The First Three Shelby Cobras Nov 23 2021 The First Three Shelby Cobras, the third book in the acclaimed Exceptional Cars series, tells the story of three remarkable cars, the first AC Cobra created by the legendary Carroll Shelby in 1962 and now favorites of sports-car enthusiasts throughout the world. The prototype CSX2000 has been described as the "most important American sports car", although it was built on a British AC Ace chassis with an American Ford V8 engine. It was retained by the Shelby family until 2016, when it sold at auction for a record \$13.75 million. CSX2001 was the first production Cobra, and was delivered to American racing driver Ed Hugus. It was later sold to Frenchman Jean-Marie Vincent, who raced in the Tour de France and in numerous European hillclimbs. CSX2002 was the first Cobra to race and nearly won its inaugural outing at Riverside, driven by Bill Krause, until sidelined by a broken rear hub. It did take its first ever Cobra win, with Dave MacDonald at Tucson in March 1963. Its success led to a series of competition wins that made Shelby's Cobras famous and admired across the globe. All three are now the pride of car collections in the United States of America. CSX2000 and CSX2002 are part of the Larry Miller Collection, and CSX2001 belongs to California-based motorsport collector Bruce Meyer.

Ferrari 1000 GP Mar 04 2020 The prestigious publication in two volumes, Ferrari 1000 GP: The Official Book, in a limited edition, is an extraordinary tribute to Scuderia Ferrari and the remarkable objective of 1,000 Grands Prix achieved by the team from Maranello in 2020. Over the course of more than 700 pages enriched with more than 1,000 illustrations, many of which were previously unpublished, the work traces the incredible story of Ferrari's participation in Formula 1 that began in 1950 with the Monaco Grand Prix, continued with no less than 230 victories and drivers' titles and 16 constructors' titles and has reached the unique total of 1,000 Grands Prix. Made in collaboration with Ferrari Spa and available in a limited edition of 2,000 copies, the book is contained in an exclusive slipcase in "Rosso Storico 127", the same colour as the 125 S, the first Ferrari from 1947, and the SF1000, which in 2020 competed in the Scuderia's 1,000th Grand Prix at the Mugello circuit. An indispensable volume for the bookshelves of all enthusiasts of the Prancing Horse: a precious collector's item as well as an invaluable source of information regarding the results obtained by the cars from Maranello in every race and the team's placings in the Drivers' and Constructors' championships. The book features a foreword by Louis Camilleri and Marco Bionetto.

Owning Model S Sun 26 2019 Owning Model S, 2nd edition, has been updated and enhanced to maintain its place as the go-to user guide every Model S owner (and potential owner) needs. If you're a Model S owner, it provides the inside information you'll need to better understand the world's leading electric vehicle. The 2nd edition considers new Model S battery capacities, new configurations, new options, and new features that have recently been introduced by Tesla Motors--including dual-motor all-wheel-drive, autopilot, and the 761 hp P90D with "ludicrous mode." In addition, it reflects the actual driving experience of tens of thousands of Model S owners worldwide. Throughout the book and the accompanying website, owningmodels.com, Nick Howes answers your questions with no nonsense guidance, thorough checklists, and many hidden tricks that will enable you to get the absolute maximum from one of the world's coolest cars. Here are only a few of the questions he answers inside Owning Model S: * Is Model S the right car for me? * Which options should I choose? * How do I prepare prior to the delivery of my Model S, and what do I do the day it's delivered? * What is the true range of Model S if I drive it fast and hard? * What aftermarket accessories will enable me to customize my Model S? These questions along with many others are answered with pragmatic advice, no nonsense instructions, and detailed checklists. After reading Owning Model S, 2nd edition, you'll truly understand the future of motoring.

The Porsche 911 Book Oct 11 2020 The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th anniversary of the populous 911 family, the famous automotive photographer Rene Staud, whose The Mercedes-Benz 300 SL Book has also been published by teNeues, showcases the most important models in his typically radiant and distinctive style.

