Law on the Battlefield Mar 05 2020 This book discusses the problems of international law arising in armed conflicts, illustrated by references to recent conflicts. It deals with the rules on targetting, and precautions in attack and defence, as well as including chapters on the rules of conduct against both enemy forces and in internal conflicts.

Conflict Law Feb 13 2021 Topics as diverse as the evolving spectrum of conflict, innovations in weaponry, automated and autonomous attack, the depersonalisation of warfare, detention operations, the influence of modern media and the application of human rights law to the conduct of hostilities are examined in this book to see to what extent existing legal norms are challenged. The book takes each topic in turn, explains relevant provisions of contemporary law and analyses exactly where the

legal problem lies. The analysis then develops the theme, examining for example the implications of current rules as to deception operations for certain applications of cyber warfare. The text is written in an accessible style, and demonstrates the continuing relevance of established rules and the importance of compliance with them. Useful for academics, military, governments, ministries of defence, ministries of foreign affairs, libraries, diplomats, think tanks, policy units, NGOs, and all others with an interest in law of armed conflict issues such as journalists and students.
