*Drawings on a Bus* Jul 31 2020 Ellsworth Kelly made the drawings reproduced in this volume in the Fall of 1954. Published for the first time in this sketchbook facsimile, these drawings offer a rare and special glimpse into the distinguished artist's working process at the dawn of his career. The inspiration for the drawings in Sketchbook 23 came to the artist while riding a bus. Inspired by the shadows cast across the pages of a book, the artist took out his pencil and quickly recorded the outlines of the shadows directly onto the pages. Upon returning to his studio, Kelly reached for a sketchbook and began developing the sketches in ink, experimenting with variations, cropping and layering the shadow forms to generate new ones. These black and white drawings became the source material for larger works, including some of the artist's most celebrated canvases, such as *Atlantic* (1956) purchased by the Whitney Museum of American Art in 1957, the first work by Kelly to enter a museum collection.

**Holley Carburetors** Dec 16 2021 During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a

particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts, and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With *Holley Carburetors: How to Rebuild* you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.

**Elizabeth Taylor's Nibbles and Me** Aug 24 2022 In 1946, Elizabeth Taylor -- then fourteen and a major star at MGM -- published a book about her pet chipmunk, Nibbles. With wit, charm, and remarkable skill, she related the adventures and mishaps of her high-spirited friend. She and Nibbles were virtually inseparable during the shooting of National Velvet and other films; in fact the chipmunk almost got to appear in Courage of Lassie -- but he was so well behaved that he didn't look real, and his scene was cut! Recounted here are such stories as the happiest birthday of her life, when she was given King Charles, the horse who was called The Pi in National Velvet, because only Elizabeth could ride him.

Daemon in the Sanctuary May 09 2021 "Daemon in the Sanctuary" explores the uncanny contradiction between the phenomenological experience of home as a site of nurture and security and the empirical reality that people are far more likely to be hurt and even killed in their own homes by their intimates, rather than at the hands of strangers. Moving from the syrupy tributes of the god of love in Plato's "Symposium" to the subject of domestic violence appears to be a giant leap, but the author shows that embroidered romantic ideas about love prepare the initiate poorly for the reality of intimate connection. Poets and philosophers who lead us to believe that love is heaven sent can leave us craving an extreme experience. We crave an earth-shaking, life-altering intrusion on our tranquility as evidence that love is real. Thus the naive initiate can easily mistake the flutter of the pulse, the quickening of the heart rate, the flush, the confused emotions, and the painful longing as signs of the god's gift. But these are also the signs of fear! Wendy C. Hamblet, a philosopher in the phenomenological lineage, examines the truth value of phenomenological experience, through the lens of the problem of intimate violence. If Husserl is right and phenomenological method provides the ground of all empirical truth, then what is to be made of the fundamental contradiction between the lived experience of home as a site of nurture and security and of intimates as guardians and caretakers, and the empirical fact, evident in every human society, that people are far more likely to be harmed, and even killed, in their homes or in the homes of their intimates and at the hands of those charged with their care? Hamblet carefully choreographs a dance between the two opposing 'truths' to expose how the lived sense of home, colored by ideals, can tint people's expectations about intimate connection and cloud their ability to recognize the signs of intimate abuse. This book illuminates the dangers and pitfalls of unhealthy intimacy and offers a regimen for loosening the grip of a sickened love's pathological hold.

**Invitation to Classical Analysis** Feb 06 2021 This book gives a rigorous treatment of selected topics in classical analysis, with many applications and examples. The exposition is at the undergraduate level, building on basic principles of advanced calculus without appeal to more sophisticated techniques of complex analysis and Lebesgue integration. Among the topics covered are Fourier series and integrals, approximation theory, Stirling's formula, the gamma function, Bernoulli numbers and polynomials, the Riemann zeta function, Tauberian theorems, elliptic integrals, ramifications of the Cantor set, and a theoretical discussion of differential equations including power series solutions at regular singular points, Bessel functions, hypergeometric functions, and Sturm comparison theory. Preliminary chapters offer rapid reviews of basic principles and further background material such as infinite products and commonly applied inequalities. When vandalism escalates into murder, Moretti must resist the attractions of Ensor's glamorous American wife, Sydney, consolidate his working relationship with Falla, and establish whether the murders on Guernsey go beyond the island. Why is the Marchesa Vannoni in Guernsey? What is the significance of the design that appears on the daggers used as murder weapons, as well as on the Vannoni family crest? It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs
