The Knowledge Argument and Phenomenal Concepts Jun 26 2019 There is widespread debate in contemporary philosophy of mind over the place of conscious experiences in the natural world – where the latter is taken to be broadly as described and explained by such sciences as physics, chemistry and biology; while conscious experiences encompass pains, bodily sensations, perceptions, feelings and moods. Many philosophers and scientists, who endorse physicalism or materialism, maintain that these mental states can be completely described and explained in natural terms. Frank Jackson's knowledge argument is a very influential objection to physicalism and, thus, to such an optimistic view about the scientific treatability of conscious experiences. According to the knowledge argument, we can know facts about

our colour experiences that are not physical facts. At the heart of this book lies a response to the knowledge argument that aims to defend a version of physicalism, that the author calls modest reductionism. This reply is based on the endorsement of the phenomenal concept strategy. According to this response, the knowledge argument cannot prove that there are non-physical facts. Instead, it can only show that there are ways of thinking about colour experiences that are based on phenomenal concepts that differ from scientific concepts. The author argues for the superiority of the phenomenal concept strategy over other influential physicalist replies to the knowledge argument. However, he criticises some recent physicalist accounts of phenomenal concepts and develops his own distinctive theory of these concepts.

Intermediate Algebra: An Applied Approach Feb 12 2021 As in previous editions, the focus in INTERMEDIATE ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mobile Computing: Concepts, Methodologies, Tools, and Applications 2020 "This multiple-volume publication advances the emergent field of mobile computing offering research on approaches, observations and models pertaining to mobile devices and wireless communications from over 400 leading researchers"--Provided by publisher.

Understandable Statistics: Concepts and Methods May 18 2021 UNDERSTANDABLE STATISTICS: CONCEPTS AND METHODS, Twelfth Edition, is a thorough yet accessible program designed to help you overcome any apprehensions you may have about statistics and to master the subject. The authors provide clear guidance and informal advice while showing you the links between statistics and the world. To reinforce this approach—and make the material interesting as well as easier to understand—the book integrates real-life data from a variety of sources, including journals, periodicals, newspapers, and the Internet. You'll also have opportunities to develop your critical-thinking and statistical literacy skills through special features and exercises

throughout the text. The use of graphing calculators, Excel, Minitab, Minitab Express™, and SPSS is covered, although not required. NEW for Fall 2020 - Turn your students into statistical thinkers with the Statistical Analysis and Learning Tool (SALT). SALT is an easy-to-use data analysis tool created with the intro-level student in mind. It contains dynamic graphics and allows students to manipulate data sets in order to visualize statistics and gain a deeper conceptual understanding about the meaning behind data. SALT is built by Cengage, comes integrated in Cengage WebAssign Statistics courses and available to use standalone. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Essentials of Writing: Ten Core Concepts May 06 2020 Master the fundamentals that are critical to becoming an effective writer with Yagelski's THE ESSENTIALS OF WRITING: TEN CORE CONCEPTS, 3E. This short, flexible writing guide presents the core concepts behind becoming a more sophisticated writer and gives you opportunity to practice these concepts in action in Chapters 2 through 4. Full chapters devoted to analytic and argumentative writing provide practical insights with new annotated professional readings on current, interesting subjects. You strengthen your academic writing style as you learn how to synthesize ideas, design professional documents, conduct research and work with today's digital sources. Updates reflect the latest MLA guidelines and guide you in developing powerful critical reading skills as you learn to evaluate both academic and popular texts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

New Perspectives on Computer Concepts 2014: Brief Aug 01 2022 Go beyond computing basics with the award-winning NEW PERSPECTIVES ON COMPUTER CONCEPTS. Designed to get you up-to-speed on essential computer literacy skills, this market leading text goes deeper, providing technical and practical information relevant to everyday life. NEW PERSPECTIVES ON COMPUTER CONCEPTS 2014 incorporates significant technology trends that affect computing and everyday life; such as concerns for data security, personal privacy, online safety, controversy over digital rights management, interest in open source software and portable applications, and more. In addition, coverage of Microsoft Windows 8 and Office 2013 will introduce you to the exciting new features of Microsoft's next generation of software. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Progressive Concepts for Semantic Web Evolution: Applications and Developments Dec 13 2020 "This book presents innovative educational and learning models that meet current complex educational demands"--Provided by publisher.

