A Manual for Planning and Implementing the Living Standards Measurement Study Survey Jul 31 2022 This manual explains the planning process, technical procedures, and standards used in Living Standard Measurement Study (LSMS) household surveys, including what these procedures entail, why they are used, and how they can be implemented. It provides a factual description of different procedures and standards as well as their purpose and an explanation of their distinctions. The report offers explicit instructions, along with examples of ways LSMS survey procedures have been implemented in different countries. Although the lessons presented here are derived from LSMS surveys, many of them are applicable to surveys in general, and especially to those that are complex or especially concerned

with quality control. Topics covered in this manual include technical aspects of questionnaire formatting and testing, methods of implementing sample design, and fieldwork and data management procedures that have been successful. The report sketches ideas about which directions to pursue in analyzing data, presents a brief description of how to assess local statistical capacity, and includes sample work plans and budgets to give surveyors estimates of how long each process will take.

Harnessing value-added benefits as a customer retention strategy in a selected company within the financial services industry in KwaZulu-Natal Feb 23 2022 Thesis (M.A.) from the year 2017 in the subject Business economics - General, grade: -, , course: Masters of Business Administration, language: English, abstract: Customer retention has become a multifaceted and serious consideration for businesses. With the rapid advancement of technology, a growing competitive climate, and the ever-increasing platforms and channels available for customers to purchase services and products, the importance of servicing and engaging with current customers is becoming increasingly evident from a business profitability and sustainability perspective. While after-sale value-added benefits offered to customers through upselling initiatives are believed to be necessary to increase customer retention, further understanding of the type of value-added benefit offered and the timing in which it is offered following the core product sale, is required to determine the extent of the impact it has on customer retention. It is therefore incumbent on companies to develop a robust customer retention strategy that integrates value-added benefits to upscale customer retention and prevent customer churn. The researcher explored the effectiveness of value-added benefits offered via upselling as a strategy to reduce customer churn within a selected authorised financial services provider based in KwaZulu-Natal, South Africa. A descriptive research design was followed. The researcher conducted a thorough literature review aligned to value-added benefits as an innovative strategy to retain customers. Data was collected through a combination of tools, case studies, open-ended semi-structured employee interviews and open-ended employee questionnaire surveys, to explore a facet of customer churn where limited theory is available, and to describe the extent to which the offering of a value-added benefit to a current customer affects customer retention. From the research conducted, the researcher concluded that customers who had taken up a value-added benefit were more likely to stay with their service provider, compared to customers who did not have a value-added benefit. Churn rate percentages for customers with core product-aligned value-added benefits were lower than the customers with core product non-aligned value-added benefits, and customers who had taken up a value-added benefit, before their first debit order was collected by their service provider, were less likely to churn than customers who took up the same value-added benefit after their first debit order was collected by their service provider.

Impact Evaluation in Practice, Second Edition Mar 03 2020 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and

implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Feasibility Study - Marketing, Financial and Operational Analysis Jun 17 2021 This book is conducted to meet the purpose of studying the possibility of establishing a private university from global context. In order to make sure that a private university can survive and produce the desired outcomes, feasibility study must be conducted as it is a way to analyze data, information, situation, objectives and calculate system performance. This study focuses on three main considerations - marketing research, financial analysis and operational analysis. A research was conducted with well-designed survey questionnaire, as research tool with 132 respondents as sampling population, focused on their personal judgments in respect of higher education from Global context. All data from questionnaires have been analyzed by SPSS. Another main consideration is the financial analysis by the calculation of a university system performance, according to Churchman's formula; the system performance was efficient, which would help in decision making to invest or establish a private university. This book emphasized the world wide situation of private higher education, role of private higher education and accreditation process in USA, Europe, Asia as well as Bangladesh

Rental and Vacant Property Questionnaire, Residential Financial Survey, 21st Decennial Census-1990, Form F-2901 Nov 03 2022

The Serviceability of Financial Information Mar 27 2022 From the Preface: This monograph reports the outcome of a mail-questionnaire survey of the ways in which certain kinds of financial information are associated with problem situations. Accounting reports are part of the financial information used by managers, investors and creditors of business firms, and are widely held to be serviceable in decision-making. The products of the traditional model of accounting, however, have not been put to such specific tests as would indicate in what ways they are serviceable, nor have the products of the newer alternatives. The objective of our inquiry is to put some of the presumptions of the traditional, and two alternative styles of accounting under limited and specific tests.

Quality Control Procedure for Statutory Financial Audit Sep 01 2022 This new work takes a comprehensive look at the quality control framework for

statutory financial audit. Saha and Roy focus on identifying the different factors governing quality of audit and establish a comprehensive framework for quality control.

