Qualitative Research in Management Mar 01 2020 This book is the first of its kind on qualitative research in management in the Indian context. It covers the philosophy and practice of qualitative research, and presents the journeys of 10 management scholars who describe their experiences of doing qualitative research while explaining their choice of varied methods. Both aspiring and experienced management researchers will find it an invaluable resource.

From Neurons to Neighborhoods Jan 11 2021 *From Neurons to Neighborhoods: An Update: Workshop Summary* is based on the original study *From Neurons to Neighborhoods: Early Childhood Development*, which released in October of 2000. From the time of the original publication's release, much has occurred to cause a fundamental reexamination of the nation's response to the needs of young children and families, drawing upon a wealth of scientific knowledge that has emerged in recent decades. The study shaped policy agendas and intervention efforts at national, state, and local levels. It captured a gratifying level of attention in the United States and around the world and has helped to foster a highly dynamic and increasingly visible science of early childhood development. It contributed to a growing public understanding of the foundational importance of the early childhood years and has stimulated a global conversation about the unmet needs of millions of young children. Ten years later, the Board on Children, Youth, and Families of the National Academies of Sciences, Engineering, and Medicine released *From Neurons to Neighborhoods: The Science of Early Childhood Development*. This book is a companion to that report, providing a comprehensive update on the science of early childhood development. It is a must-read for anyone interested in the science of early childhood development. Youth, and Families of the Institute of Medicine (IOM) and the National Research Council (NRC) held a 2-day workshop in Washington, D.C., to review and commemorate a decade of advances related to the mission of the report. The workshop began with a series of highly interactive breakout sessions in which experts in early childhood development examined the four organizing themes of the original report and identified both measurable progress and remaining challenges. The second day of the workshop, speakers chosen for their diverse perspectives on early childhood research and policy issues discussed how to build on the accomplishments of the past decade and to launch the next era in early childhood science, policy, and practice. From *Neurons to Neighborhoods: An Update: Workshop Summary* emphasizes that there is a single, integrated science of early childhood development despite the extent to which it is carved up and divided among a diversity of professional disciplines, policy sectors, and service delivery systems. While much work still remains to be done to reach this goal, the 2010 workshop demonstrated both the promise of this integrated science and the rich diversity of contributions to that science.

Case-Based Reasoning Research and Development Oct 27 2019

This book constitutes the refereed proceedings of the 26th International Conference on Case-Based Reasoning Research and Development, ICCBR 2018, held in Stockholm, Sweden, in July 2018. The 39 full papers presented in this book were carefully reviewed and selected from 77 submissions. The theme of ICCBR-2017, "The Future of CBR", was highlighted by several activities. These papers, which are included in the proceedings, address many themes related to the theory and application of case-based reasoning and its future direction. Topics included multiple papers on textual CBR and a number of cognitive and human oriented papers as well as hybrid research between CBR

Closing the Feedback Loop Dec 30 2019 Enhanced transparency, accountability, and government or donor responsiveness to people needs are imperative to achieve better and more sustainable development results on the ground. The rapid spread of new technologies is transforming the daily lives of millions of poor people around the world and has the potential to be a real game changer for development. Improved accountability and responsiveness are critical for reaching the goals of eliminating extreme poverty and promoting shared prosperity with a focus on improving the well-being of the most vulnerable and marginalized groups in society. Within the broader political economy context, many questions remain unanswered about the role that new technologies can play to act as an accelerator for closing the accountability gap. Within this context, this report brings together new evidence from leading academics and practitioners on the effects of technology-enabled citizen engagement. The report aims to address the following four main questions: how do new technologies empower communities through participation, transparency, and accountability?; are technologies an accelerator for closing the accountability gap - the space between supply (governments, service providers) and demand (citizens, communities, civil society organizations) that must be bridged for open and collaborative governance?; under what conditions does this occur?; and what are the experiences and lessons learned from existing grassroots innovators and donor-supported citizen engagement and crowdsourcing programs, and how can these programs be replicated or scaled up?. The report presents a theoretical framework about the linkages between new technologies, participation, empowerment, and the improvement of poor people's human well-being based on Amartya Sen's capability approach. The book provides rich case studies about the different factors that influence whether or not information and communication technology (ICT)-enabled

engagement programs can improve the delivery and quality of public services to poor communities. The report analyzes in depth both the factors and process of using new technologies to enhance the delivery of primary health services to pregnant women in Karnataka, India, and of several community mapping and crowdsourcing programs in Guinea, Haiti, Kenya, Libya, Sudan, and other countries.

