Northern Cross May 19 2021 Private pilot George Ashton seems to have it all: the dream job, the beautiful wife, the lovely home...and twenty-five years of guilt from a college caper gone murderously wrong. When his past catches up with him in the sinister form of Brady Keyes, it's all too clear that the visit is about more than just sharing old times. Brady is looking for a pilot to fly a very special--and highly illegal--mission. Manipulated and exploited, George piles betrayal on betrayal in a desperate attempt to reclaim his life--and as the stakes escalate, he discovers that to challenge the forces ranged against him, he must dare as he never dreamed.

Human Error in Aviation Feb 02 2020 Most aviation accidents are attributed to human error, pilot error especially. Human error also greatly effects productivity and profitability. In his overview of this collection of papers, the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents. Human factors research reveals a more accurate and useful perspective: The errors made by skilled human operators - such as pilots, controllers, and mechanics - are not root causes but symptoms of the way industry operates. The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient.