Understanding Financial Risk Tolerance Jul 27 2019 This book revolves around the concept of financial risk tolerance and its role in financial markets. Bridging different literatures and reviewing in detail the impact of European regulation on the evolution of risk tolerance assessment, this book discusses the intersection of scholarly research, practitioner experience and current and likely normative developments. In particular, the book focuses on the evolution of the debate on the suitability questionnaire - a key tool introduced with the Markets in Financial Instruments Directive (MiFID) and further developed with MiFID's successor - comparing it with empirical evidence on financial risk tolerance determinants, spanning from sociodemographic to behavioral components and life events. The book also looks at the future evolution of the normative framework post MiFID2 addressing in detail two key trends that are already affecting the way in which risk tolerance is dealt with in European financial markets - sustainable development and fintech and roboadvisory. The book includes an original survey run with financial market experts to assess the perceptions regarding these two trends and includes commentaries by a professional financial advisor on the key topics discussed.

Understanding the Investor Jan 25 2022 In finance, understanding investors and their motivations is key for any business and policy-maker.

Understanding the Investor: A Maltese Study of Risk and Behavior in Financial Investment Decisions offers a nuanced view of the Maltese investor and the Malta Stock Exchange, and its implications on the wider financial world.

The Financial Impacts of Corporate Social Responsibility Mar 15 2021 Corporate Social Responsibility (CSR) is probably one of the most current and evolving issues within the business world today. There is extensive research in to the financial impacts that CSR has upon a business, yet the outcome remains inconclusive due to contradicting findings. This Independent Learning Project presents many of these contentious financial impacts through a literature review. The primary research then focuses on attempts to contribute to current research by questioning employees at a company with a high level of environmental CSR, to discover if it is a determining factor in terms of their recruitment. An online questionnaire has been used to gain information from 66 respondents regarding their opinions and experiences upon environmental aspects when seeking a new job. The research concludes that employees deem environmental aspects of a business to be relevant when applying for a role, yet the majority do not actively seek to find information regarding it, thus overstating its importance through their opinions. Furthermore, the research indicates that utilitarian aspects are rated of higher importance. This may be a result of difficult financial times.

Improving Financial Education Efficiency OECD-Bank of Italy Symposium on Financial Literacy Jun 29 2022 This symposium proceedings examines three

aspects of financial education: monitoring and evaluation, use of behavioral economics, and financial literacy and defined contribution pension plans.

The Relationship between Financial Capability and Student Entrepreneurship at Scottish Universities May 17 2021 Bachelor Thesis from the year 2016 in the subject Business economics - Company formation, Business Plans, grade: A, University of Stirling, language: English, abstract: This study aimed to analyse the relationship between financial capability and student entrepreneurship at Scottish universities. Three research questions were considered based on the gaps and disagreements highlighted in the literature review. First: 'What is the level of financial capability of student entrepreneurs at Scottish universities and how does it differ from that of other students?' Second: 'What factors contribute to the financial capability development of student entrepreneurs?' and third: 'What are the relationships between specific components of financial capability and entrepreneurial attitudes and intentions?' Using a mixed method design to data collection, the study incorporated an online questionnaire and face-to-face interviews. Data were collected from 107 students and 30 student entrepreneurs. The questionnaire findings showed that student entrepreneurs exhibited higher levels of financial capability, were more willing to take risks and also viewed entrepreneurship as less risky, when compared to other students. The data also suggested the need for improving students' financial capability, especially regarding investments. Furthermore, the research established a remarkable relationship between financial capability and entrepreneurial attitudes and intentions. Interview data indicated that the development of financial capability is a complex process, but it is mainly shaped by parental influence, followed by internal triggers, experience concerning work and business and independent living. By establishing the need for improved levels of financial capability and the relationships between entrepreneurship and financial capability, this study recommends that both financial capability and entrepreneurship development programmes and policies should be encouraged to target students and student entrepreneurs with the groups' specific requirements in mind.

Survey Research in Corporate Finance Dec 12 2020 Corporate finance is a multifaceted discipline in which everything works in theory but not necessarily in practice. To bridge this gap, intelligently designed and executed surveys are essential in empirically validating conceptual hypotheses and the relative usefulness of various theories. Survey Research in Corporate Finance is a unique summary of state-of-the-art survey research in finance. Baker, Singleton, and Veit catalog and discuss the most important contributions to the field and provide a longitudinal perspective

unavailable anywhere else. They offer an objective look at the role survey research in finance should play and illustrate the general and particular aspects of the form this research should take, how it is typically carried out, and how it should ideally be carried out, taking into account considerations developed throughout the book. The book provides financial researchers with a useful overview of survey methodology, synthesizes the major streams or clusters of survey research in corporate finance, and offers a valuable resource and guide for those interested in conducting and reading survey research in finance. Because a variety of views exist on the role of survey research in corporate finance, the authors present key findings from the varying perspectives of finance academics, finance journal editors, and finance practitioners. Synthesizing survey results on major issues in finance and offering knowledge learned from years of communications between academics and practitioners, *Survey Research in Corporate Finance* enables students and scholars of finance, as well as decision makers in many different kinds of firms, to actually determine how the theories on which their work is based actually play out in practice. This book is an essential, one-of-a-kind reference for any practitioners or academics interested in survey research in corporate finance.