Research Handbook on Innovation Governance for Emerging Economies

Nov 08 2020 Although in recent years some emerging economies have improved their performance in terms of R&D investment, outputs and innovative capacity, these countries are still blighted by extreme poverty, inequality and social exclusion. Hence, emerging countries are exposed to conditions which differ quite substantially from the dominant OECD model of innovation policy for development and welfare. This Research Handbook contributes to the debate by looking at how innovation theory, policy and practice interact, and explains different types of configurations in countries that are characterized by two contrasting but mutually reinforcing features: systemic failure and resourcefulness. Focusing on innovation governance and public policies, it aims to understand related governance failures and to explore options for alternative, more efficient approaches.

half of the world combined. · Today, 60 per cent of the world's population lives on less than \$5 a day. · Though global real GDP has nearly tripled since 1980, 1.1 billion more people are now living in poverty. For decades we have been told a story: that development is working, that poverty is a natural phenomenon and will be eradicated through aid by 2030. But just because it is a comforting tale doesn't make it true. Poor countries are poor because they are integrated into the global economic system on unequal terms, and aid only helps to hide this. Drawing on pioneering research and years of first-hand experience, *The Divide* tracks the evolution of global inequality - from the expeditions of Christopher Columbus to the present day - offering revelatory answers to some of humanity's greatest problems. It is a provocative, urgent and ultimately uplifting account of how the world works, and how it can change for the better.

Handbook of Research on Faculty Development for Digital Teaching and Learning Jun 03 2020 Faculty development is currently practiced in a variety of approaches by individuals, committees, and centers of excellence. More research is needed to draw better benefit from these approaches in the impending digital world by taking advantage of digitally enabled teaching and learning. The *Handbook of Research on Faculty Development for Digital Teaching and Learning* offers holistic and multidisciplinary approaches to enhancing faculty effectiveness in teaching, boosting motivation, extending knowledge, expanding teaching behaviors, and disseminating skills in digital higher education settings. Featuring a broad range of topics such as faculty learning communities (FLCs), virtual learning environments, and professional development, this book is ideal for educators, educational technologists, curriculum developers, higher education staff, school administrators, principals, academicians, practitioners, and graduate students.

Science Oct 08 2020 "Human Development and Family Science (HDFS) is an interdisciplinary and applied field that draws from developmental science, family science, and other social sciences. Research Foundations of Human Development and Family Science is a textbook that provides an introduction to the diverse scientific research methods that form the foundation of scholarship and practice in HDFS. In Part I, Kathleen Dyer explores science. She distinguishes empirical scientific research from common sense and from knowledge gained from personal experience. This section also includes discussion of the strategies used by pseudoscience to exploit the well-deserved credence people have in science, providing relevant examples. Part II examines systematic empiricism through sampling and measurement. HDFS scholars use a very wide array of measurement tools, including self-report (interviews, questionnaires, and self-report tasks), observations (participant, naturalistic, and structured), objective tests, physiological measures, and several types of archival records. Part III introduces the use of study design to achieve falsifiability in scientific research, including an overview of various orientations to time used in research as well as four different study designs: qualitative, prevalence, correlational, and experimental designs. Finally, Part IV addresses public verifiability of science, including how scientific consensus is developed, the use of literature reviews to identify convergence of evidence, and how scientific literacy translates into evidence-based professional practice. Illustrated throughout with studies foundational to the discipline as examples of the strategies described in the text, Research Foundations for Human Development and Family Science is a comprehensive, accessible core textbook for undergraduate research methods classes in HDFS. It introduces the discipline of HDFS and challenges students to understand the limitations of common sense and the threat of pseudoscience for those work professionally with children and families"--

