Pragmatics in Practice Nov 24 2021 The ten volumes of Handbook of Pragmatics Highlights focus on the most salient topics in the field of pragmatics, thereby attempting to divide up its wide interdisciplinary spectrum in a transparent and manageable way. While the other volumes select specific philosophical, cognitive, grammatical, social, cultural, discursive, variational, or interactional angles, this 9th volume focuses on what pragmatics is good for – beyond the very discipline of pragmatics as such. The chapters in the volume thus address the importance of taking a pragmatic perspective on traditional fields of applied linguistics (contrastive and error analysis, translation), and they address the core of pragmatics as the study of language use (with phenomena ranging from irony and emphasis to literacy and mass media, and with approaches to the function of language like rhetoric, stylistics, corpus analysis, and general semantics). The volume contains chapters not only on the spoken and written modes of communication, but also on signed language pragmatics and on computer-mediated communication. The impact and usefulness of taking a pragmatic perspective on language for a deeper understanding of clinical and rehabilitation practices has recently received ever more focus; in this volume, aspects of this direction of research are dealt with in the chapter on clinical pragmatics. In most of the chapters in the volume, ethics has a core role to play, not only in issues of authenticity in general in relation to research on language use, but also in issues that have a direct influence on the (linguistic) culture and society we live in, irrespective of whether we are part of a (linguistic) majority or a minority, or a minority within a minority: language policy and language planning, language ecology, and language in relation to legal matters. In all of these fields, we see the importance of research within pragmatics as a discipline dealing with how language influences our everyday lives. All in all, the volume presents different perspectives on how research in pragmatics not only can be put to practice, but how pragmatics is used as a tool to gain a better understanding of the world we live in.

Empowerment Series: Direct Social Work Practice Feb 13 2021 Considered the profession's ideal learning resource--based on the authors' extensive experience in the field and the text's balanced focus on theory and application--DIRECT SOCIAL WORK PRACTICE: THEORY AND SKILLS, Eleventh Edition, prepares social work students for effective ethical and anti-oppressive practice. Authoritative, well-organized and written with an appropriate level of rigor, this thorough introduction to practice grounds students in theory while connecting them to real-world applications with clients through vivid examples and vignettes. Many case examples are drawn from active social work practitioners, as well as the authors' own practice situations. As part of the Brooks/Cole Empowerment Series, the Eleventh Edition is completely up to date, discussing topics such as COVID-19, tele-social work, Black Lives Matter and other issues related to racial inequity. In addition, the authors have carefully revised the text to incorporate gender-neutral language and explore key structural implications affecting clients and practice. The text thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Main Idea Jan 15 2021 This highly successful, user-friendly text helps readers learn strategic behaviors that empower them to succeed in their reading. The Main Idea emphasizes reading to learn. Readers develop an increasingly complex understanding of the reading process through incremental strategies and "game plans." Enlightening reading selections vary in topics and lengths within each chapter, and a casebook of longer readings all based on the theme of intergenerational relationships expose readers to worldwide issues to integrate chapter concepts with real-world material. In addition, a wealth of pedagogical features, such as discipline-specific vocabulary instruction, individual and collaborative activities, critical thinking and reading strategies, and a complete chapter on reading college textbooks, give the developmental reader the necessary tools to succeed. For those interested in improving basic reading skills.

Rachel Carson Nov 12 2020 Rachel Carson—scientist, author, and environmentalist Rachel Carson was always fascinated by the ocean. As a child, she dreamed of it and longed to see it. As a young woman, she felt torn between her love for nature and her desire to pursue a writing career. Then she found a way to combine both. Rachel had a talent for writing and talking about science in a way that everyone could understand and enjoy. With her controversial book, Silent Spring, Rachel Carson changed the way we look at our planet. Contains black-and-white illustrations. "Kudlinski has admirably captured the driving force of spirit of a shy but courageous woman in a succinct, respectful approach." —Booklist About the Women of Our Time series: International in scope, the Women of Our Time series of biographies cover a wide range of personalities in a variety of fields. More than a history lesson, these books offer carefully documented life stories that will inform, inspire, and engage.

