Managers Not MBAs Dec 30 2019
In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. "The MBA trains the wrong people in the wrong ways with the wrong consequences," Mintzberg writes. "Using the classroom to help develop people already practicing management is a

pretending to create managers out of people who have never managed is a sham." Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management.

2021 MBAs are old news. In this ground-breaking book, leadership expert Alicia McKay teaches leaders to focus on the things they don't teach you at business school. Leaders are made, not born. But they are not made in the lecture halls and seminar rooms; you don't need an MBA to be an effective leader. They need to get smart, be strategic about the next step and expand their range, to face a complex and uncertain future. They need paradox: clear values and open minds, high performance and meaningful space, dedication to detail and big picture perspective. They

different questions, design different options and most of all, they need to do that with others on the same journey. In this thought-provoking book, Alicia McKay teaches you the five skills every strategic leader needs: * How to develop true flexibility * How to make good decisions * How to develop powerful systems * How to drive real performance * How to have meaningful influence Drawing on the latest global thinking on leadership, You Don't Need an MBA uses Plain English to demystify the skills leaders of the future need and outlines a way forward; united leadership that

focuses on real outcomes, not quick-fixes.

Clinicians increasingly need a firm grasp of the fundamental principles of business management, finance and related subjects. Even so, business disciplines are still rarely taught during medical training, while busy practices and complicated accounting tasks

mean that gaining business acumen 'on the job' is impractical for many. As a result, increasing numbers of clinicians learn the skills they need by taking an MBA (Masters in Business Administration). While an MBA may be the answer for some, the formidable costs and time commitment it demands leave many busy practitioners seeking more accessible options. This book provides a readable, tightly organised alternative - a primer on MBA principles and their practical application. Twelve compact, carefully structured modules

gamut of a business education, from basic finance and accounting principles, to strategic management methods and leadership theories. Unlike some similar texts, this book is designed to be light in tone, easy to read and digest, and thoroughly practical. Busy clinicians, academic surgeons, administrative physicians and other healthcare professionals will find this an invaluable resource in understanding the core principles of business management. Allied medical professionals, and nurses will also find it useful, as will interview candidates who

increasingly face management questions as part of selection processes. 'An invaluable resource in understanding the core principles of business management, and in learning how to apply them. The Directory of MBAs Jul 29 2022 DSM-5® Handbook on the Cultural Formulation Interview Nov 20 2021 DSM-5® Handbook of the Cultural Formulation Interview provides the background, context, and detailed guidance necessary to train clinicians in the use of the Cultural Formulation Interview (CFI), which was created as part of the 2007-2013 DSM revision process. The purpose of the CFI -- and this unique handbook -- is to make it easier for providers to

account for the influence of culture in their clinical work to enhance patient-clinician communication and improve outcomes. Cultural psychiatry as a field has evolved enormously from the days when it was principally concerned with epidemiological and clinical studies of disease prevalence; it now examines a multitude of issues, primary among them the differing patient, family, and practitioner models of illness and treatment experiences within and across cultures. The editors, all of whom have been intimately involved in the evolution of the field, have designed the book and accompanying videos for maximum

instructional and clinical utility. The Handbook boasts many strengths and useful features, including: A detailed description of each of the three CFI components: a core 16-item questionnaire, which can be applied in any clinical setting with any patient by any mental health clinician; an informant version of the core CFI used to obtain information from caregivers; and 12 supplementary modules that expand on these basic assessments. This material facilitates implementation of the CFI by clinicians. Over a dozen clinical vignettes are included to

illustrate use of the three components, and the Handbook also includes multiple videos that demonstrate the application of portions of the core CFI, and several supplementary modules. Strategies for incorporating the CFI into clinical training are identified and discussed, furthering the objective of developing culturally-sensitive and astute practitioners. The theoretical bases of the CFI are explored, raising questions for discussion and identifying areas for further research. The CFI is a valuable tool for all patients, not just those judged to be