Lamborghini Dec 25 2021 To celebrate Lamborghini's first 50 years, authors and professionals from different fields narrate its history, present, and future in a completely new way. Lamborghini, one of the most famous and iconic of all automobile brands, will turn 50 in 2013 (1963-2013). Over the course of this half century, it has gradually established itself as a leader in its sector, integrating perfectly into the culture of its time and becoming a symbol of innovation in design and technology, as well as a phenomenon in culture and communication. This beautifully illustrated book describes every step of the journey, with references to cinema, technology, design and the work of the men who made their fortune from the brand. It is not the usual book about cars for car enthusiasts, but a broader and more complex project with six carefully structured chapters (1. The history; 2. The technological innovation; 3. The design; 4. The people; 5. The image; 6. The future), accompanied by spectacular images of all the models produced up to now, revealing how Lamborghini made its way into the collective imagination and became the legend it is today. This is a large-format volume with 200 beautiful colour images, brilliantly evoking a surprising combination of tradition and innovation for all those who are interested in design, technology, marketing, culture, communication and, of course, the classic qualities of Italian manufacture at its best.

Instinct, Reason & Politics Oct 30 2019 There is a reason why we are so divided. There is a reason why you have friends, family or co-workers who are "normal" until the conversation turns to politics. Liberals and conservatives differ on more than just issues. When it comes to politics we think and use our brains differently. We use words and language differently and we play by different rules. While others talk about "basal instincts" generally, this book discusses the specific instinct that is the source of our difference. Where it comes from, how it manifests itself, and how it was useful in primitive settings and is completely out of place in our modern society. This and other topics are covered in this clearly written little book that you will read more than once and to often.

Car Tourism Mar 16 2021 This book examines the role of cars and the space connected with their production and presentation in tourism development. It describes the role played by experiential and experience societies formed in the 20th c. in the development of contemporary tourism, including tourism related to cars. The book explores the influence of experiencing unusual events, car races, car fairs, visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars (e.g. Autostadt or Audi Forum) on the development of a new type of tourism, i.e. car tourism. This kind of tourism is novel in two ways: firstly, it is a new phenomenon in science, as so far it has not been thoroughly studied or described, apart from various articles. Secondly, this type of tourism has developed on a large scale only in recent years, mainly due to the huge investments made by powerful European car manufacturers (e.g. Autostadt, Porsche Museums, Lamborghini Museum etc.). The book presents cars and the spaces related to them as tourist assets (sites, events) and as tourist products that satisfy tourists' needs. Moreover, it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of tourism space, highlighting the main tourism spaces in contemporary tourism develops. It presents multifunctional spaces (factories, adventure centres - Autostadt in Wolfsburg), museums, car exhibitions, and race tracks. In the next chapter, following an introduction to the problem of events, the author describes events related to car tourism, including races, rallies, driving schools and car fairs. The book ends with a summarizing chapter, which includes a model of the function of car tourism as a separate type of tourism, as well as a discussion presenting the main features, advantages and disadvantages of car tourism in the context of tourism space theory.

The Complete Book of Lamborghini Dec 13 2020

Lamborghini Supercars 50 Years Nov 04 2022 Immerse yourself in this complete guide on Lamborghini's ultimate performance cars. Nearly 50 years ago, upstart high-end sports car manufacturer Lamborghini set the performance car world on its ear with its stunning supercar, the Miura. Wrapped in a svelte Marcello Gandini - designed body and powered by a 350-horsepower V-12 engine, the Miura instantly made every other car look antiquated. In 1974, Lamborghini again shocked the automotive world with the mad Countach (an Italian expression one might utter at the sight of a beautiful woman), another Gandini masterpiece. Wide, low, and menacing, the original Countach completely recalibrated the supercar template. The Diablo replaced the Countach in 1990 as the last of the Lamborghini supercars under the auspices of the "original" company. Audi acquired the company in 1997 and would bring significant German efficiency to bear, turning out the supercars to a new template: the Murielago in 2001, the Gallardo in 2003, the Reventon in 2008, the Aventador in 2011, and, most recently, the appropriately named Huracan. Each one is the ultimate car. Many were collector vehicles from the moment they rolled off the production line. Beneath their stunning bodywork lie chassis and powerplants bristling with the best technology of their respective eras. Lamborghini's latest supercars zip from 0 to 60 miles per hour in under 3 seconds and hit top speeds in excess of 220 miles per hour. Their prices are equally staggering. *Lamborghini Supercars 50 Years* is devoted exclusively to all of Lamborghini's ultimate performance cars. No enthusiast of these world-class sports cars will want to miss it!

