide a short survey of the analysis and sketch out policy solutions for which they provide cost-benefit ratios. A unique feature is the provision of freely downloadable software which allows readers to make their own cost-benefit calculations for spending money to make the world a better place.

[Breathing Space](#) Aug 03 2020 In this book Mark Everard argues that governments and citizens too often take the air we breathe for granted. Air and the wider atmosphere are vital in protecting us from radiation, maintaining climate and weather patterns, dispersing water, seeds and pollen, and serving as an alternative source of energy. Breathing Space overturns conventional thinking on the atmosphere, and is the first book to properly integrate air into the wider environmental discourse. Outlining the structure and development of the atmosphere, Everard assesses its importance within the environment as a whole. Everard's work represents the long overdue incorporation of air into our wider understanding of ecosystems, and argues persuasively for the need for governments to recognise the importance of air as a resource. A must read for scholars, students and activists.

[Decision By Objectives: How To Convince Others That You Are Right](#) Nov 18 2021 Decision-making is a process of choosing from possible courses of action in order to attain goals and objectives. Nobel laureate Herbert Simon wrote that the whole

process of managerial decision-making is synonymous with the practice of management. Decision-making is at the core of all managerial functions. Planning, for example, involves the following decisions: What should be done? When? How? Where? By whom? Other managerial functions, such as organizing, implementing, and controlling, rely heavily on decision-making. Decision by Objectives is an invaluable book about the art and science of decision-making. It presents a very practical approach to decision-making that has a sound theoretical foundation, known as the analytic hierarchy process. Intended for both the student and the professional, the book includes approaches to prioritizing, evaluating alternative courses of action, forecasting, and allocating resources. By focusing on objectives rather than alternatives alone, it shows the reader how to synthesize information from multiple sources, analyses, and perspectives. The methods presented have been gaining popularity throughout the world. **Handbook of Fiscal Policy** May 12 2021 Providing forty articles written by experts, this book explores the development of government spending and revenue policymaking, the legacy of John Maynard Keynes, taxes and tax policies, government budgeting and accounting, and government debt management. Topics include the implications of the federal balanced budget amendment, factors that affect implementation of fiscal policies, the relationship between tax assessment and economic prosperity, and debt management strategies by government institutions. It covers the role of government in formulating economic policies for growth and full employment and reviews issues associated with the implementation of fiscal policies.
