Designing Distributed Learning Environments with Intelligent Software Agents Oct 26 2019 *Designing Distributed Learning Environments with Intelligent Software Agents* reports on the most recent advances in agent technologies for distributed learning. Chapters are devoted to the various aspects of intelligent software agents in distributed learning, including the methodological and technical issues on where and how intelligent agents can contribute to meeting distributed learning needs today and tomorrow. This book benefits the AI (artificial intelligence) and educational communities in their research and development, offering new and interesting research issues surrounding the development of distributed learning environments in the Semantic Web age. In addition, the ideas presented in the book are applicable to other domains such as Agent-Supported Web Services, distributed business process and resource integration, computer-supported collaborative work (CSCW) and e-Commerce.

Academic Legal Writing Nov 19 2021 Designed to help law students write and publish articles, Academic Legal Writing provides detailed instructions for every aspect of the law school writing, research, and publication process. Topics covered include law review articles and student notes, seminar term papers, how to shift from research to writing, cite-checking others work, publishing, and publicizing written works. With supporting documents available on <http://volokh.com/writing>, the book helps law students and everyone else involved in academic legal writing: professors save time and effort communicating basic points to students; law schools satisfy the American Bar Associations second- and third-year writing requirements; and law reviews receive better notes from their staff.

Handbook on Writing Research Paper in Social Science Using Advance Tools Oct 19 2021 The book has well turned out to be a boon for researchers from academia as well as industry. The book seemly meets the requirement and encounters the dilemma of a 'first time researcher' in many ways. The basics of research paper writing are taken well care in the previous editions of the handbooks as proceedings published by Prestige Institute of Management and research, Gwalior. The previous editions focused on steps to carry out review of literature, setting objectives, developing hypothesis, selecting appropriate methods as per objectives, drawing inferences followed by referencing styles. The book not only provides insights to a first time researcher but also introduces them with the latest tools. Part one of the book presents introduction to E views as Chapter 1. The chapter deals with step wise procedure to work with E views elaborately. E-Views is widely used numerous econometric analyses along with statistical analysis. E views provided analysis like cross-section, time series estimates and forecasts, as well as does panel data analysis simultaneously. Chapter 2 is modestly written to introduce 'Mendeley' to the researcher. 'Mendeley is expedient for copious objectives like conducting systematic literature review, research gap identification, setting objectives thereafter, and more over provides a most vital efficacy to manage research papers in a stress-free manner. 'Mendeley' is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds. Thus taking research on next level. Part two of the book contains twelve research papers covering diverse domains like finance, marketing, HR and, IT. The research papers are the sample papers exhibiting the concepts of writing a well-structured paper and elaborating the procedures to be followed while writing a research paper. The research papers included in the book are developed during the 'Five Day National Research Methodology Workshop', organized by Prestige Institute of Management and research, Gwalior. The paper writing work was divided into 'before', 'during' and 'after' phases. Topic finalization, measure development, review of literature and data collection was done before the initiation of workshop among the teams of registered participants. The entire methodology, application of data analysis tools and discussion was done during the workshop. Post workshop i.e. the after phase was exclusively dedicated for strengthening the review of literature, discussion of results and, referencing followed by improvement in the overall structure and language of the research paper. We hope the efforts put in the book will surely help readers

Kingsley Davis Jul 24 2019 "David Heer's biography of Kingsley Davis is based on material contained in the Kingsley Davis Archive at the Hoover Institution Library at Stanford University, the Kingsley Davis graduate file at Harvard University, the interview

of Kingsley Davis by Jean van der Tak in *Demographic Destinies* (1990), and David Heer's personal relationship with Kingsley Davis. The book also contains thirty of the most important writings by Kingsley Davis. These were chosen, in part, for the number of citations received in the Cumulative Social Science Citation Index, and in part to ensure that readers would be able to assess the continuity of Kingsley Davis's ideas at all stages of his career."--BOOK JACKET.