Technology Adoption and Social Issues: Concepts, Methodologies, Tools, and Applications Feb 01 2020 As society continues to experience increases in technological innovations, various industries must rapidly adapt and learn to incorporate these advances. While there are benefits to implementing these technologies, the sociological aspects still need to be considered. Technology Adoption and Social Issues: Concepts, Methodologies, Tools, and Applications is an innovative reference source for the latest academic

material on the various effects of technology adoption, implementation, and acceptance. Highlighting a range of topics, such as educational technology, globalization, and social structure, this multi-volume book is ideally designed for academicians, professionals, and researchers who are interested in the latest insights into technology adoption.

OpenVMS Operating System Concepts Dec 25 2021 OpenVMS Operating System Concepts, Second Edition uses a new approach to explain the OpenVMS operating system. Combining discussions of operating system theory with examples of its applications in key OpenVMS operating system facilities, the book provides a thoughtful introduction for application programmers, systems managers, and students. The books shows how OpenVMS system services can tap the power of operating system facilities to perform critical tasks on behalf of applications. It has been updated for OpenVMS and gives program examples in C. · Updated for OpenVMS · Shows program examples in C

Wireless Communication-the fundamental and advanced concepts Jul 08 2020

Wireless communication is one of the fastest growing fields in the engineering world today. Rapid growth in the domain of wireless communication systems, services and application has drastically changed the way we live, work and communicate. Wireless communication offers a broad and dynamic technological field, which has stimulated incredible excitements and technological advancements over last few decades. The expectations from wireless communication technology are increasing every day. This is placing enormous challenges to wireless system designers. Moreover, this has created an ever increasing demand for conceptually strong and well versed communication engineers who understand the wireless technology and its future possibilities. In recent years, significant progress in wireless communication system design has taken place, which will continue in future. Especially for last two decades, the research contributions in wireless communication system design have resulted in several new concepts and inventions at remarkable speed. A text book is indeed required to offer familiarity with such developments and underlying concepts, to be taught in the classroom to future engineers. This is one of the motivations for writing this book. Practically no book can be up to date in this field, due to the fast ongoing research and developments. The new developments are announced almost every day. Teaching directly from the research papers in the classroom cannot build the necessary foundation. Therefore need for a textbook is unavoidable, which is integral to learning, and is an essential source to build the concept. The prime goal of this book is to cooperate in the learning process.

Concepts of Database Management May 30 2022 Delivering concise, cutting-edge coverage, CONCEPTS OF DATABASE MANAGEMENT, 8e uses real-world cases, examples, and illustrations to give readers a thorough understanding of such critical issues as database design, data integrity, concurrent updates, data security, and more. Completely updated to Microsoft Access 2013 standards, the text presents SQL in a database-neutral environment and covers all major topics, including E-R diagrams, normalization, and database design. It provides detailed coverage of the relational model (including QBE and SQL), normalization and views, database administration and management, and more. Advanced topics include distributed databases, data warehouses, stored procedures, triggers, data macros, and Web databases. Important Notice:

deWit's Fundamental Concepts and Skills for Nursing -Second South Asia Edition, E-Book Oct 30 2019 deWit's Fundamental Concepts and Skills for Nursing -Second South Asia Edition, E-Book

Digital Literacy: Concepts, Methodologies, Tools, and Applications Jul 28 2019 Digital Literacy: Concepts, Methodologies, Tools and Applications presents a vital compendium of research detailing the latest case studies, architectures, frameworks, methodologies, and research on Digital Democracy. With contributions from authors around the world, this three-volume collection presents the most sophisticated research and developments from the field, relevant to researchers, academics, and practitioners alike. In order to stay abreast of the latest research, this book affords a vital look into Digital Literacy research.