Consumer Protection in Financial Services Oct 29 2019 The question of how financial services should be regulated in the interests of consumers has never been more topical. The structure of the financial services industry is changing rapidly and the need for the law to keep pace with these changes has never been greater. This book examines the role of the law in the protection of the consumer, in particular the ways in which the law is, and could be, used to protect consumers when purchasing financial services. A prominent panel of contributors first examines the role of the European Union and the ombudsmen schemes operating in the United Kingdom in improving consumer protection. Eight expert papers present a detailed analysis of aspects of the various legal mechanisms protecting consumers in the banking, financial services, investments and insurance industries. The final part of the book is concerned with the important and controversial area of consumer credit. This unique work is a welcome contribution to a rapidly developing area of law, which has so far received little attention from commentators. It will be of great interest to those at the cutting edge of banking, financial services and consumer law, whether practicing lawyers or in-house counsel, and all those involved in advising consumers.

Loan Disbursement Handbook Apr 15 2021 This handbook is a compilation of the disbursement policies, guidelines, procedures, and practices of the Asian Development Bank (ADB).

Survey Research in Corporate Finance Nov 22 2021 As there is no current book that deals extensively or exclusively with survey research in corporate finance *Survey Research in Corporate Finance* is the only one of its kind. For even while there are numerous books on survey methodology, none focus on this methodology as specifically applied to corporate finance. In the book, Baker, Singleton, and Velt do nothing less than provide an overview of survey methodology useful to financial researchers, synthesize the major streams or clusters of survey research in corporate finance, and offer a

valuable resource and guide for those interested in conducting survey research in finance. Thus this volume will be an essential reference for practitioners, academics, and graduate students—who all must know the methodology of finance survey research. In addition to methodology, the book identifies areas that will be best served by survey-based research. Researchers will have a wealth of information regarding past surveys and will be aware of suitable candidates for future surveys. Several chapters are devoted to synthesizing survey results on major issues in finance. These will help decision makers in finance and in non-finance firms to acquire knowledge learned from years of communications between academics and practitioners.

Institutional Needs in Higher Education and Corporation Practices in Aid Sep 20 2021

The Global Findex Database 2017 Oct 02 2022 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

Introduction to Project Finance in Renewable Energy Infrastructure Jan 31 2020 What is project finance? What makes project or structured finance so relevant for large renewable energy infrastructure? Which vocabulary do I need to know in order to speak the same language during meetings with lawyers, investors, bankers and engineers? These questions and many more are answered throughout this book, offering real world examples to bridge the

gap between theory and practice. The book details the role of each stakeholder in the development of renewable energy projects, the interconnection between all the agreements, the financial process from fundraising to financial close, the processes of due diligence, risk analysis, project investment valuation and much more. It also provides with an introduction to Portfolio Management using renewable energy assets and an explanation of the role of Climate Finance in green energy investments. The commented glossary enables readers to unpick the jargon used in project finance for renewable energy, and the numerous creative figures and comprehensive tables aid with understanding. Offering a complete picture of the discipline, *Introduction to Project Finance in Renewable Energy Infrastructure* will be of value to professionals, engineers and academics alike interested in understanding the process and components of project finance in renewable energy infrastructures, in both private and public-private contexts.

Roles of Financial Institutions and Credit Guarantees in Regional Revitalization in Japan Dec 24 2021 This book is about the roles that financial institutions are expected to play for revitalizing regional economies in Japan, which face several serious problems such as a rapidly aging population as well as a sharp decline in population. The Japanese government expects regional financial institutions to contribute to that revitalization. Actually, Japanese regional financial institutions have made various efforts to support small and medium-sized enterprises (SMEs) to increase their profitability and sustainability. However, the efforts have not yet produced adequate outcomes. To help clarify the reasons for the failures and to offer policy recommendations, the authors used four questionnaires to conduct surveys. They sent the questionnaires to the headquarters of regional financial institutions for Chapter 1 and to the staffs of regional financial institutions for Chapter 2. The government revised the Credit Guarantee System Reform Act in 2017 to promote financial institutions and credit guarantee corporations in order to proactively support SMEs, so in Chapter 3 the aims of the revised act are explained. Chapter 4 is based on a survey of startups that used the public credit guarantee. Finally, Chapter 5 is based on another, different questionnaire that was sent to SMEs to find out why they failed to improve their risk management and how financial institutions can help them to prepare for disasters. To the best of the authors' knowledge, these questionnaire studies on regional revitalization have not been carried out elsewhere, making this book unique.

Forecasting Transportation Revenue Sources Jun 25 2019 "TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 479: Forecasting Transportation Revenue Sources: Survey of State Practices documents current and proposed forecasting methodologies, as well as shortcomings of methods as reported by state departments of transportation (DOTs). The report also includes information about the types of revenue being forecasted, and how satisfied DOTs have been by the accuracy of their projections." -- Publisher's description.
