Development Through Life: A Psychosocial Approach Apr 24 2022

Newman and Newman use a life-stage approach to present development across the life span, drawing on the psychosocial theory of Erik Erikson to provide a conceptual framework for the text. The authors address physical, intellectual, social, and emotional growth in 11 life stages, from the prenatal period through elderhood, focusing on the idea that development results from the interdependence of these areas at every stage, and placing special emphasis on how optimal development may be fostered throughout life.

Pre-Incident Indicators of Terrorist Incidents Oct 19 2021

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents.