Fundamental Concepts and Skills for Nursing - E-Book Aug 28 2019 Learn all the basic concepts and fundamental skills that an LPN/LVN needs! Fundamental Concepts and Skills for Nursing, 6th Edition prepares you for nursing practice in a number of care settings, including hospitals, long-term care facilities, medical offices, clinics, surgery centers, and home care agencies. Illustrated, easy-to-read guidelines ensure that you gain a thorough understanding of the nursing process and problem solving, addressing topics such as the physiologic and psychosocial needs of the patient, critical thinking and clinical judgment, communication, collaboration with the health care team, patient teaching, and cultural competence. Written by noted educator Patricia Williams, this text prepares you to pass the Next Generation NCLEX-PN® Exam and succeed in any care setting.

Engineering Chemistry-I: Concepts and Applications Jan 26 2022 Engineering Chemistry - I: Concepts and Applications is a textbook that offers an exclusive coverage of the topics and proper explanation of concepts as per the present day and future needs of the students. The book provides the theoretical (Chapters 1-7) as well as practical (Chapter 8) aspects of the paper Chemistry-I (BSC102) as per the latest AICTE curriculum. It will be useful to not only the first-year engineering and technology students of all streams but also the professors for guiding their students.

Chemistry: Concepts and Problems Oct 03 2022 CHEMISTRY SECOND EDITION The fast, easy way to master the fundamentals of chemistry Have you ever

wondered about the differences between liquids, gases, and solids? Or what actually happens when something burns? What exactly is a solution? An acid? A base? This is chemistry--the composition and structure of substances composing all matter, and how they can be transformed. Whether you are studying chemistry for the first time on your own, want to refresh your memory for a test, or need a little help for a course, this concise, interactive guide gives you a fresh approach to this fascinating subject. This fully up-to-date edition of *Chemistry: Concepts and Problems*: * Has been tested, rewritten, and retested to ensure that you can teach yourself all about chemistry * Requires no prerequisites * Lets you work at your own pace with a helpful question-and-answer format * Lists objectives for each chapter--you can skip ahead or find extra help if you need it * Reinforces what you learn with chapter self-tests

Writing: Ten Core Concepts (w/ MLA9E Updates) Apr 04 2020 Master the fundamentals critical to becoming an effective writer with Yagelski's *WRITING: TEN CORE CONCEPTS, 3E*. Carefully designed guides, thoroughly integrated with the core concepts, set this book apart as you study key rhetorical moves within analytical, persuasive and narrative writing. Applied assignments challenge you to complete causal analysis, academic arguments and literacy narratives. This edition presents writing as an interaction between writer and reader, teaching you how to use writing skills to participate in important conversations shaping today's lives. This edition features 26 new readings and 11 new sample student essays as well as new chapters on literacy narratives, summary-response essays, annotated bibliographies and presentations. Updates guide you in working with digital resources, expand your critical reading strategies and highlight the latest APA and MLA guidelines. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Instructor's Manual with Test Bank [for] Basic Concepts of Chemistry, Fourth Edition Dec 01 2019

The Human Body: Concepts of Anatomy and Physiology Apr 28 2022 The new edition of Bruce Wingerd's *The Human Body: Concepts of Anatomy and Physiology* helps encourage learning through concept building, and is truly written with the student in mind. Learning Concepts divide each chapter into easily absorbed subunits of information, making learning more achievable. Since students in a one-semester course may have little experience with biological and chemical concepts, giving them tools such as "concept statements," "concept check" questions, and a "concept block study sheet" at the end of each chapter help them relate complex ideas to simple everyday events. The book also has a companion Student Notebook and Study Guide (available separately) that reinvents the traditional study guide by giving students a tool to help grasp information in class and then reinforce learning outside of class.

Emerging Applications of Natural Language Processing: Concepts and New Research Mar 16 2021 "This book provides pertinent and vital information that researchers, postgraduate, doctoral students, and practitioners are seeking for learning about the latest discoveries and advances in NLP methodologies and applications of NLP"--Provided by publisher.