Maserati A6G 2000: Frua - Pininfarina - Vignale - Allemano Aug 21 2021 This heavily illustrated book describes for the first time the technical development of the Maserati A6G 2000. In 1950, Maserati replaced its first production car, the two-door A6 1500, with a second series: the A6G 2000. Customers could choose from several designs: a bulky design by Pininfarina, a muscular design from Allemano, the glamorous Coupés and Spyder versions by Frua, and the eccentric Coupé by Vignale. All of these versions were slightly different and were among the rarest and most expensive cars of their time. This heavily illustrated book describes for the first time the technical development of the A6G 2000, while also telling the individual histories of each of the versions, from chassis to body.

Marcello Gandini Feb 01 2020 That Marcello Gandini is one of the greatest of automobile designers ever has never been disputed, and whether he is the greatest ever, only time and the evolution of automobile design takes, will tell. But there is no doubting Marcello Gandini's immense impact on automobile design in the last four decades of the 20th century that still remains valid well into the 21st century. The Lamborghini Miura to the Maserati Quattroporte IV, the humble Innocenti Mini to the epic Cizeta V16T, Marcello Gandini has designed some of the most epochal of all automobiles. Iconic cars like the first-generation BMW 5 Series, the Audi 50/VW Polo, the Fiat X1/9, the Lamborghini Countach and the Diablo, the Lancia Stratos, the Renault Magnum super truck, and many others have all flowed his stylistic pen. -- Designing automobiles that really defined the late 1960s, 1970s, 1980s, even the 1990s, Marcello Gandini is, arguably, the one of the greatest impact, the one who changed automotive design the most.

Tom Hartley Jul 20 2021 The car world is full of fascinating characters, but few have a story to tell quite as remarkable and inspirational as Tom Hartley. Walking out of school at the age of 15, unable to read or write, Hartley set up his own business buying and selling cars. From that moment, he defied logic and ripped up the rule book on his way to the top. Today he runs one of the most successful independent family run performance and luxury car businesses in the world. He has built up an unrivalled reputation as "The Dealmaker." Tom has been at the top for over 40 years, surviving and thriving through four recessions, and overcome three life threatening illnesses. In his own brutally honest words, Hartley tells his gripping story of a boy from a traditional working class family who swapped the classroom for the cut-throat world of Glasgow's car auctions, buying and selling his first car at the age of 12. Having decided to drive himself around illegally, he was caught at 15 when he had his first car crash, and they don't come more spectacular than writing off a Ferrari Dino - nothing has ever been normal in the world of Tom Hartley! Hartley had made his first million by the age of 17, but soon suffered major setbacks as his business went bust, and he found himself at risk of losing his sight without major surgery. Hartley started all over again, building a mobile home with his wife and working from the back of a car. He had gone from hero to zero, but his burning desire to be the best saw him climb his way back to the top. His ability to overcome adversity in some of the most bizarre places has become legendary, like buying a car in a sauna, while stuck in a traffic jam on a motorway, and even in a swimming pool! Family has played a key part in Tom Hartley's success. Tom Hartley story, his wife has been at his side all the way, and his two sons have followed closely in their father's footsteps. Indeed Tom's belief in family is one of the inspiring messages that has come through. Hartley's inspirational story is about the unshakeable belief in his own abilities, from a precocious schoolboy who had a dream, and then through sheer hard work and a burning desire to make the dream come true. This is not just a book for car enthusiasts but for anyone who has dared to dream. It's a story that will inspire and motivate, and proves you can make the wildest dreams come true if you want it badly enough. Tom's remarkable story is written with the collaboration of journalist Ken Gibson, for 24 years, award-winning Motoring Editor of The Sun newspaper.

The Lamborghini Miura Bible Apr 28 2022 The only book on the Lamborghini Miura published in the past 26 years - and enthusiasts agree it is long overdue. Scalextric May 30 2022 First published in 1981, this book has long been recognized as the 'bible of Scalextric', providing a complete catalogue of the cars and equipment produced. Now, for the seventh edition, the book has undergone a transformation, with a complete redesign and masses of new information about cars, sets and accessories produced around the world. As well as details about earlier periods, there is full coverage of all the new Scalextric products launched in the four years that have elapsed since the previous edition. Now containing nearly 1,000 product photos, this book has become an extraordinarily detailed summary of everything in the world of Scalextric, written by an author who has been captivated by the subject for nearly 50 years.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles 2020 The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles, and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate

Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.
