events have raised pressing questions of psychology as it is practiced all over the globe. The Handbook of International Psychology chronicles the discipline of psychology as it evolves in different regions, in the hope of reducing the isolated, parochial, and ethnocentric nature of the American profession. It surveys the history, methodology, education and training, and the future of psychology in nine distinct regions across six continents. They represent long histories in the field, such as the United States and the United Kingdom, emerging practices, such as Uganda, Korea and Spain, the lesser-known philosophies of China and histories marked by massive social change, as in Poland and Iran. in Falls Church. Since there were no national or state guidelines for this type of installation, the district was asked to install APS at an intersection in a pilot effort and to develop appropriate guidelines that VDOT could use statewide for future installations. The Virginia Transportation Research Council was asked to assist in developing the guidelines. Further, a committee composed of representatives from VDOT, the Federal Highway Administration, the Virginia Department for the Blind and Visually Impaired, and the blind and visually impaired community (formal organizations and individual citizen activists) was established to provide overall guidance and advice. A Phase I report documented the initial efforts to develop the guidelines and described the following sections of the guidelines: (1) a procedure for requesting APS, (2) the basic requirements for retrofitting, (3) an intersection evaluation methodology, and (4) **Access Free

process. In addition, the report recommended that the procedures in these four sections be piloted by using them to identify other appropriate intersections at which different types of APS equipment could be installed. This Phase II report describes the results of the pilot with regard to the first four sections of the guidelines and the development of the final two sections of the guidelines: the basic statewide specifications for APS equipment, and the installation procedures. The final guidelines for installing APS at an existing intersection are included in an appendix.

reforms and schooling globally. Various book chapters critique the dominant discourses and debates pertaining to comparative education discourses and the newly constructed and re-invented models of neo-liberal ideology in education. Using a number of diverse paradigms in comparative education research, ranging from critical theory to globalisation, the authors, by focusing on globalisation, ideology and democracy, attempt to examine critically both the reasons and outcomes of education reforms, policy change and transformation and provide a more informed critique on the Western-driven models of

accountability, quality and school effectiveness. The book draws upon recent studies in the areas of equity, cultural capital and dominant ideologies in education.