The Future of Pharmaceutical Product Development and Research

Jul 25 2019 The Future of Pharmaceutical Product Development and Research examines the latest developments in the pharmaceutical sciences, also highlighting key developments, research and future opportunities. Written by experts in the field, this volume in the Advances in Pharmaceutical Product Development and Research series deepens our understanding of the product development phase of drug discovery and drug development. Each chapter covers fundamental principles, advanced methodologies and technologies employed by pharmaceutical scientists, researchers and the pharmaceutical industry. The book focuses on excipients, radiopharmaceuticals, and how manufacturing should be conducted in an environment that follows Good Manufacturing Practice (GMP) guidelines. Researchers and students will find this book to be a comprehensive resource for those working in, and studying, pharmaceuticals, cosmetics, biotechnology, foods and related industries. Provides an overview of practical information for clinical trials Outlines how to ensure an environment that follows Good Manufacturing Practice (GMP) Examines recent developments and suggests future directions for drug production methods and techniques

Transforming the Workforce for Children Birth Through Age 8

Nov 01 2022 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and

learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Experiential Learning Jan 23 2022 Experiential learning is a powerful and proven approach to teaching and learning that is based on one incontrovertible reality: people learn best through experience. Now, in this extensively updated book, David A. Kolb offers a systematic and up-to-date statement of the theory of experiential learning and its modern applications to education, work, and adult development. *Experiential Learning, Second Edition* builds on the intellectual origins of experiential learning as defined by figures such as John Dewey, Kurt Lewin, Jean Piaget, and L.S. Vygotsky, while also reflecting three full decades of research and practice since the classic first edition. Kolb models the underlying structures of the learning process based on the latest insights in psychology, philosophy, and physiology. Building on his comprehensive structural model, he offers an exceptionally useful typology of individual learning styles and corresponding structures of knowledge in different academic disciplines and careers. Kolb also applies experiential learning to higher education and lifelong learning, especially with regard to adult education. This edition reviews recent applications and uses of experiential learning, updates Kolb's framework to address the current organizational and educational landscape, and features current examples of experiential learning both in the field and in the classroom. It will be an indispensable resource for everyone who wants to promote more effective learning: in higher education, training, organizational development, lifelong learning environments, and online.

Handbook of Research on Human Development in the Digital Age

Jun 15 2021 The rapid evolution of technology continuously changes the way people interact, work, and learn. By examining these advances, researchers can further optimize the various opportunities that technology provides. The *Handbook of Research on Human Development in the Digital Age* is a pivotal reference source presenting the latest scholarly research on this

impact of technology on the population through different theories and perspectives. Featuring extensive coverage on a broad range of topics such as cyberbullying, mobile technology, and social skills development, this publication is ideally designed for academicians, researchers, and practitioners seeking current research on new trends in technology that impact society.

From Individual to Community Jun 23 2019 From Individual to Community brings together a set of papers that provides critical commentaries on various facets of the ongoing process of development. The book addresses issues that concern developing countries--such as globalization, economic growth, rural transformation, gender equality, educational reforms and the Dalit movement--from a multidisciplinary perspective. Based on the theoretical framework of the normative principles, the book evaluates issues that are specifically relevant in the Indian context--rich versus poor, globalization versus sustainable development, and so on. Devoid of any ideological rigidity, this book is an unbiased exposition of the material as well as ideological positioning of globalization, development and change. This book also commemorates the birth centenary of Professor Malcolm Adiseshiah, former Deputy Director General of UNESCO and a Padma Bhushan awardee, who was also founder of Madras Institute of Development Studies.

