Remembering Mass Violence Jun 29 2022 Remembering Mass Violence breaks new ground in oral history, new media, and performance studies by exploring what is at stake when we attempt to represent war, genocide, and other violations of human rights in a variety of creative works. A model of community-university collaboration, it includes contributions from scholars in a wide range of disciplines, survivors of mass violence, and performers and artists who have created works based on these events. This anthology is global in focus, with essays on Africa, Asia, Europe, Latin America, and North America. At its core is a productive tension between public and private memory, a dialogue between autobiography and biography, and between individual experience and societal transformation. Remembering Mass Violence will appeal to oral historians, digital practitioners and performance-based artists around the world, as well researchers and activists involved in human rights research, migration studies, and genocide studies.

Plurality and Continuity Sep 20 2021 by D. M. Armstrong In the history of the discussion of the problem of universals, G. F. Stout has an honoured, and special, place. For the Nominalist, meaning by that term a philosopher who holds that existence of repeatables - kinds, sorts, type- and the indubitable existence of general terms, is a problem. The Nominalist's opponent, the Realist, escapes the Nominalist's difficulty by postulating universals. He then faces difficulties of his own. Is he to place these universals in a special realm? Or is he to bring them down to earth: perhaps turning them into repeatable properties of particulars (universalia in res), and repeatable relations between universals (universalia inter res)? Whichever solution he opts for, there are well-known difficulties about how particulars stand to these universals. Under these circumstances the Nominalist may make an important concession to the Realist, a concession which he can make without abandoning his Nominalism. He may concede that metaphysics ought to recognize that particulars have properties (qualities, perhaps) and are related by relations. But, he can maintain, these properties and relations are particulars, not universals. Nor, indeed, is such a position entirely closed to the Realist. A Realist about universals may, and some Realists do, accept particularized properties and relations in addition to universals. As Dr. Seargent shows at the beginning of his book, a doctrine of particularized properties and relations has led at least a submerged existence from Plato onwards. The special, classical.

The Dynamic Eternal Universe Apr 03 2020 Old Science Teaches, Before The Universe Came To Be. "There Was Nothing". Nothing Somehow Evolved An Agglomeration Of Matter. That Matter Contained Everything, Was Very Hot And Exploded. Thus The Light, Falsely Named The "Big Bang". Today's Science Says. Energy/Matter Are One, Thus Eternal, They Only Change State. Religion Teaches. In Darkness, Was The Intelligent Eternal God "I AM". In Darkness, I AM Commanded, "Let There Be Light". In Time It Came Pass, The "Light" Came To Be. By That Command He Also Created Man, Because, "We Are". As a Student of Science and Religion, Author Concluded and States. Today's Science Supports Religion. From God's Energy Of "Will" Came to Be, The Eternal Universal Mass and "The Everlasting Intelligence", For Those Created In The "Image Of God".

The Individual and the Mass Sep 28 2019

Numb to This Feb 11 2021 This searing graphic memoir portrays the impact of gun violence through a fresh lens with urgency, humanity, and a very personal hope. Kindra Neely never expected it to happen to her. No one does. Sure, she'd sometimes been close to gun violence, like when the house down the street from her childhood home in Texas was targeted in a drive-by shooting. But now she lived in Oregon, where she spent her time swimming in rivers with friends or attending classes at the bucolic Umpqua Community College. And then, one day, it happened: a mass shooting shattered her college campus. Over the span of a few minutes, on October 1, 2015, eight students and a professor lost their lives. And suddenly, Kindra became a survivor. This empathetic and ultimately hopeful graphic memoir recounts Kindra's journey forward from those few minutes that changed everything. It wasn't easy. Every time Kindra took a step toward peace and wholeness, a new mass shooting devastated her again. Las Vegas. Parkland. She was hopeless at times, feeling as if no one was listening. Not even at the worldwide demonstration March for Our Lives. But finally, Kindra learned that—for her—the path toward hope wound through art, helping others, and sharing her story.