Sustainable Ecological Systems Apr 05 2020 "This conference brought together scientists and managers from federal, state, and local agencies, along with private-sector interests, to examine key concepts involving sustainable ecological systems, and ways in which to apply these concepts to ecosystem management. Session topics were: ecological consequences of land and water use changes, biology of rare and declining species and habitats, conservation biology and restoration ecology, developing and applying ecological theory to management of ecological systems and forest health, and sustainable ecosystems to respond to human needs. A plenary session established the philosophical and historical contexts for ecosystem management." --Title page verso.

Art as Contemplative Practice Oct 12 2020 Art as yoga and meditation for artists, contemplative practitioners, art educators, and art therapists. Drawing upon his personal experience as a practitioner-researcher, visual artist, and cancer survivor, Michael A. Franklin offers a rich and thought-provoking guide to art as contemplative practice. His firsthand experience and original artwork complement this extensive discussion by consulting various practice traditions including yoga, rasa and darshan experiences, imaginal intelligence, and the contemplative instincts of select early twentieth-century artists. From this synthesis, Franklin suggests that we treat art as a form of yoga and meditation with the potential to awaken deeper insight into the fundamental nature of the Self. Exercises and rubrics are included that offer accessible instruction for any artist, meditation or yoga practitioner, art educator, or art therapist. "This is a thoroughly groundbreaking work that demonstrates how art can be a contemplative way of being and pathway to the Self. It reveals the creative, imaginal side of our humanity to be a sacred ground from which grows the wholeness of both the individual practitioner and the larger community." — Fran Grace, University of Redlands "One of the book's notable features is the author's honesty, candor, and openness in discussing the healing benefits of contemplative creativity in his own experience." — William K. Mahony, Davidson College "The book's breadth of experiences and useful images in art therapy and meditative traditions is its greatest strength." — Cliff Edwards, Virginia Commonwealth University

Theorizing Communication Feb 02 2020 Presents the collection of primary-source readings built around the idea that communication theory is a field with an identifiable history and has developed within seven main traditions of thought - the rhetorical, semiotic, phenomenological, cybernetic, sociopsychological, sociocultural, and critical traditions.

Drawing Conclusions (Reading Level 3-4.5) | Short Passages | Practice Activities Jul 01 2022 Reading Skills Activities | Reading Comprehension | Draw Conclusions Improve Overall Reading Comprehension with Targeted Specific Skill Practice! Focusing on one comprehension skill at a time gives students the opportunity to master that skill and improve their general reading and comprehension skills. Drawing Conclusions: Being able to draw a conclusion is a higher-level comprehension skill. It can be confusing. A conclusion is not something that is directly stated in a story. Students must conclude something based on reading the details of a story. Introduce students to the concept of drawing a conclusion by explaining that this means making a decision about something you have read based on information in the story. Conclusions can fill in the meaning of a story. Skill Specific Activities There are 15 high-interest, short stories in this selection include a variety of fiction and non-fiction topics. The follow up questions guide students to Draw Conclusions. Each story is numbered instead of having a title. The last question for each story asks the students to give the story a title. This important activity helps to determine the student's level of understanding the story's main idea. Visual Lesson Each story has an engaging illustration designed to bring the story to life and help capture the interest of reluctant readers. To help sharpen inference skills, students can be asked to use the illustration to predict what the story is about. Teaching Opportunities These targeted activities are great for one-on-one intervention, small groups of students at multiple skill levels or whole class participation. Can be used for remediation, review, and transition classes. Details: Each short story is between 140 and 160 words and is written at a 3.0 to 4.5 reading level according to the Flesch-Kincaid Readability Scale. The interest level is grades 4 and up. Contents Include: • 15 high-interest, short stories • 15 pages of skill-specific questions focusing on Drawing Conclusions • Answer Key

