Complex Problem Solving Sep 08 2020 This volume presents a state-of-the-science review of the most promising current European research -- and its historic roots of research -- on complex problem solving (CPS) in Europe. It is an attempt to close the knowledge gap among American scholars regarding the European approach to understanding CPS. Although most of the American researchers are well aware of the fact that CPS has been a very active research area in Europe for quite some time, they do not know any specifics about even the most important research. Part of the reason for this lack of knowledge is undoubtedly the fact that European researchers -- for the most part -- have been rather reluctant to publish their work in English-language journals. The book concentrates on European research because the basic approach European scholars have taken to studying CPS is very different from one taken by North American researchers. Traditionally, American scholars have been studying CPS in "natural" domains -- physics, reading, writing, and chess playing -- concentrating primarily on exploring novice-expert differences and the acquisition of a complex skill. European scholars, in contrast, have been primarily concerned with problem solving behavior in artificially generated, mostly computerized, complex systems. While the American approach has the advantage of high external validity, the European approach has the advantage of system variables that can be systematically manipulated to reveal the effects of system parameters on CPS behavior. The two approaches are thus best viewed as complementing each other. This volume contains contributions from four European countries -- Sweden, Switzerland, Great Britain, and Germany. As such, it accurately represents the bulk of empirical research on CPS which has been conducted in Europe. An international cooperation started two years ago with the goal of bringing the European research on complex problem solving to the awareness of American scholars. A direct result of that effort, the contributions to this book are both informative and comprehensive.

Life-span Human Development Jun 05 2020 By combining the best of topical and chronological approaches, this text presents life-span development as a motion picture rather than as a series of individual snapshots.

Human Development Nov 03 2022 The 11th edition of this classic best-seller retains the extensive and integrated cross-cultural and multicultural coverage, the proven Guidepost-Checkpoint learning system, and the balance between research and real-life applications that have made this text a long time favorite of students and faculty. In the warmly-written and engaging style that is their hallmark, Papalia, Olds, and Feldman once again paint an engaging chronological portrayal of development through the lifespan. This new edition features enhanced treatment of brain development and evolutionary psychology research as well as new Research in Action features highlighting interesting and timely topics.

Family Violence Jun 17 2021 Family violence is a major public health concern that often goes undiagnosed and untreated. *Family Violence: What Health Care Providers Need to Know* provides the tools and information that healthcare providers need to identify victims, communicate with victims and perpetrators, and take action. Comprehensive yet concise, it provides an indepth overview of the three major forms of family violence---child abuse, domestic violence, and elder abuse---including incidence, clinical management, and prevention strategies. An important resource for students, health professionals, social workers, and public health professionals, *Family Violence* addresses etiology, societal impact, and legal and public health policy considerations. It is an ideal text for undergraduate and graduate courses, continuing medical education courses, conferences, and seminars that deal with interpersonal violence.

Principles of Neuropsychology Nov 10 2020 Focusing on applied and clinical examples, the Second Edition of PRINCIPLES OF NEUROPSYCHOLOGY is an exciting and dynamic approach to neuropsychology that should inspire both students and teachers. This progressive and accessible text teaches brain function in a clear and interesting manner by providing the most recent studies and research available in this ever-developing field. Applying the underlying thesis that all interactions in daily life, whether adaptive or maladaptive, can be explained neuropsychologically, the authors emphasize five specific ideas: human neuropsychology-both experimental and clinical, integration of theory and research, coverage of the relationship between neuroscience and behavioral function, real-life examples, and the presentation of didactic aids. Integrating these themes with the most up-to-date research provides all readers-whether or not they have had previous exposure to the field-with the most current and accessible text available.

