Health Psychology, 6e Dec 06 2020 Health Psychology is essential reading for all students and researchers of health psychology. Organized into four sections, the 6th edition is structured with a clear emphasis on theory and evidence throughout. This textbook maintains its popular and balanced approach between the biomedical and psychosocial model, while strengthening its focus on critical thinking and behaviour change. Key updates include: • Learning objectives: Each chapter opens with a set of learning objectives, which clearly outlines the knowledge, understanding and skills you will acquire from each chapter. • Case studies: Each chapter includes a case study to illustrate how the key theories and ideas are relevant to everyday life. • Through the Eyes of Health Psychology: A brand new feature to show how a health psychologist might analyse each case study using the theories and concepts presented throughout the book. • Health promotion: A whole chapter devoted to the theories and evidence relevant to behaviour change and includes a new section on integrated approaches and the drive to develop a new science of behaviour change. • Thinking critically about: The process of thinking critically is introduced in the first chapter which describes how to think critically about theory, methods, measurement and research design. Each chapter has its own 'Thinking critically about ...' section at the end to highlight problems with specific theories and research areas. This section includes critical thinking questions and a 'Some problems with...' section to form the basis of class discussions and enable students to be more critical in their thinking and writing.

Blindspot Sep 03 2020 Do we really know and understand our pets? Are we totally aware of their personalities and their habits, good and bad, even when we aren't around to observe them? Of course not! How could we? The neighbors tell us that our sweet little dog just trashed their yard with the garbage bag, or their cat is afraid to go outside. Well, what if a pet's main caretaker dies, and he/she is left to fend for him/herself? Blindspot is a blind Australian shepherd who loves his owner unconditionally, as expected. Unintentionally, she fails to realize all his needs when it comes to health and well-being, causing the dog to find his own meals, and he does, in animal and human flesh. Creating an overall panic and disruption in a small town in Texas, a Native American widow, Nelda Cannon, is totally unaware of her dog's eating habits. When she learns that he is suspected of murder, and it is her responsibility to be aware of what he does, she literally goes underground to protect him and herself. This story is not only focused on a misunderstood, hungry dog. It also raises some issues about the plight of the Native Americans, and their entitlements to land and privacy, the questions concerning the capture and elimination of endangered species if they are dangerous to mankind, and focuses on the loyalty of one family through hard and difficult times. A chain of strange circumstances follow for Nelda Cannon and the dog's benefit, leaving the reader totally amazed or perplexed in the ending of this story.