Ecosystems - Science - Paired Texts - Fiction to Nonfiction Aug 02 2022 Reading Comprehension | Science | Fiction/Nonfiction Pairing | Ecosystems Supports Best Practices in Reading by Pairing Science-Based Nonfiction Stories with Fiction Stories on the Same Topic! Each exciting and fact-filled story is accompanied by a dynamic, colorful, realistic illustration that brings the story to life and enhances the content. The nonfiction story gives a detailed, scientific explanation of the topic. The matching fiction story makes the topic relatable to everyday life. Reading Skills Follow-up questions and activities help build important comprehension skills and strategies shared by and unique to nonfiction and fiction stories. By reading the stories and completing the accompanying activities, students will have a much greater understanding of these two key genres of reading. "Ecosystems" The nonfiction story sets up the fiction story with interesting facts about different types of ecosystems, how they work, and the importance of keeping food webs intact. "Everything is Connected" The fiction story tells about a grandfather who explains the importance of maintaining food chains and food webs to his granddaughter through a story about the scarcity of a bird called the Clark's nutcracker. Questions & Activities Each story is followed by who, what, when, where, why, and how type questions. Additional skill-specific questions for each story include: Main Idea, Locating Information, Fact or Opinion, Sequencing, Cause & Effect, Conclusion, Inference, Summarizing, and Picture Interpretation. Vocabulary activities include: vocabulary matching, word search, and context. Details: Each short story is between 320 and 330 words and is written at a 3.6 to 4.8 reading level according to the Flesch-Kincaid Readability Scale. The interest level is grades 4 and up. Contents include: • 2 high-interest, illustrated, short stories • 10 pages of questions and activities • Glossary • Answer Key • 18 total pages

Fact & Opinion (Reading Level 3-4.5) | Short Passages | Comprehension Activities Jan 27 2022 Reading Skills Activities | Reading Comprehension | Facts and Opinions Improve Overall Reading Comprehension with Targeted Specific Skill Practice! Focusing on one comprehension skill at a time gives students the opportunity to master that skill and improve their general reading and comprehension skills. Fact & Opinion: Being able to tell a fact from an opinion is an important reading skill to master. It allows the reader to make a sound judgment about the information presented in a story. To introduce this skill, explain the difference between a fact and an opinion. Fact: a fact is something that is true about a subject. It can be tested and proven. Opinion: an opinion is what someone thinks or feels about a subject. Skill Specific Activities There are 15 high-interest, short stories in this selection include a variety of fiction and non-fiction topics. The follow up questions guide students to Facts and Opinions. Each story is numbered instead of having a title. The last question for each story asks the students to give the story a title. Teaching and Learning Vocabulary Dec 02 2019 Although proficiency in vocabulary has long been recognized as basic to reading proficiency, there has been a paucity of research on vocabulary teaching and learning over the last two decades. Recognizing this, the U.S. Department of Education recently sponsored a Focus on Vocabulary conference that attracted the best-known and most active researchers in the vocabulary field. This book is the outgrowth of that conference. It presents scientific evidence from leading research programs that address persistent issues regarding the role of vocabulary in text comprehension. Part I examines how vocabulary is learned; Part II presents instructional interventions that enhance vocabulary; and Part III looks at which words to choose for vocabulary instruction. Other key features of this timely new book include: *Broad Coverage. The book addresses the full range of students populating current classrooms—young children, English Language Learners, and young adolescents. *Issues Focus. By focusing on persistent issues from the perspective of critical school populations, this volume provides a rich, scientific foundation for effective vocabulary instruction and policy. *Author Expertise. Few volumes can boast of a more luminous cast of contributing authors (see table of contents). This book is suitable for anyone (graduate students, in-service reading specialists and curriculum directors, college faculty, and researchers) who deals with vocabulary learning and instruction as a vital component of reading proficiency.