Mass Killers Jul 31 2022 Can you predict killing sprees? What do mass killers have in common? Why do so many of them write manifestos online and what do these tell us? These are some of the questions David J. Krajicek seeks to answer in *Mass Killings*, on a topic that is becoming increasingly urgent and desperate. In recent decades, mass shootings worldwide have increased in their savagery and frequency. Nearly all mass killers are male - and many of them are bound together by misogyny, misanthropy, and racism. They do not just "snap." They plan their assaults for months or years, drawing up detailed battle plans, and accumulating weaponry. They document the process in journals or videos online, understanding that they are leaving evidence which will help the marquee lights of their futile crimes burn brighter and longer. Krajicek shows the commonalities between mass shooters, and describes the psychopathic process that leads these troubled men to commit atrocities. Mass killers feed off each other's words and deeds, and it's crucial to be able to read the signals they give out to prevent future tragedies.

Managing Global Business Strategies Oct 10 2020 Aimed at key decision makers and those responsible for global strategy, this book is about changing markets and the complexity of undertaking business in a fast paced technological and knowledge based age in a dynamic and strategic context. Trends show a renaissance in entrepreneurial activity that is fuelling innovation particularly in the so called BRIC nations of Brazil, Russia, China and India. For example, both China and India have benefited immensely from Foreign Direct Investment (FDI) and as a direct consequence both nation states are

reshaping the way global business is conducted and the way investment decisions are made. Evidence would suggest that Europe and the United States are more dependent on the BRIC trading nations for earnings and profits. Geographical distance is no longer a barrier between nations; however, the challenges of ethnic diversity in domestic markets are multiplied by the difficulties of delivering goods and services into global markets with different cultures and languages. This book examines the issues associated with undertaking global business in complex and knowledge related markets. Written by highly knowledgeable and well-respected practitioners and academics in their field Provides practical insight and realistic answers to global and strategic problems Progressive constructs of trends and thoughts to take the reader from the current paradigm to the broader yet application-specific view of global business

Mass Killings and Violence in Spain, 1936-1952 Jan 31 2020 Historians have only recently established the scale of the violence carried out by the supporters of General Franco during and after the Spanish Civil War of 1936-1939. An estimated 88,000 unidentified victims of Francoist violence remain to be exhumed from mass graves and given a dignified burial, and for decades, the history of these victims has also been buried. This volume brings together a range of Spanish and British specialists who offer an original and challenging overview of this violence. Contributors not only examine the mass killings and incarcerations, but also carefully consider how the repression carried out in the government zone during the Civil War - long misrepresented in Francoist accounts - seeped into everyday life. A final section explores ways of facing Spain's recent violent past.

Media & Culture Dec 24 2021 The #1 introduction to mass communication text, *Media & Culture: Mass Communication in a Digital Age*, is at the forefront of the ever-changing world of this dynamic course, addressing the most current issues of our time—including the proliferation of fake news, the #metoo movement, the use and abuse of social media platforms, consumer privacy, and the role media plays in our democracy. The Twelfth Edition of *Media & Culture* digs deeper than ever before into the worldwide reach and ethical implications of today's media by highlighting global issues, such as foreign interference in social media and the effect of international box office revenue on decisions made by the domestic film industry, and ethical considerations, such as the fight against sexual harassment across the media industries and the coverage of recent mass shootings, throughout each chapter. This is an exciting and tumultuous time in the media. Developing an understanding of mass communication and becoming a critical consumer of the media is vitally important, especially now as the media are under siege and the lines between fact and fiction are being continuously blurred. *Media & Culture* reaches students where they are and puts the media industries into perspective historically and culturally, helping them to become more informed citizens who use critical thinking and media literacy skills in their daily lives, even as they are bombarded by information, in a variety of ways and via a variety of media. The Twelfth Edition of *Media & Culture* digs deeper than ever before into the worldwide reach and ethical implications of today's media by highlighting global issues, such as foreign interference in social media; augmented reality gaming around the world; the effect of international box office revenue on decisions made by the domestic film industry; newspaper and television consumption around the globe; China's dominant media corporations; new bias around the globe; and international media research; and ethical considerations such as the coverage of recent mass shootings; #MeToo and the fight against sexual harassment across the media industries; gender problems in digital gaming; breaking through Hollywood's race barrier; contemporary politics reviving interest in classic novels; and public relations and "alternative facts".

