Casual Calculus: A Friendly Student Companion - Volume 1 May 15 2021 Yes, this is another Calculus book. However, it fits in a niche between the two predominant types of such texts. It could be used as a textbook, albeit a streamlined one — it contains exposition on each topic, with an introduction, rationale, train of thought, and solved examples with accompanying suggested exercises. It could be used as a solution guide — because it contains full written solutions to each of the hundreds of exercises posed inside. But its best position is right in between these two extremes. It is best used as a companion to a traditional text or as a refresher — with its conversational tone, its 'get right to it' content structure, and its inclusion of complete solutions to many problems, it is a friendly partner for students who are learning Calculus, either in class or via self-study. Exercises are structured in three sets to force multiple encounters with each topic. Solved examples in the text are accompanied by 'You Try It' problems, which are similar to the solved examples; the students use these to see if they're ready to move forward. Then at the end of the section, there are 'Practice Problems': more problems similar to the 'You Try It' problems, but given all at once. Finally, each section has Challenge Problems — these lean to being equally or a bit more difficult than the others, and they allow students to check on what they've mastered. The goal is to keep the students engaged with the text, and so the writing style is very informal, with attempts at humor along the way. The target audience is STEM students including those in engineering and meteorology programs.

Digital Wars Sep 18 2021 The first time that Apple, Google and Microsoft found themselves sharing the same digital space was 1998. They were radically different companies and they would subsequently fight a series of pitched battles for control of different parts of the digital landscape. They could not know of the battles to come. But they would be world-changing. This new edition of Digital Wars looks at each of these battles in turn. Accessible and comprehensive, it analyses the very different cultures of the three companies and assesses exactly who are the victors on each front. Thoroughly updated to include information on the latest developments and rising competitors Samsung, it also include a completely new chapter on how China moved from being the assembly plant for music players and smartphones, to becoming the world's biggest smartphone business.

Microeconomics Nov 28 2019 Microeconomics is a classroom-tested resource for learning the key concepts, essential tools, and applications of microeconomics. This leading textbook enables students to recognize and analyze significant data, patterns, and trends in real markets through its integrated, student-friendly approach to the subject — providing practice problems, hands-on exercises, illustrative examples, and engaging applications that ground theory firmly in the real world. Each chapter, opening with a set of clearly defined learning goals based on the Bloom Taxonomy, features numerous Learning-by-Doing (LBD) problems, mathematical and graphical data, and varied problem sets focused on current events. Now in its sixth edition, the text offers extensive new and revised content throughout. All applications reflect current data and important new developments in the field of economics, including behavioral economics, randomized controlled trials (RCTs) in policy evaluation and design, and computational-based microeconomics. Updated chapter openers, designed to increase student interest, cover topics including the economic impacts of climate change, U.S. household income and spending, surge pricing by Uber and Lyft, the effect of immigration on wages,

and advances in robotics, automation, artificial intelligence, and more.

Paediatric Rehabilitation Engineering Oct 20 2021 Innovations in paediatric rehabilitation engineering can serve as a springboard to education, psychosocial, social, physical and cognitive development for children and youth with disabilities. Instead of providing an overview of rehabilitation engineering, Paediatric Rehabilitation Engineering focuses on the uniqueness of the paediatric subspecialty via an international sampling of methods and techniques currently in use or in development. The book is divided into three complementary components. The first group of chapters is broadly concerned with connecting individuals to their environment and to the people around them. The second group revolves around paediatric technologies that compensate for compromised or missing function. The final group of chapters is about machines and environments which provide stimulating and interactive platforms for therapy and research. Topics include: Microswitch-based occupational, recreational and rehabilitation programs Emerging access technologies, like infrared thermal imaging and vocal cord vibration detection Communication technologies to enable children to communicate in a variety of everyday environments Accessible graphical user and Web-based interface design Postural and upper and lower extremity compensation, such as customized chairs and prostheses Global efforts in the area of robotics for autism research Virtual reality and other interfaces to mitigate motor, communication, and physical control difficulties Paediatric rehabilitation engineering offers endless possibilities for future research with implications across the fields of physical and cognitive rehabilitation, medicine, computer science, and policy. It is the harmonizing of the expertise and energies of rehabilitation professionals such as teachers, families, paediatric rehabilitation engineers, and other stakeholders that will ensure that children are optimally supported as they embark on their journey from disability to possibility.

Reason in a Dark Time Apr 01 2020 From the 1992 Rio Earth Summit to the 2009 Copenhagen Climate Conference there was a concerted international effort to stop climate change. This book is about what climate change is, why we failed to stop it, and why it still matters what we do.

