[The Many Faces of Corruption](#) Sep 28 2019 Corruption... How can policymakers and practitioners better comprehend the many forms and shapes that this socialpandemic takes? From the delivery of essential drugs, the reduction in teacher absenteeism, the containment of illegal logging, the construction of roads, the provision of water andelectricity, the international trade in oil and gas, the conduct of public budgeting and procurement, and the management of public revenues, corruption shows its many faces. 'The Many Faces of Corruption' attempts to bring greater clarity to the often murky manifestations of this virulent and debilitating social disease. It explores the use of prototype road maps to identify corruption vulnerabilities, suggests corresponding 'warning signals,' and proposes operationally useful remedial measures in each of several selected sectors and for a selected sampleof cross cutting public sector functions that are particularlyprone to corruption and that are critical to sector performance.Numerous technical experts have come together in this effort to develop an operationally useful approach to diagnosing and tackling corruption. 'The Many Faces of Corruption' is an invaluable reference for policymakers, practitioners, andresearchers engaged in the business of development.

[Markets in Vice, Markets in Virtue](#) Aug 27 2019 This sweeping, comparative study of taxation in the United States and Australia shows that even as governments in the Western world have become increasingly sophisticated tax collectors, a competitive and ruthless market in advice on tax avoidance has developed. The same competitive forces in the late twentieth century which have driven down prices and sparked efficiencies in the production of fast food or computer parts have helped stimulate the markets for bads like tax shelters and problem gambling. Braithwaite draws the surprising conclusion that effective regulation could actually flip markets in vice to markets of virtue. Essential reading for anyone involved in policy, governance, and regulation, Markets in Vice, Markets in Virtue provides a blueprint for restoring the equity of Western tax systems and a breakthrough theory of how regulators can support markets in virtue and curtail markets in vice.

[Cambridge IGCSE Economics Student's Book](#) Jun 29 2022 Endorsed by Cambridge International Examinations, the books cover the Cambridge syllabus (0455).

[Canada Without Armed Forces?](#) Jan 31 2020 What Douglas Bland and his colleagues have done is to look at the future Canadian Forces. Countless studies have pointed to the equipment and personnel shortfalls of the present armed forces, but by careful extrapolation, Bland looks at what is coming down the road. It's not a pretty picture. He argues that the Canadian Forces is already all but incapable of defending Canada or co-operating with the United States in the defence of North America. In five or ten years, when the equipment has finally rusted out completely and the personnel are not there, what then? Bland urges that a defence review get under way at once, but not a review with the usual broad, sweeping mandate to examine the whole world and produce general and generic compromise policy suggestions.

[Memory Systems](#) Sep 20 2021 Is your memory hierarchy stopping your microprocessor from performing at the high level it should be? Memory Systems: Cache, DRAM, Disk shows you how to resolve this problem. The book tells you everything you need to know about the logical design and operation, physical design and operation, performance characteristics and resulting design trade-offs, and the energy consumption of modern memory hierarchies. You learn how to tackle the challenging optimization problems that result from the side-effects that can appear at any point in the entire hierarchy. As a result you will be able to design and emulate the entire memory hierarchy. Understand all levels of the system hierarchy -Xcache, DRAM, and disk. Evaluate the system-level effects of all design choices. Model performance and energy consumption for each component in the memory hierarchy.

[Changing Properties of Property](#) Jul 19 2021 As an important contribution to debates on property theory and the role of law in creating, disputing, defining and refining property rights, this volume provides new theoretical material on property systems, as well as new empirically grounded case studies of the dynamics of property transformations. The property claimants discussed in these papers represent a diverse range of actors, including post-socialist states and their citizens, those receiving restitution for past property losses in Africa, Southeast Asia and in eastern Europe, collectives, corporate and individual actors. The volume thus provides a comprehensive anthropological analysis not only of property structures and ideologies, but also of property (and its politics) in action.

[OECD Papers](#) Sep 08 2020 A compilation of reports previously issued by the OECD.