A Dark Night in Aurora Mar 03 2020 Based on his extensive interviews with the shooter, a forensic psychologist shares “a powerful book that delves deep into a seriously deranged mind” (New York Review of Books). On July 20, 2012 in Aurora, Colorado, James Holmes entered a midnight premiere of *The Dark Knight Rises* wearing body armor and a gas mask. He carried with him a tactical shotgun, a high-capacity assault rifle, and a sidearm. After throwing a canister of tear gas into the crowd, he began firing. Soon twelve were dead and fifty-eight were wounded; young children and pregnant women among them. Holmes was later found calmly waiting at his car. Unlike the majority of mass shooters, he was detained without resistance. In the court case that followed, only forensic psychologist Dr. William H. Reid would be allowed to record interviews with the defendant. Reid analyzed Holmes' diary, phone calls and text messages. He interviewed his family and acquaintances, spoke to his victims, and reviewed tens of thousands of pages of evidence and court testimony in an attempt to understand how a happy, seemingly normal child could become a killer. In *A Dark Night in Aurora*, Reid draws on his research and twenty-three hours of unredacted interview transcripts to bring the reader inside the mind of a mass murderer. This updated edition includes a new afterword by the author.

Parkland: Birth of a Movement Jul 19 2021 The deeply moving account of the extraordinary teenage survivors of the Parkland shooting. Emma Gonzalez called BS. David Hogg called out Adult America. Cameron Kasky recruited a colorful band of teenagers. Four days after escaping Marjory Stoneman Douglas High School, they announced the audacious March for Our Lives. A month later, it was the fourth largest protest in American history. Dave Cullen takes us on the students' odyssey. With unrivaled access to their friends and families, meetings, homes and tour bus through gun country, he reveals the quirky, playful organizers that have taken the United States by storm. We see the students cope with shattered friendships and PTSD, along with the normal struggles of exams and college acceptances. We see victims refusing victimhood. This spell-binding book is a testament to change and an examination of a pivotal moment in American culture, a generational struggle to save every kids of every color from the ravages of gun violence. Parkland is a story of staggering empowerment and hope, told through the wildly creative and wickedly funny voices of a group of remarkable campaigners.

Critical Mass Jan 25 2022 The uncontrolled--and potentially lethal--proliferation of strategic nuclear, chemical, and biochemical weapons in the Third World is researched in detail by the acclaimed author of *Deep Black* and a producer for NBC News.

Trigger Points Jun 17 2021 "An urgent read that illuminates real possibility for change." —John Carreyrou, New York Times bestselling author of *Bad Blood* For the first time, a story about the specialized teams of forensic psychologists, FBI agents, and other experts who are successfully stopping mass shootings—a hopeful, myth-busting narrative built on new details of infamous attacks, never-before-told accounts from perpetrators and survivors, and real-time immersion in confidential threat cases, casting a whole new light on how to solve a grievous problem It's time to go beyond all the thoughts and prayers, misguided blame on mental illness, and dug-in disputes over the Second Amendment. Through meticulous reporting and panoramic storytelling, award-winning journalist Mark Follman chronicles the decades-long search for identifiable profiles of mass shooters and brings readers inside a groundbreaking method for preventing devastating attacks. The emerging field of behavioral threat assessment, with its synergy of mental health and law enforcement expertise, focuses on circumstances and behaviors leading up to planned acts of violence—warning signs that offer a chance for constructive intervention before it's too late. Beginning with the pioneering study in the late 1970s of "criminally insane" assassins and the stalking behaviors discovered after the murder of John Lennon and the shooting of Ronald Reagan in the early 1980s, Follman traces how the field of behavioral threat assessment first grew out of Secret Service investigations and FBI serial-killer hunting. Soon to be revolutionized after the tragedies at Columbine and Virginia Tech, and expanded further after Sandy Hook and Parkland, the method is used increasingly today to thwart attacks brewing within American communities. As Follman examines threat-assessment work throughout the country, he goes inside the FBI's elite Behavioral Analysis Unit and immerses in an Oregon school district's innovative violence-prevention program, the first such comprehensive system to prioritize helping kids and avoid relying on punitive measures. With its focus squarely on progress, the story delves into consequential tragedies and others averted, revealing the dangers of cultural misunderstanding and media sensationalism along the way. Ultimately, Follman shows how the nation could adopt the techniques of behavioral threat assessment more broadly, with powerful potential to save lives. Eight years in the making, *Trigger Points* illuminates a way forward at a time when the failure to prevent mass shootings has never been more costly—and the prospects for stopping them never more promising.