Children's Counting and Concepts of Number Jun 18 2021 For some time now,

the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books to be devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books, namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial publication of the "advances" type, carrying the subtitle Progress in Cognitive Development Research. Volumes in the Progress sequence are strongly thematic, in that each is limited to some well-defined domain of cognitive developmental research (e. g. , logical and mathematical development, semantic development). All Progress volumes are edited collections. Editors of such books, upon consultation with the Series Editor, may elect to have their works published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors will be published as separate volumes within the series. is being used in the selec A fairly broad definition of cognitive development tion of books for this series.

Strategic Information Systems: Concepts, Methodologies, Tools, and Applications Mar 28 2022 "This 4-volume set provides a compendium of comprehensive advanced research articles written by an international collaboration of experts involved with the strategic use of information systems"--Provided by publisher.

Beginning Algebra: Connecting Concepts Through Applications Oct 11 2020
BEGINNING ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master algebraic concepts, problem solving, and communication skills. Students learn how to solve problems generated from realistic applications, instead of learning techniques without conceptual understanding. The authors have developed several key ideas to make concepts real and vivid for students. First, they emphasize strong algebra skills. These skills support the applications and enhance student comprehension. Second, the authors integrate applications, drawing on realistic data to show students why they need to know and how to apply math. The applications help students develop the skills needed to explain the meaning of answers in the context of the application. Third, the authors develop key concepts as students progress through the course. For example, the distributive property is introduced in real numbers, covered when students are learning how to multiply a polynomial by a constant, and finally when students learn how to multiply a polynomial by a monomial. These concepts are reinforced through applications in the text. Last, the authors' approach prepares students for intermediate algebra by including an introduction to material such as functions and interval notation as well as the last chapter that covers linear and quadratic modeling. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Fundamental Concepts and Skills for Nursing Feb 24 2022 Part of the popular

LPN Threads series, this market-leading text features an easy-to-follow writing style and organization to teach you the concepts and skills you need to know to practice nursing in a variety of care settings. This new edition offers in-depth discussion of QSEN competencies, rationales for the NCLEX-PN review questions, and new icons to point out the most current evidence-based information. Standard LPN Threads features include helpful characteristics such as full-color design, key terms, numbered objectives, key points, critical thinking questions, critical thinking activities, glossary, and references. Easy-to-follow reading level and text organization presents information from simple to most complex. Think Critically boxes help you synthesize information and apply concepts beyond the scope of the chapter. Cultural Considerations related to biocultural variations as well as health promotion for specific ethnic groups demonstrate how to provide culturally competent care. Elder Care Points highlight changes that occur with aging and how they affect nursing care. Home Care boxes highlight the necessary adaptations of nursing skills and techniques for the patient in the home care setting. NEW! Rationales for NCLEX review questions at the end of each chapter help you understand why your choices were correct or incorrect. NEW! Full text reviews by experts in the field offer consistency and ease understanding as you progress through the book. NEW! Evolve margin icons denote supplemental material for students on Evolve. NEW! Evidence Based Practice margin icons point out the most current and evidence based information. NEW! In depth discussion of the Quality and Safety Education for Nurses (QSEN) within the text provides the knowledge, skills and attitudes necessary to continuously improve the quality and safety of the healthcare systems.

Understanding Health Insurance: A Guide to Billing and Reimbursement Sep 21

2021 Discover the essential learning tool to prepare for a career in medical insurance billing -- Green's UNDERSTANDING HEALTH INSURANCE, 13E. This comprehensive, easy-to-understand book is fully updated with the latest code sets and guidelines. Readers cover today's most important topics, such as managed care, legal and regulatory issues, coding systems, reimbursement methods, medical necessity, and common health insurance plans. Updates throughout this edition present new legislation that impacts health care, including the Affordable Care Act (Obamacare); ICD-10-CM coding; electronic health records; Medicaid Integrity Contractors; and concepts related to case mix management, hospital-acquired conditions, present on admission, and value-based purchasing. Practice exercises in each chapter provide plenty of review to reinforce understanding. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Wireless Communications Fundamental & Advanced Concepts Aug 09 2020