Parenting Matters Feb 09 2021 Decades of research have demonstrated that the parent-child dyad and the environment of the family--"which includes all primary caregivers"--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for

their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Developmental Research Methods Nov 20 2021 Designed to prepare students to plan, implement, report on, and evaluate research on human development, the Fourth Edition of this classic textbook covers current and emerging issues in the field of developmental psychology research. this immensely practical book provides development workers with a more research-oriented point of view, so that they can avoid mistakes in the design of programmes. It will also help them to understand people's needs and respond accordingly' - The Asian Age `It is a beautiful and comprehensive compilation giving scores of instances that prove the essentiality if carrying out a survey of a particular locality for bringing about a change there' - Rafique Jalal, DAWN This book provides a comprehensive introduction and handbook for undertaking and managing research in development. It is designed to provide both a quick reference manual and an indispensable learning tool for all students, researchers and practitioners engaged in development work. The text is divided into two parts: Managing research for development, and Doing research for development. Together the two parts review the complete research process from outlining the essential role and purpose of research, highlighting specific issues to development research, to demonstrating how to evaluate and secure the best results from subsequent research projects. The book includes: an overview of different types of research in development work; practical steps to writing a brief and managing research; practical steps to evaluating and promoting research findings; step by step guides to getting started and choosing a research method; detailed guidelines to seven key research techniques; examples, exercises, summaries and checklists; and glossary and guides to additional resources and packages Drawing on considerable hands-on experience, Research for Development will be an essential companion and invaluable tool for anyone engaged in contemporary development research, development work and development studies.

It introduces and addresses the fundamental questions that everyone engaged with development must ask: " What is 'development' and why do we wish to study it? " How do the many theoretical, methodological and epistemological approaches relate to research and practical studies in development? " How are development research and practice linked? Accessibly written, with extensive use of case study material, this book is an essential primer for students of development studies who require a concise, penetrating overview of its foundations. It is also core reading for students and practitioners concerned with the design of studies in the course of policy analysis, sector reviews, or project formulation, management and evaluation.

Handbook of Early Childhood Development Research and Its Impact on Global Policy Jan 29 2020

Early childhood development research offers solutions to several of the world's social and economic problems - solutions that can break the cycle of intergenerational poverty, improve the health, education, and wellbeing of the global population, and yield high rates of return on investment in the formative years of life. And yet over one-third of children worldwide under five years of age still fail to achieve their full developmental potential due to malnutrition, poverty, disease, neglect, and lack of learning opportunities.

Handbook of Early Childhood Development Research and Its Impact on Global Policy calls for placing early childhood development at the top of the global policy agenda, enabling children to achieve their full developmental potential and to contribute to equitable economic and social progress worldwide. The volume presents evidence-based programs and policies for advancing the positive development of young children across the globe, focusing on developing countries. An international ensemble of scholars, policymakers, and practitioners present evidence from multiple disciplinary, sectorial, and analytical perspectives, emphasizing the importance of scientific findings in promoting child development and addressing programmatic challenges to quality, sustainability, measurement, finance, and capacity. Sponsored by the Society for Research in Child Development (SRCD), the premier international association of developmental scientists, and the United Nations Children's Fund (UNICEF), a leading organization for promoting children's wellbeing worldwide, this Handbook will be invaluable to policy advocates, program managers of national governments, international NGOs, and development agencies, as well as to scholars and students in the areas of child development and global policy.

and looks at its impact on the research process. The third section is concerned with the methodology used in the literature review. India Migration Report 2012 Jul 05 2020 This volume is a collection of articles dealing with various dimensions of the Global Financial Crisis and its economic and social impact in terms of governance, emigration, remittances, return migration and re-integration. The crisis, which had its origin in the United States in 2008, spread its economic effects on developed as well as developing countries. Some of these countries were able to recover in the short run while some are in the process of recovery, with continuous efforts by both national governments and international agencies. In this backdrop, is there any impact on the outflow of emigrants from the countries of origin and inflow of remittances to the countries of destination? The third volume in the annual series 'India Migration Report' answers the question through rigorous quantitative and qualitative analyses and fieldwork both in the Gulf region and South Asia, and concludes that both emigration and remittances are more resilient than expected. This report: contains findings based on an extensive survey conducted in Kerala; has additional evaluations based on other surveys and case studies conducted in different parts of India, Pakistan, Bangladesh, Nepal and Sri Lanka to reflect on the consequences of the global crisis on the countries of origin, as well as a quick assessment and site visits to the United Arab Emirates, Kuwait, Qatar and Malaysia; includes essays that examine the linkages between emigration and remittances based on international data from the World Bank, the International Labour Organization, the International Organization of Migration, the United Nations and other organizations that closely deal with international migration.