Social Effects of Mass Media in India Oct 22 2021 The three parts of this unusual work present a survey of the origin and growth of the mass media in India, as part of the country's political economy, before and after independence. It is a critical assessment of the present media scene including the findings of the first-ever country-wide survey of the social effects of the media, specially TV, conducted by the Center for Media Studies during 1994-95; and recommended future that includes in the case of Akasvani and Doordarshan, now government owned and departmentally run, a radical restructuring and redefinition of role.

Mass Shootings: Media, Myths, and Realities Feb 23 2022 This book provides readers and researchers with a critical examination of mass shootings as told by the media, offering research-based, factual answers to oft-asked questions and investigating common myths about these tragic events. • Tackles common misconceptions about mass shootings perpetrated by and through the media and provides information that grounds the realities of such events in empirical evidence • Explores the history of mass shootings, both before and after the infamous 1999 Columbine High School event and shootings that occurred in and out of schools • Addresses common myths associated with mass shooting events by the media, such as how often and where they occur and the absence of any warning signs • Helps readers understand the realities of these events, including their international reach, the potential warning signs, and how evidence associated with the events can provide clues into why they occurred

Stop the Killing Aug 20 2021 Stop the Killing offers insight into what we can do to end the active shooter crisis plaguing America. The book is packed with training and sensible advice that takes readers through the latest research and best practices, making it a must read for every security-minded citizen and professional.

The Minds of Mass Killers Sep 01 2022 Public mass killings are becoming more common. Though the chances of being harmed or killed in a mass shooting are slim, each incident affects the public's sense of safety. There are many myths and falsehoods concerning mass murderers. As a result, the public lacks reliable knowledge about the reasons behind such killings, preventing the development of comprehensive strategies to mitigate the violence. Written by a mental health therapist with thirty years of research experience in criminal psychology, this book clarifies the realities of mass killings. Using the research on psychological profiling, it provides a foundation for understanding the "pathway to violence" identified in the personal histories of many mass murderers. Drawing from criminology, neuroscience and developmental and social psychology, the author makes the case that we are all capable of creating a safer society.

Mass Spectrometry of Metal Compounds Mar 15 2021 Instrumentation and presentation of mass spectra; Fundamental aspects of the mass spectrometry of metal compounds; fragmentation of metal-containing ions; Energetics of molecular ionisation and dissociation; Main group organometallic and metal-metal bonded compounds; Boron compounds; Polynuclear carbonyls and related derivatives; Transition metal hydrocarbon compounds; Coordination compounds; Analytical aspects of the mass spectrometry of metal chelates.

The Violence Project Nov 03 2022 "Groundbreaking." ?Rachel Louise Snyder, bestselling author of No Visible Bruises An examination of the phenomenon of mass shootings in America and an urgent call to implement evidence-based strategies to stop these tragedies Winner of the 2022 Minnesota Book Award Using data from the writers' groundbreaking research on mass shooters, including first-person accounts from the perpetrators themselves, The Violence Project charts new pathways to prevention and innovative ways to stop the social contagion of violence. Frustrated by reactionary policy conversations that never seemed to convert into meaningful action, special investigator and psychologist Jill Peterson and sociologist James Densley built The Violence Project, the first comprehensive database of mass shooters. Their goal was to establish the root causes of mass shootings and figure out how to stop them by examining hundreds of data points in the life histories of more than 170 mass shooters—from their childhood and adolescence to their mental health and motives. They've also interviewed the living perpetrators of mass shootings and people who knew them, shooting survivors, victims' families, first responders, and leading experts to gain a comprehensive firsthand understanding of the real stories behind them, rather than the sensationalized media narratives that too often prevail. For the first time, instead of offering thoughts and prayers for the victims of these crimes, Peterson and Densley share their data-driven solutions for exactly what we must do, at the individual level, in our communities, and as a country, to put an end to these tragedies that have defined our modern era.