[Turbulence and Complex Flow Phenomena in Multi-stage Axial Turbomachines](#) Dec 12 2020 The objective of this project is to measure the flow within axial turbomachines and use the data to address turbulence modeling issues. Measurements are performed in two-stage transparent machines located in an optically index matched facility, which allows unobstructed 2-D and Stereo PIV measurements. Data provide insight on blade-wake, wake- boundary layer and wake-wake interactions. This report examines and elucidates several phenomena: i. Variations in turbulence within a wake generated by an upstream IGV blade while being ingested by a rotor passage; ii. Non-uniform turbulence production and diffusion leading to formation of turbulent hot spots within a rotor wake due to flow non-uniformities generated by upstream wakes; iii. Unsteady flow caused by an upstream wake stabilizes the boundary layer on a rotor blade and reduces its momentum thickness; iv. Comparisons of data covering an entire stage to RANS predictions; and V. Measurements of subgrid-scale stresses and dissipation rate, and comparisons to model predictions as well as associated implications of spatial averaging in followed by ensemble averaging in sustially non-uniform flows.

[Comparing Federal Systems](#) Oct 02 2022 In this updated and extensively revised third edition, Ronald Watts provides a clear analysis of the design and operation of a wide range of federations. There is much that can be learned from the experience of federal systems throughout the world. At present there are 25 functioning federations in the world (containing over 40 percent of the world's population). A distinctive feature of the popularity of federalism in the contemporary world is that its application has taken a variety of forms and has included some new variants and innovations.

[Chemical and Physical Processes in Combustion](#) Aug 20 2021

[IMF Staff Papers, Volume 51, No. 1](#) Apr 27 2022 This first issue of Volume 51 for 2004 includes a new paper by Peter B. Clark and Jacques J. Polak, along with a tribute from the Editor to Mr. Polak in honor of his 90th birthday. This issue also launches a new featured section, "Data Issues," which will be devoted in future issues to on-going discussions of the latest in econometric and statistical tools for economists, data puzzles, and other related topics of interest to researchers.

[Canadian Books in Print 2002](#) Nov 10 2020 CBIP is the complete reference and buying guide to English-language Canadian books currently in print; consequently, the Author and Title Index, Subject Index and microfiche editions are indispensable to the book profession. With submissions from both small and large publishers, CBIP provides access to titles not listed anywhere else. Containing more than 48,000 titles, of which approximately 4,000 have a 2001 imprint, the Author and Title Index is extensively cross-referenced. The Subject Index lists the titles under 800 different subject categories. Both books offer the most complete directory of Canadian publishers available, listing the names and ISBN prefixes, as well as the street, e-mail and web addresses of more than 4,850 houses. The quarterly microfiche service provides updated information in April, July and October. CBIP is constantly referred to by order librarians, booksellers, researchers, and all those involved in book acquisition. In addition, CBIP is an invaluable record of the vast wealth of publishing and writing activity in the scientific, literary, academic and arts communities across Canada. A quarterly subscription service including the annual Author and Title Index (March 2001) plus quarterly microfiche updates (April, July, and October 2001) is also available. ISBN 0802049567 \$220.00 NET.

[Agile Software Development Quality Assurance](#) Feb 23 2022 "This book provides the research and instruction used to develop and implement software quickly, in small iteration cycles, and in close cooperation with the customer in an adaptive way, making it possible to react to changes set by the constant changing business environment. It presents four values explaining extreme programming (XP), the most widely adopted agile methodology"--Provided by publisher.

[Advances in Cross-Language Information Retrieval](#) Apr 03 2020 This book presents the thoroughly refereed post-proceedings of a workshop by the Cross-Language Evaluation Forum Campaign, CLEF 2002, held in Rome, Italy in September 2002. The 43 revised full papers presented together with an introduction and run data in an appendix were carefully reviewed and revised upon presentation at the workshop. The papers are organized in topical sections on systems evaluation experiments, cross language and more, monolingual experiments, mainly domain-specific information retrieval, interactive issues, cross-language spoken document retrieval, and cross-language evaluation issues and initiatives.

[European Union Law](#) Feb 11 2021 This eagerly awaited new edition has been significantly revised after extensive user feedback to meet current teaching requirements. The first major textbook to be published since the rejuvenation of the Lisbon Treaty, it retains the best elements of the first edition – the engaging, easily understandable writing style, extracts from a variety of sources showing the creation, interpretation and application of the law and comprehensive coverage. In addition it has separate chapters on EU law in national courts, governance and external relations reflecting the new directions in which the field is moving. The examination of the free movement of goods and competition law has been restructured. Chapter introductions clearly set out what will be covered in each section allowing students to approach complex material with confidence and detailed further reading sections encourage further study. Put simply, it is required reading for all serious students of EU law.

[Rough Sets and Current Trends in Computing](#) Nov 30 2019 In recent years rough set theory has attracted the attention of many researchers and practitioners all over the world, who have contributed essentially to its development and applications. Weareobservingagrowingresearchinterestinthefoundationsofroughsets, including the various logical, mathematical and philosophical aspects of rough sets. Some relationships have already been established between rough sets and other approaches, and also with a wide range of hybrid systems. As a result, rough sets are linked with decision system modeling and analysis of complex systems, fuzzy sets, neural networks, evolutionary computing, data mining and knowledge discovery, pattern recognition, machine learning, and approximate reasoning. In particular, rough sets are used in probabilistic reasoning, granular computing (including information granule calculi based on rough mereology), intelligent control, intelligent agent modeling, identi?cation of autonomous s- tems, and process speci?cation. Methods based on rough set theory alone or in combination with other - proacheshavebeendiscoveredwithawide rangeofapplicationsinsuchareasas: acoustics, bioinformatics, business and ?nance, chemistry, computer engineering (e.g., data compression, digital image processing, digital signal processing, p- allel and distributed computer systems, sensor fusion, fractal engineering), de- sion analysis and systems, economics, electrical engineering (e.g., control, signal analysis, power systems), environmental studies, informatics, medicine, mole- lar biology, musicology, neurology, robotics, social science, software engineering, spatial visualization, Web engineering, and Web mining.

[Bioregional Solutions for Living on One Planet](#) Jul 07 2020 We live in a consumer society, and over-consumption is the driving force of environmental degradation. This stark reality led Pooran Desai and Sue Riddlestone to found BioRegional Development Group. In this Briefing they show how we can meet more of our needs for wood products, paper, textiles, food and housing from local renewable and waste resources. They outline the theoretical framework of bioregional development and the award winning practical solutions that BioRegional have developed with industry partners. They quantify how we can significantly reduce CO2 emissions and recycle waste, and so greatly reduce our ecological footprint.

[Reactor Dosimetry in the 21st Century](#) May 17 2021 This book presents the state of the art in reactor dosimetry as applied to nuclear power plants and to high performance research reactors, accelerator-driven systems and spallation sources. The reader will also find the latest advances in computer code development for radiation transport and shielding. In addition, the book focuses on radiation measurement techniques.

[Magnetic Resonance in Porous Media](#) Mar 15 2021 The International Bologna conference of Magnetic Resonance in Porous Media is devoted to the progress in Magnetic Resonance in Porous Media and to our understanding of Porous Media themselves, and to stimulate the contact among people from various parts of Academia and Industry. Researchers in Physics, Chemistry, Engineering, Life Sciences, Mathematics, Computer Sciences, and in Industrial Applications will benefit from exchange of ideas, experiences, and new approaches. Topics include innovative techniques to study structure, behavior of fluids, and their interactions in every kind of natural and artificial materials, including rocks, cements, biological tissues, foodstuffs, wood, particle packs, sediments, pharmaceuticals, zeolites, and bioconstructs. New data acquisition and processing techniques are also strong features. This year's conference (MRPM9) also incorporates the 8th Colloquium on Mobile NMR (CMMR8).