Demented Souls Collection Jan 11 2021 Not just another motorcycle club, the Demented Souls have secrets. Secrets that could cost them their lives. This volume contains: Sadist Gizmo Mac Tuck Sadist: Sadist made a commitment, one that didn't include a woman, at least not one of his own, but was it possible he could have more? Sadist has lived the last ten years with one goal in mind. To make this world safer for people like his family. He lived to protect his fellow Demented Souls, his club brothers. That didn't leave room for the softer parts of life like a wife or family. He didn't know if he could share the secret that kept his brothers alive. But who would be willing to let him keep those secrets from them? Beth was just trying to get through a rough spot. Between work and helping her parents, she was getting by but that was all. Then a tall, tattooed man walked into her salon for a haircut. The last thing she expected was for the man who made her stomach flip to be interested in her. Until he came back and asked her out. Can Beth and Sadist figure out how to make things work or will the secrets and misunderstandings be too much? He gave his loyalty to his club, she wanted his heart. Could they work out a deal? Gizmo: Gizmo Martinez had long since dedicated his life to the Demented Souls and what the club meant. This was no life for a wife or family, and he knew it. But when her sweet charm pulls at something deep inside, can he walk away? Jill wants something more than her work and video games. What she needs is something or someone to add some excitement. Maybe the tattooed man who ran into her, literally, in the grocery store is just the one to show her another side of life? When club business comes between them, can Gizmo and Jill find away over the problem or will the cost be too steep? Mac: Mac had his life in order. His mechanic shop, his brothers and a house where he was comfortable. He thought he had it all, or at least all that he needed. The last thing he expected was the sexy, self-assured woman next door who seemed waiting to knock his life off kilter. Elyse had given up on dating. She didn't have time for it with her job and everything she wanted to do. Besides, she'd never found a man who could step up and be her equal without trying to make her smaller. Then the hot biker who lived next door knocked on her door. But was he more than just another pretty face? Can they work out their differences or are Mac and Elyse destined for another heartbreak? Tuck: Tuck left home more than twenty years ago to be his own man. Now he's called back with the news that both his parents are dead and he needs to be there. He doesn't want to go. He's built a life with the Demented Souls. They've been his family for the last ten years. But something tells him that may be changing. London is stuck in a life she hates. Wishing she'd gotten out when she had the chance. She's sick of her dead-end job tending bar in Deadwood. Intent on complaining to a friend one night she texts her. or she thought she did. Instead, her message went to a wrong number. With nothing more than miles between them, Tuck and London build a friendship over text. Then Tuck got word he needed to back to where he grew up, which just happened to be less than two hundred miles from where London was. They made plans to meet but when he went to his mother's funeral, he found more there than he'd expected. When they find themselves surrounded by bikes that try to run them off the road, things become terrifying. Can they figure out what's going on before it's too late or will something happen to end things before they find out how much they care about each other?

Gizmo's Land Nov 01 2022 Join the author as she takes you on a magic adventure along with Mary and her pet cat Gizmo. How to Prepare for Climate Change Jun 27 2022 A practical and comprehensive guide to surviving the greatest disaster of our time, from New York Times bestselling self-help author and beloved CBS Sunday Morning science and technology correspondent David Pogue. You might not realize it, but we're already living through the beginnings of climate chaos. In Arizona, laborers now start their day at 3 a.m. because it's too hot to work past noon. Chinese investors are snapping up real estate in Canada. Millennials have evacuation plans. Moguls are building bunkers. Retirees in Miami are moving inland. In *How to Prepare for Climate Change*, bestselling self-help author David Pogue offers sensible, deeply researched advice for how the rest of us should start to ready ourselves for the years ahead. Pogue walks readers through what to grow, what to eat, how to build, how to insure, where to invest, how to prepare your children and pets, and even where to consider relocating when the time comes. (Two areas of the country, in particular, have the requisite cool temperatures, good hospitals, reliable access to water, and resilient infrastructure to serve as climate havens in the years ahead.) He also provides wise tips for managing your anxiety, as well as action plans for riding out every climate catastrophe, from superstorms and wildfires to ticks and epidemics. Timely and enlightening, *How to Prepare for Climate Change* is an indispensable guide for anyone who read *The Uninhabitable Earth* or *The Sixth Extinction* and wants to know how to make smart choices for the upheaval ahead.

New Directions in Technological Pedagogical Content Knowledge Research Jan 23 2022 In the past decades wide-ranging research on effective integration of technology in instruction have been conducted by various educators and researchers with the hope that the affordances of technology might be leveraged to improve the teaching and learning process. However, in order to put the technology in optimum use, knowledge about how and in what way technology can enhance the instruction is also essential. A number of theories and models have been proposed in harnessing the technology in everyday lessons. Among these attempts Technological and Pedagogical Content Knowledge (TPACK) framework introduced by Mishra and Koehler has emerged as a representation of the complex relationships between technology, pedagogy and content knowledge. The TPACK framework extends the concept of Shulman's pedagogical content knowledge (PCK) which defines the need for knowledge about the content and pedagogical skills in teaching activities. Since then the framework has been embraced by the educational technology practitioners, instructional designers, and educators. TPACK research received increasing attention from education and training community covering diverse range of subjects and academic disciplines and significant progress has been made in recent years. This book attempts to bring the practitioners and researchers to present current directions, trends and approaches, convey experience and findings, and share reflection and vision to improve science teaching and learning with the use of TPACK framework. A wide array of topics will be covered in this book including applications in teacher training, designing courses, professional development and impact on learning, intervention strategies and other complex educational issues. Information contained in this book will provide knowledge growth and insights into effective educational strategies in integration of technology with the use of TPACK as a theoretical and developmental tool. The book will be of special interest to international readers including educators, teacher trainers, school administrators, curriculum designers, policy makers, and researchers and complement the existing literature and published works.