Wireless communication is one of the fastest growing fields in the engineering world today. Rapid growth in the domain of wireless communication systems, services and application has drastically changed the way we live, work and communicate. Wireless communication offers a broad and

dynamic technological field, which has stimulated incredible excitements and technological advancements over last few decades. The expectations from wireless communication technology are increasing every day. This is placing enormous challenges to wireless system designers. Moreover, this has created an ever increasing demand for conceptually strong and well versed communication engineers who understand the wireless technology and its future possibilities. In recent years, significant progress in wireless communication system design has taken place, which will continue in future. Especially for last two decades, the research contributions in wireless communication system design have resulted in several new concepts and inventions at remarkable speed. A text book is indeed required to offer familiarity with such developments and underlying concepts, to be taught in the classroom to future engineers. This is one of the motivations for writing this book. Practically no book can be up to date in this field, due to the fast ongoing research and developments. The new developments are announced almost every day. Teaching directly from the research papers in the classroom cannot build the necessary foundation. Therefore need for a textbook is unavoidable, which is integral to learning, and is an essential source to build the concept. The prime goal of this book is to cooperate in the learning process. This book is based on current research as well as classical text books in the field, and aims to provide in depth understanding on fundamental concepts, which form the basis of wireless communication and build the platform, on which current developments can be understood and future contributions can be made. This book is written in self-explanatory manner to facilitate critical thinking and to support self study. Special emphasis has been given in this book to systematically organize and present the wide domain of wireless communication technology. Extra care has been taken to present the contents and the concepts in user friendly way to enable an easy understanding. Therefore the language of this book is made to make one feel, listening to a classroom lecture. This makes learning straight forward. Sometimes, the explanation could seem to be oversimplified, this is in order to support wide spectrum of readers as well as to clarify the hazy picture. A book of this kind, which addresses a fast developing technology, the frequent use of acronyms and abbreviations is almost inevitable. A care has been taken to spell the acronyms and abbreviations as frequently as practically suitable in the text. Besides, a list of acronyms and abbreviations has also been provided.

Intermediate Algebra: Connecting Concepts through Applications _____ Aug 21 2021
INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS shows students how to apply traditional mathematical skills in real-world contexts. The emphasis on skill building and applications engages students as they master concepts, problem solving, and communication skills. It modifies the rule of four, integrating algebraic techniques, graphing, the use of data in tables, and writing sentences to communicate solutions to application problems. The authors have developed several key ideas to make concepts real and vivid for students. First, the authors integrate applications, drawing on real-world data to show students why they need to know and how to apply math. The applications help students develop the skills needed to explain the meaning of answers in the context of the application. Second, they emphasize strong algebra skills. These skills

support the applications and enhance student comprehension. Third, the authors use an eyeball best-fit approach to modeling. Doing models by hand helps students focus on the characteristics of each function type. Fourth, the text underscores the importance of graphs and graphing. Students learn graphing by hand, while the graphing calculator is used to display real-life data problems. In short, INTERMEDIATE ALGEBRA: CONNECTING CONCEPTS THROUGH APPLICATIONS takes an application-driven approach to algebra, using appropriate calculator technology as students master algebraic concepts and skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Operating System Concepts Jul 20 2021 This is a revised edition of the eight years old popular book on operating System Concepts. In Addition to its previous contents, the book details about operating system foe handheld devices like mobile platforms. It also explains about upcoming operating systems with have interface in various Indian language. In addition to solved exercises of individual chapters, the revised version also presents a question bank of most frequently asked questions and their solutions. Value addition has been done in almost all the 14 chapters of the book.

