Cheap Outboards Aug 08 2020 * Outboard motor repair for the average guy * Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of “cheap power.” Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours' work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You'll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellers, Lower

Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. Practical Skipper Mar 03 2020 When you learn how to skipper a yacht the practical courses cover a whole range of activities, from passage planning to pilotage and berthing. The way you learn about these elements on a course is usually like this: – the briefing, where the instructor prepares you for the exercise. He should explain what we're trying to achieve, how it's going to work, and what the skipper and crew need to do – the practical activity – you all have a go – the debriefing afterwards, where you discuss what happened and how it went, and take notes of what to remember. At the end of the course, you will have had a go at all the important stuff you have to do in the course of sailing the yacht, but you'll probably struggle to remember all the essential bits: the all-important briefing, and the sequence of things you have to remember. This book is the answer. Containing all the author's own briefing notes and concise explanations, it covers every activity a skipper will need to carry out. Using bullet points, handy checklists and simple diagrams, this book is a unique resource for all skippers – reassurance for new skippers that they haven't forgotten something vital, and a reminder for the more experienced. These are the notes you wish you'd written when you attended your sailing course, and had to hand when revising for your exam or refreshing your knowledge later.

Along the way it offers a whistle-stop tour of famous sheds from Pliny the Younger's summerhouse and the retreats of 19th-century composers Edvard Grieg and Gustav Mahler to award-winning 21st-century fantasy writer Neil Gaiman's gazebo.
