[Pub2Pub](#) Sep 28 2019 There's popping out for a quick pint, and then there's this - a gloriously preposterous 27,000 mile journey across 25 countries to grab a beer in pubs (bars) at opposite ends of the world. We're talking an epic adventure, from an abandoned Soviet mine 700 miles from the North Pole, to a remote pub at South America's southernmost tip. A journey undertaken in a TVR sports car, a car that many might consider untrustworthy just to drive to the shops. The journey packed a lot into its eight months. From braving the sheer drops of Bolivia's Death Road, to drag racing the locals in Texas. From roaring across flooded salt flats, to sailing the straits of Magellan. From the highs of the planet's best driving roads, to the lows of life in No-Man's-

Land, trapped between borders by red tape and bureaucracy. And from looking out for Polar Bears in the High Arctic, to dodging penguins in Tierra del Fuego. The story of the Pub2Pub Expedition is an inspirational account of where your dreams can take you if only you believe in them. Chronicling the epic journey made by Ben Coombs in his TVR Chimaera, this book is both an exciting adventure and a fascinating snapshot of the life and culture of the countries that he drove through. **Business Korea** Oct 10 2020 **Tech Trends in Practice** Jul 27 2019 ***BUSINESS BOOK AWARDS - FINALIST 2021*** Discover how 25 powerful technology trends are transforming 21st century businesses How will the latest technologies transform your business? Future Tech Trends in Practice will give you the

knowledge of today's most important technology trends, and how to take full advantage of them to grow your business. The book presents 25 real-world technology trends along with their potential contributions to organisational success. You'll learn how to integrate existing advancements and plan for those that are on the way. In this book, best-selling author, strategic business advisor, and respected futurist Bernard Marr explains the role of technology in providing innovative businesses solutions for companies of varying sizes and across different industries. He covers wide-ranging trends and provides an overview of how companies are using these new and emerging technologies in practice. You, too, can prepare your company for the potential and power of trending technology by examining these and other areas of innovation

described in Future Tech Trends in Practice: Artificial intelligence, including machine and deep learning The Internet of Things and the rise of smart devices Self-driving cars and autonomous drones 3D printing and additive manufacturing Blockchain technology Genomics and gene editing Augmented, virtual and mixed reality When you understand the technology trends that are driving success, now and into the future, you'll be better positioned to address and solve problems within your organisation.

Ontologies for Agents: Theory and Experiences Feb 23 2022 The volume aims at providing a comprehensive review of the diverse efforts covering the gap existing between the two main perspectives on the topic of ontologies for multi-agent systems, namely: How ontologies should be modelled and represented in order to be effectively used in agent systems, and on the other hand, what kind of capabilities should be exhibited by an agent in order to make use of ontological knowledge and to perform efficient reasoning with it. The volume collects the most significant papers of the AAMAS 2002 and AAMAS 2003 workshop on ontologies for agent systems, and the EKAW 2002 workshop on ontologies for multi-agent systems.

Enriching Production Oct 29 2019 This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in

Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.

Neo-Industrial Organising

Aug 27 2019 Neo-Industrial Organising explores an emerging area of importance in management and organisation studies, namely the trend towards a projectization of the economy as a whole and the inter- and intra-organisational relations of renewal projects. By reporting on the experiences of twenty-five renewal projects from a wide variety of both local and international organisations, the authors develop a theoretical framework based on action and knowledge, in order to answer such key questions as: What is neo-industrial management? What does the future hold for organisations? How will institutions be formed? What effects will neo-industrial organising have on the individual and his/her work situation? Topics covered include: * industrial renewal, organisation and management * project management and temporary organisation * personnel recruitment, selection and training * societal infrastructure Distinctive, relevant and accessibly written, this book will interest

[The Automotive Industry and the Environment](#) Jun 05 2020

Building on a wealth of research, this book addresses current challenges in the automotive industry and how they can be met. The authors discuss the development of the automotive industry and the problems it currently faces and consider possible solutions. They review trends in more environmental-friendly technologies, such as the use of more sustainable fuel sources and new types of modular designs with built-in recyclability. Chapters also describe new models of decentralized production, particularly the micro factory retailing (MFR) model, that provide an alternative to volume production and promise to be both more sustainable and more profitable.