Concepts in Federal Taxation 2018 Mar 04 2020 Master all aspects of federal taxation with the balanced conceptual approach found only in Murphy/Higgins' CONCEPTS IN FEDERAL TAXATION 2018. This unique book presents taxation as a small number of unifying concepts that readers apply to tax rules and everyday economics. This edition presents the latest tax laws and changes for the most recent tax year in a straightforward manner without overwhelming technical detail. To ensure clarity, the book introduces individual taxation before addressing more complex business entities. Small, manageable segments with Concept Checks are ideal for CPA Exam review. A strong balance of tax concepts with the Internal Revenue Code prepares readers for success on CPA Exam tax simulations and in their professional careers. Frequent examples relate tax concepts to business scenarios, while numerous hands-on exercises provide more practice than any other book of its kind. Count on this edition for an unmatched conceptual understanding of taxation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Choosing Normative Concepts Apr 16 2021 Theorists working on metaethics and the nature of normativity typically study goodness, rightness, what ought to be done, and so on. In their investigations they employ and consider our actual normative concepts. But the actual concepts of goodness, rightness, and what ought to be done are only some of the possible normative concepts there are. There are other possible concepts, ascribing different properties. Matti Eklund explores the consequences of this thought, for example for the debate over normative realism, and for the debate over what it is for concepts and properties to be normative. Conceptual engineering - the project of considering how our concepts can be replaced by better ones - has become a central topic in philosophy. Eklund applies this methodology to central normative concepts and discusses the special complications that arise in this case. For example, since talk of improvement is itself normative, how should we, in the context, understand talk of a concept being better?

Fundamental Nursing Skills and Concepts

Jan 14 2021 Now in its Ninth

Edition, this full-color text combines theoretical nursing concepts, step-by-step skills and procedures, and clinical applications to form the foundation of the LPN/LVN course of study. This edition features over 100 new photographs, exciting full-color ancillaries, end-of-unit exercises, and extensively updated chapters on nursing foundations, laws and ethics, recording and reporting, nutrition, fluid and chemical balance, safety, asepsis, infection control, and medication administration. Coverage includes new information on cost-related issues, emerging healthcare settings, concept mapping, malpractice, documentation and reporting, HIPAA, and more. All Gerontologic Considerations sections have been thoroughly updated by renowned experts.

Medical Informatics: Concepts, Methodologies, Tools, and Applications
02 2020 Provides a collection of medical IT research in topics such as clinical knowledge management, medical informatics, mobile health and service delivery, and gene expression.

Jan

Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications
Sep 29 2019 Beyond the undergraduate and graduate levels, education has traditionally ceased when students enter the workforce as professionals in their respective fields. However, recent trends in education have found that adult students beyond the traditional university age often benefit greatly from returning to further their education. Adult and Continuing Education: Concepts, Methodologies, Tools, and Applications investigates some of the most promising trends in furthering education and professional development in a variety of settings and industries. With an extensive array of chapters on topics ranging from non-traditional students to online and distance education for adult learners, this multi-volume reference book will provide students, educators, and industry professionals with the tools necessary to make the most of their return to the classroom.

Data Warehouses and OLAP: Concepts, Architectures and Solutions
"This book provides an insight into important research and technological problems, solutions, and development trends in the field of data warehousing and OLAP. It also serves as an up-to-date bibliography of published works for anyone interested in cutting-edge DW and OLAP issues"--Provided by publisher.

Jun 30 2022

Database System Concepts
Nov 11 2020 Database System Concepts by Silberschatz, Korth and Sudarshan is now in its 6th edition and is one of the cornerstone texts of database education. It presents the fundamental concepts of database management in an intuitive manner geared toward allowing students to begin working with databases as quickly as possible. The text is designed for a first course in databases at the junior/senior undergraduate level or the first year graduate level. It also contains additional material that can be used as supplements or as introductory material for an advanced course. Because the authors present concepts as intuitive descriptions, a familiarity with basic data structures, computer organization, and a high-level programming language are the only prerequisites. Important theoretical results are covered, but formal proofs are omitted. In place of proofs, figures and examples are used to suggest why a result is true.

Transforming E-Business Practices and Applications: Emerging Technologies and Concepts Jun 06 2020 Transforming E-Business Practices and Applications: Emerging Technologies and Concepts presents an integrated view of the latest issues and technologies evolving from business transactions and support.