Wheelock's Latin 7th Edition Oct 29 2019 For nearly sixty years, Wheelock's Latin has remained the optimus liber of beginning Latin textbooks. When Professor Frederic M. Wheelock's Latin first appeared in 1956, the reviews extolled its thoroughness, organization, and conciseness; one reviewer predicted that the book "might well become the standard text" for introducing students to elementary Latin. Now, nearly six decades later, that prediction has certainly proved accurate. This new edition of Wheelock's Latin has all of the features, many of them improved and expanded, that have made it the bestselling single-volume beginning Latin textbook: 40 chapters with grammatical explanations and readings drawn from the works of Rome's major prose and verse writers; Self-tutorial exercises, each with an answer key, for independent study; An extensive English–Latin/Latin–English vocabulary section; A rich selection of original Latin readings—unlike other Latin textbooks, which contain primarily made-up texts; Etymological aids, maps, and dozens of images illustrating aspects of the classical culture and mythology presented in the chapter readings. Also included are expanded notes on the literary passages, comments on vocabulary, and translation tips; new comprehension and discussion questions; and new authentic classical Latin readings, including Roman graffiti, in every chapter.

Human Development Jul 31 2022 The new edition retains the extensive cross-cultural and multicultural coverage, the innovative pedagogical learning system, and the balance between research and real-life applications that have made this text a favorite of students and professors alike. In the warmly-written and engaging style that is their hallmark, Papalia, Olds, and Feldman continue to provide a chronological view of lifespan development. The tenth edition expands the coverage of cultural and historical influences on development, features the latest research, and introduces marginal callouts integrating the "LifeMap" Student CD-ROM with key concepts in the text.

The Couple and Family Technology Framework Aug 27 2019 Couples and families worldwide have a constant electronic connection to others, a fact that is influencing the concerns and issues they bring to therapy. The authors of this resource help mental health practitioners to better deal with concerns such as online infidelity, online dating, internet addictions, cyber bullying, and many more by introducing the Couple and Family Technology (CFT) framework, a multi-theoretical approach that doesn’t require clinicians to change their preferred clinical approach. The CFT framework acknowledges the ways in which couples navigate their relationship with technology and a partner simultaneously, and it attends to, and in some cases incorporates the role of technology in therapeutic ways. Included in the authors’ discussion of how different technologies affect relationships is • a survey of what individuals’ motivations of usage are • an examination of the specific issues that emerge in treatment • a study of the risks particularly relevant to intimate relationships, and • an introduction of the first-ever technology-based genogram. They also examine technological usage across different developmental points in a couple’s lifespan, with attention given throughout to people from various cultural backgrounds. Along with the CFT framework, the authors also introduce a new discipline of family research: Couple and Family Technology. This discipline integrates three broad perspectives in family science and helps therapists maintain a systemic focus in assessing and treating couples where issues of the Internet and new media are problematic. Online resources can be accessed by purchasers of the book and include videos, additional case studies, glossary, and forms.

Interventions for Improving Adaptive Behaviors in Children With Autism Spectrum Disorders Jul 07 2020 Millions of children have been diagnosed with autism or fall somewhere within the autism spectrum. Early intervention, education, and training programs have been found to support these students immensely, leading to a higher level of independent social life than has previously been seen. Anxiety, bullying, communication, and learning abstract concepts can be a great challenge for autistic children and can also provide an obstacle for social interaction with other children. It is important to continue offering these students access to a broad, enriched, and balanced curriculum while also devising new approaches and alternative systems of communication that will help to facilitate their access to the educational process and foster adaptive behaviors. *Interventions for Improving Adaptive Behaviors in Children With Autism Spectrum Disorders* offers a current overview of modern practices regarding the teaching of autistic children. This book seeks to update the current practices for professionals working with autistic children, offer practical information regarding interventions, and provide tools for managing autistic children in critical situations. Covering topics such as autism diagnostic observation schedule, inclusivity in schools, and vocational training for autistic people, this text is essential for teachers, special education teachers, administrators, speech therapists, academicians, researchers, students, and professionals and practitioners involved in the upbringing, education, social, and vocational inclusion of people with ASD.
