Principles of Ecotoxicology, Fourth Edition Jun 21 2022 Cutting across traditional subject boundaries, Principles of Ecotoxicology, Fourth Edition gives readers an integrated view of ecotoxicology, from molecules to ecosystems. This new edition of a bestselling textbook continues to emphasize principles rather than practice, providing the interdisciplinary perspective and grounding required for research. Organized into three sections, the book first describes the molecular structures, properties, and environmental fate of pollutants. It then deals with the effects of pollutants on living organisms at the molecular, cellular, and individual levels. Moving into population biology and population genetics, the third part of the book addresses a question of great interest to ecologists: What effects do pollutants have at the levels of population, community, and the whole ecosystem? The book also looks at how ecotoxicology is used in the biomonitoring of environmental pollution, the investigation of pollution problems, the conducting of field trials, the study of the development of resistance, and the growing area of environmental risk assessments. Throughout, examples and case studies illustrate the principles. This updated fourth edition includes new material on nanoparticle pollution, bioaccumulation, biomarkers, and chemical warfare in nature, as well as a new chapter on the future directions of ecotoxicology. A concise textbook that will also appeal to practicing ecotoxicologists, it provides a solid basis for understanding what happens to chemicals in the real world, where they go, how they ultimately degrade, and how they affect the individuals and populations that encounter them. What's New in This Edition Revised and updated material throughout A chapter on future directions of ecotoxicology New material on nanoparticle pollution and chemical warfare in nature Expanded coverage of bioaccumulation, biomarkers, and risk assessment for affected populations More case studies, many from the United States Discussion of neurotoxic and behavioral effects of pollutants Recent research on the decline of vultures and effects of neonicotinoids on bees Organic Pollutants: An Ecotoxicological Perspective, Second Edition (CRC Press, 2008), a companion volume to this book, covers the mechanistic aspects of ecotoxicology in more depth.

Annus Horribilis Jan 04 2021 Everyone remembers the Queen's 'Annus Horribilis', but what do 'quid pro quo' and 'habeas corpus' mean? Why do plants have Latin names? Why do families, towns, countries and even football teams have Latin mottoes? What do the Latin epitaphs in churches say? What are the words of Mozart's 'Requiem'? These are just a few of the topics covered in this book. As Mark Walker makes clear, present-day English is still steeped in its Roman and Latin origins. As a result English still has many thousands of Latin words in everyday use.

[Home in the City](#) Jun 28 2020 During the past several decades, the Aboriginal population of Canada has become so urbanized that today, the majority of First Nations and Métis people live in cities. Home in the City provides an in-depth analysis of urban Aboriginal housing, living conditions, issues, and trends. Based on extensive research, including interviews with more than three thousand residents, it allows for the emergence of a new, contemporary, and more realistic portrait of Aboriginal people in Canada's urban centres. Home in the City focuses on Saskatoon, which has both one of the highest proportions of Aboriginal residents in the country and the highest percentage of Aboriginal people living below the poverty line. While the book details negative aspects of urban Aboriginal life (such as persistent poverty, health problems, and racism), it also highlights many positive developments: the emergence of an Aboriginal middle class, inner-city renewal, innovative collaboration with municipal and community organizations, and more. Alan B. Anderson and the volume's contributors provide an important resource for understanding contemporary Aboriginal life in Canada.

Reference and Information Services: An Introduction, 4th Edition Jun 09 2021 Reflecting the dramatic changes shaped by rapidly developing technologies over the past six years, this new fourth edition of Reference and Information Services takes the introduction to reference sources and services significantly beyond the content of the first three editions. In Part I, Concepts and Processes, chapters have been revised and updated to reflect new ideas and methods in the provision of reference service in an era when many users have access to the Web. In Part II, Information Sources and Their Use, discussion of each source type has been updated to encompass key resources in print and on the Web, where an increasing number of freely available sources join those purchased or licensed by libraries. A number of new authors are contributors to this new edition, bringing to their chapters their experience as teachers of reference and as practitioners in different types of libraries. Discussions of services in Part I integrate digital reference as appropriate to each topic, such as how to conduct a reference interview online using instant messaging. Boxes interspersed in the text are used to present scenarios for discussion, to highlight key concepts, or to present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated list of additional readings to guide further study. A new companion website will provide links to Web-accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text.