[International Journal of Production Economics](#) Apr 15 2021

[World Trade Organization Agreement on Anti-dumping](#) Jun 17 2021 The WTO Secretariat reports that during the period from 1995 to June 30, 2007 WTO members initiated 3097 anti-dumping investigations. Of these, 474 were put forward by India, which made it the largest user of this measure among WTO Members. The traditional argument of developing countries was that loopholes or absence of clear definitions in the anti-dumping rules have increased the possibility of abuses and discretionary practices against them. Now, many developing countries like India have become frequent users of this measure. For a better understanding of the various provisions of the WTO's Anti-dumping Agreement (ADA) a critical investigation of the resulting jurisprudence is a necessity. To that end, this timely work has a fivefold aim: and• To explore the jurisprudence that has emerged around the anti-dumping regime and how it affected developing countries; and• To assess how effectively and to what extent the WTO's Dispute Settlement Body (DSB) is able to analyze the violations of ADA provisions; and• To examine domestic compliance with DSB decisions; and• To study the Indian cases which come before the nation's Customs, Excise andamp; Sales Tax Appellate Tribunal, various High Courts and the Supreme Court of India; and and• To offer recommendations for the improvement of the anti-dumping regime from a developing country perspective.

[The Earthscan Reader in Rural-urban Linkages](#) Jan 01 2020 First Published in 2006. Routledge is an imprint of Taylor & Francis, an informa company.

[Clay's Handbook of Environmental Health](#) Sep 01 2022 This classic, definitive reference work for all those involved in environmental health is now available in its 19th edition. Significant changes include those made to chapters

on food safety and hygiene, environmental protection, the organisation and management of environmental health in the UK, port health, and waste management. New chapters have been added on health development, an introduction to health and housing, contaminated land, and environmental health in emergency planning, as well as a new glossary of abbreviations and acronyms. New material on training and standards, IT, practical risk assessment, and investigatory powers is also included. Each chapter reflects the wider background against which the subjects must be studied and the new concepts and approaches that have emerged over the past few years.

Official Gazette of the United States Patent and Trademark Office Nov 03 2022

A History of Photography Jan 25 2022 This comprehensive book traces the origins and progression of photography from its humble beginnings in daguerreotypes to the gradual mastering of photographic portraits, techniques, and negatives. The wider use of photography in journalism, for documenting architecture and art movements, and its capacity to produce piercing perspectives on the social and political climate of the nineteenth and twentieth centuries are all carefully evaluated, as well as the work of amateurs such as Zola who tried their hand at this revolutionary art form. Twenty-five years after the inauguration of France's first permanent exhibition devoted solely to photography, the Musée d'Orsay continues in its innovative and original thread. This book bears testimony to the unique nature of the museum's collection, noted for its rare finds, their quality, and the sheer number of works it holds (more than fifty-five thousand). The collection's most-treasured works are exposed here, including a portrait of Baudelaire by Nadar and the recently acquired portrait of Man Ray by Stieglitz.

Moral Issues in Global Perspective - Volume 2: Human Diversity and Equality - Second Edition Jun 05 2020 Now available in three thematic volumes, the second edition of Moral Issues in Global Perspective is a collection of the newest and best articles on current moral issues by moral and political theorists from around the globe. Each volume seeks to challenge the standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America. Covering a broad range of issues and arguments, this collection includes critiques of traditional liberal accounts of rights, justice, and moral values, while raising questions about the treatment of disadvantaged groups within and across societies affected by globalization. Providing new perspectives on issues such as war and terrorism, reproduction, euthanasia, censorship, and the environment, each volume of Moral Issues in Global Perspective incorporates work by race, class, feminist, and disability theorists. Human Diversity and Equality, the second of the three volumes, examines issues of equality and difference and the effects, within and across borders, of kinds of discrimination on the basis of race, ethnicity, gender, disability, class, and sexual orientation. Nine essays are new, four of which were written especially for this volume. Moral Issues in Global Perspective is available in three separate volumes—Moral and Political Theory, Human Diversity and Equality, and Moral Issues.