Code of Federal Regulations May 17 2021

Heritage and Tourism in The Global Village Jan 01 2020 A nation's heritage is one of the most potent forces for generating tourism: the Tower of London is the greatest 'visitor attraction' in Britain. But it is pushed into insignificance by comparison with the visitors travelling to Disneyland, Epcot and the other entertainment complexes in the USA; and it will be dwarfed by Euro-Disneyland east of Paris. So how should heritage attractions respond: should they find their own specific audiences and resources? This book, written by a leading heritage specialist, is essential reading for all those concerned both with heritage and leisure management. International in scope, it examines successful examples of heritage management for tourism, and equally some failures. It aims to lay some useful ground rules which should underpin all heritage developments designed to attract tourism on a major scale.

Philosophical Transactions of the Royal Society of London Jul 07 2020 Each issue of Transactions B is devoted to a specific area of the biological sciences, including clinical science. All papers are peer reviewed and edited to the highest standards. Published on the 29th of each month, Transactions B is essential reading for all biologists.

Gun Violence and Mental Illness Oct 02 2022 Perhaps never before has an objective, evidence-based review of the intersection between gun violence and mental illness been more sorely needed or more timely. Gun Violence and Mental Illness, written by a multidisciplinary roster of authors who are leaders in the fields of mental health, public health, and public policy, is a practical guide to the issues surrounding the relation between firearms deaths and mental illness. Tragic mass shootings that capture headlines reinforce the mistaken beliefs that people with mental illness are violent and responsible for much of the gun violence in the United States. This misconception stigmatizes individuals with mental illness and distracts us from the awareness that approximately 65% of all firearm deaths each year are suicides. This book is an apolitical exploration of the misperceptions and realities that attend gun violence and mental illness. The authors frame both pressing social issues as public health problems subject to a variety of interventions on individual and collective levels, including utilization of a novel perspective: evidence-based interventions focusing on assessments and indicators of dangerousness, with or without indications of mental illness. Reader-friendly, well-structured, and accessible to professional and lay audiences, the book: * Reviews the epidemiology of gun violence and its relationship to mental illness, exploring what we know about those who perpetrate mass shootings and school shootings. * Examines the current legal provisions for prohibiting access to firearms for those with mental illness and whether these provisions and new mandated reporting interventions are effective or whether they reinforce negative stereotypes associated with mental illness. * Discusses the issues raised in accessing mental health treatment in regard to diminished treatment resources, barriers to access, and involuntary commitment.* Explores novel interventions for addressing these issues from a multilevel and multidisciplinary public health perspective that does not stigmatize people with mental illness. This includes reviews of suicide risk assessment; increasing treatment engagement; legal, social, and psychiatric means of restricting access to firearms when people are in crisis; and, when appropriate, restoration of firearm rights. Mental health clinicians and

trainees will especially appreciate the risk assessment strategies presented here, and mental health, public health, and public policy researchers will find *Gun Violence and Mental Illness* a thoughtful and thought-provoking volume that eschews sensationalism and embraces serious scholarship.

The Chemistry of Cement and Concrete Oct 29 2019

The Lightness of Being Mar 27 2022 A Nobel-prize winning physicist takes on the essential question: what are we made of? Our understanding of nature's deepest reality has changed radically, but almost without our noticing, over the past twenty-five years. Transcending the clash of older ideas about matter and space, acclaimed physicist Frank Wilczek explains a remarkable new discovery: matter is built from almost weightless units, and pure energy is the ultimate source of mass. He calls it "The Lightness of Being." Space is no mere container, empty and passive. It is a dynamic Grid-a modern ether- and its spontaneous activity creates and destroys particles. This new understanding of mass explains the puzzling febleness of gravity, and a gorgeous unification of all the forces comes sharply into focus. *The Lightness of Being* is the first book to explore the implications of these revolutionary ideas about mass, energy, and the nature of "empty space." In it, Wilczek masterfully presents new perspectives on our incredible universe and envisions a new golden age of fundamental physics.
