Semicollusion Jun 05 2020 The notion 'semicollusion' refers to situations where firms collude in one (or several) choice variable(s) and compete in others. For example, firms

collude on prices and compete on advertising. Although the notion 'semicollusion' is not so often used explicitly, it turns out that the topic is covered extensively in the economic literature. Moreover, the phenomena 'semicollusion' seem to be present in numerous industries. The purpose of this survey is to explain how semicollusion works in theory, describe empirical studies of semicollusion, and discuss the possible welfare effects of semicollusion.

The syndromic approach is completed by an etiological approach, based on the major advances in genetics and functional genetics. New entities

It was necessary to justify the physiological, epidemiologic, genetic and therapeutic approaches and to consider them in the light of the new classification efforts, which are still in the making. Nevertheless, the description of epileptic syndromes, both classical and recent, remains at the core of this book.