The Asperkid's Game Plan May 19 2021 The Asperkid's Game Plan looks from the inside at the learning style of children with Asperger syndrome and explains how to introduce structured play that engages Asperkids and explicitly addresses ASD weaknesses while reinforcing ASD strengths. Showing how just about anything can be turned into an opportunity for learning and growth, the book is full of go-to ideas for making simple play equipment in the home or classroom and using it to develop core skills that Asperkids struggle with, from fine motor and social skills, to planning and organization. Whether it's origami math, fried marbles, or a bug's eye view scavenger hunt, every game, project, and idea in the book is explained with clear directions and learning objectives and illustrated with color photographs. Jennifer O'Toole's enthusiastic approach and fun lessons, based on Montessori principles, will inspire and motivate parents, educators, and therapists to make purposeful play a part of every Asperkid's day.

Finding Facts (Reading Level 3-4.5) | Short Passages | Comprehension Activities Feb 25 2022 Reading Skills Activities | Reading Comprehension | Finding Facts Improve Overall Reading Comprehension with Targeted Specific Skill Practice! Focusing on one comprehension skill at a time gives students the opportunity to master that skill and improve their general reading and comprehension skills. Finding Facts: Being able to find the facts in a story is a basic, yet essential, comprehension skill. It helps to lay the foundation for success in mastering other comprehension skills. You may want to introduce this skill by explaining to students that facts are small bits of information that make up the whole of a story. Skill Specific Activities There are 15 high-interest, short stories in this selection that include a variety of fiction and non-fiction topics. The follow up questions guide students to find the facts. The facts might be who, what, where, when or why. Or they might be the names of people and places, dates, times, and numbers. Each story is numbered instead of having a title. The last question for each story asks the students to give the story a title. This important activity helps to determine the student's level of understanding the story's main idea. Visual Lesson Each story has an engaging illustration designed to bring the story to life and help capture the interest of reluctant readers. To help sharpen inference skills, students can be asked to use the illustration to predict what the story is about. Science Curriculum Topic Study May 31 2022 Without question, this book will be of great value to the profession of science teaching. Given today's educational landscape of standards and high-stakes testing, curriculum topic study is an essential piece of the puzzle! - Cary Snider, Vice President for Educator Programs, Museum of Science, Boston Discover the "missing link" between science standards, teacher practice, and improved student achievement! Becoming an accomplished science teacher not only requires a thorough understanding of science content, but also a familiarity with science standards and research on student learning. However, a comprehensive strategy for translating standards and research into instructional practice has been lacking since the advent of standards-based education reform. Science Curriculum Topic Study provides a systematic professional development strategy that links science standards and research to curriculum, instruction, and assessment. Developed by author Page Keeley of the Maine Mathematics and Science Alliance, the Curriculum Topic Study (CTS) process can help teachers align curriculum, instruction, and assessment with specific, research-based ideas and skills. The CTS process will help teachers: - Improve their understanding of science content - Clarify a hierarchy of content and skills in a learning goal from state or local standards - Define formative and summative assessment goals and strategies - Learn to recognize and address learning difficulties - Increase opportunities for students of all backgrounds to achieve science literacy - Design or utilize instructional materials effectively Containing 147 separate curriculum topic study guides arranged in eleven categories that represent the major domains of science, this book provides the tools to both positively impact student learning and develop the knowledge and skills that distinguish expert science teachers from novices.

Improving Education in the US Sep 30 2019 US education is in crisis. This history and analysis of the education system is an essential primer for parents, teachers, and school administrators, as well as parent-teacher organizations, education majors, education administration majors, the media, politicians, and everyone who wants to see American schools do a better job. The author considers the genesis of public schools in the United States, various aspects of public education systems from elementary school through university, trends in education and reform, and issues that still need to be addressed. The book contains information about public and private organizations, think tanks, institutions, and governmental bodies involved in public education reform. The book shows the deficiency of the existing education system and compares it to more efficient systems. The author shows that most of the existing approaches to improve education are based on the same foolish idea that as long as government spending on education is great enough, the improvement will follow. The bond between education and politics hinders progress in education. The problems facing schools as well as the recommended solutions are considered. The author cites multiple research attempts to improve the functioning of the existing education system that have still failed to bring any tangible results. He uses his specialized knowledge to explain what should be done for educational progress to become reality.
