American Cars, 1973-1980 Apr 12 2021 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the

late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

Livres II et III. Commentaire historique et mathématique, édition et traduction du texte arabe Jan 28 2020

The first three books of the Conica deals with the basic elements of the theory of conical sections, before Apollonius turns to particular problems in the following books. Until recently these three books were only known from Eutocius' text. However, they were known to be part of an Arabic translation of a Greek version independent of Eutocius' text. A close study of the Arabic texts of books 2 and 3 leads to the same conclusion as that which, as a result of the new edition, was reached for the first book: that the Greek version provides a better and sounder text. This volume provides a first critical edition of the Arabic text, the first translation of it into a modern language and a detailed historical and mathematical commentary.

Driven to Distraction Sep 05 2020 Brace yourself, Clarkson's back. And he'd like to tell you what he thinks about some of the most awe-inspiring, earth-shatteringly fast and jaw-droppingly gorgeous cars in the world (alongside a few irredeemable disasters ...). Or he would, if there weren't so many things competing for his attention first. So much to get off his chest. The world according to Clarkson is a perplexing place, filled with thorny subjects like: * The prospect of having Terry Wogan as president * Why you'll never see a woman driving a Lexus * The

unforeseen consequences of inadequate birth control * Why everyone should spend a weekend with a digger Fearless, independent, surprising and laugh-out-loud funny, Driven to Distraction is full-throttle Clarkson at his best; a unique look at the joys, absurdities and frustrations of modern life. With wheels. Buckle up, get comfortable, and hold on tight. There's no one who writes about cars like Jeremy ...