Implementing Primary Care Reform Mar 27 2022 Strong primary health care systems are the foundation of effective health care. Several countries have attempted to reform primary care delivery in the past few years, with variable results. In "Implementing Primary Care Reform" the authors examine the barriers to, and facilitators of, such reform in Canada, New Zealand, and the United Kingdom, from political, economic, organizational, and clinical perspectives. The authors emphasize the importance of primary care in improving health, increasing cost-effectiveness, and promoting social equity. Contributors include Marie-Dominique Beaulieu (University of Montreal), Raisa Deber (University of Toronto), Michael Decter (National Health Council), Cathy Fooks (Health Network Canadian Policy Research Networks), Brian Hutchinson (McMaster University), Antonia Maioni (McGill University), Nick Mays (London School of Hygiene and Tropical Medicine), Bonnie Sibbald (University of Manchester), Barbara Starfield (John Hopkins University), and Carolyn Tuohy (University of Toronto).

Optical Fiber Telecommunications VB Oct 22 2021 Optical Fiber Telecommunications V (A&B) is the fifth in a series that has chronicled the progress in the research and development of lightwave communications since the early 1970s. Written by active authorities from academia and industry, this edition not only brings a fresh look to many essential topics but also focuses on network management and services. Using high bandwidth in a cost-effective manner for the development of customer applications is a central theme. This book is ideal for R&D engineers and managers, optical systems implementers, university researchers and students, network operators, and the investment community. Volume (A) is devoted to components and subsystems, including: semiconductor lasers, modulators, photodetectors, integrated photonic circuits, photonic crystals, specialty fibers, polarization-mode dispersion, electronic signal processing, MEMS, nonlinear optical signal processing, and quantum information technologies. Volume (B) is devoted to systems and networks, including: advanced modulation formats, coherent systems, time-multiplexed systems, performance monitoring, reconfigurable add-drop multiplexers, Ethernet technologies, broadband access and services, metro networks, long-haul transmission, optical switching, microwave photonics, computer interconnections, and simulation tools. Biographical Sketches Ivan Kaminow retired from Bell Labs in 1996 after a 42-year career. He conducted seminal studies on electrooptic modulators and materials, Raman scattering in ferroelectrics, integrated optics, semiconductor lasers (DBR, ridge-waveguide InGaAsP and multi-frequency), birefringent optical fibers, and WDM networks. Later, he led research on WDM components (EDFAs, AWGs and fiber Fabry-Perot Filters), and on WDM local and wide area networks. He is a member of the National Academy of Engineering and a recipient of the IEEE/OSA John Tyndall, OSA Charles Townes and IEEE/LEOS Quantum Electronics Awards. Since 2004, he has been Adjunct Professor of Electrical Engineering at the University of California, Berkeley. Tingye Li retired from AT&T in 1998 after a 41-year career at Bell Labs and AT&T Labs. His seminal work on laser resonator modes is considered a classic. Since the late 1960s, He and his groups have conducted pioneering studies on lightwave technologies and systems. He led the work on amplified WDM transmission systems and championed their deployment for upgrading network capacity. He is a member of the National Academy of Engineering and a foreign member of the Chinese Academy of Engineering. He is a recipient of the IEEE David Sarnoff Award, IEEE/OSA John Tyndall Award, OSA Ives Medal/Quinn Endowment, AT&T Science and Technology Medal, and IEEE Photonics Award. Alan Willner has worked at AT&T Bell Labs and Bellcore, and he is Professor of Electrical Engineering at the University of Southern California. He received the NSF Presidential Faculty Fellows Award from the White House, Packard Foundation Fellowship, NSF National Young Investigator Award, Fulbright Foundation Senior Scholar, IEEE LEOS Distinguished Lecturer, and USC University-Wide Award for Excellence in Teaching. He is a Fellow of IEEE and OSA, and he has been President of the IEEE LEOS, Editor-in-Chief of the IEEE/OSA J. of Lightwave Technology, Editor-in-Chief of Optics Letters, Co-Chair of the OSA Science & Engineering Council, and General Co-Chair of the Conference on Lasers and Electro-Optics.
