The Oxford Handbook of Professional Service Firms Apr 25 2022 Over the past three decades the Professional Service Firm (PSF) sector has emerged as one of the most rapidly growing, profitable, and significant in the global economy. In 2013 the accountancy, management consulting, legal, and architectural sectors alone generated revenues of US\$ 1.6 trillion and employed 14 million people. PSFs play an important role in developing human capital, creating innovative business services, reshaping government institutions, establishing and interpreting the rules of financial markets, and setting legal, accounting and other professional standards. The study of PSFs can offer insights into the contemporary challenges facing organizations within the knowledge economy, and deepen understanding of more conventional organizations. Despite their significance, however, PSFs have until recently remained very much in the shadows of organizational and management research. The Oxford Handbook of Professional Service Firms marks the coming of age of PSF scholarship with a comprehensive and integrative exploration of current research and thinking on PSFs, featuring contributions from internationally renowned scholars in the fields of organizational and management studies. It is divided into three distinct sections - the professions, the firms, and the professionals that work within them - and covers subjects from governance and leadership to regulation, entrepreneurship, and diversity. Bringing together a broad range of empirical and theoretical perspectives, the Handbook offers many potentially important insights into the contemporary challenges of organizations in the knowledge economy and suggests new lines of inquiry that may shed further light on the activities and performance of PSFs and the professionals who work within them.

Handbook of Policing, Ethics and Professional Standards Dec 22 2021 Low confidence in the police and the increasing crime rates during the 1990s led to a series of government initiatives directed at changing both the structure and management of the police service. In 2006 in an attempt to define what a principled police service should resemble, the Home Office Minister, Hazel Blears, announced the development of new Code of Professional Standards for the police service, informed by the Taylor Review of 2005. While there has been a growing awareness of the role of Professional Standards within law enforcement activity, to date there has been little scholarly debate on the understanding of ethics and how that is applied to practical policing. This book provides a single text of different perspectives on how professional standards and ethics has been conceptualised and developed into practical policing processes for the purposes of policing, not only by the police but also by the partner agencies. Leading academics and practitioners consider the moral minefield of policing through examinations of undercover operatives, MI5 and deaths in police custody as well as looking forward to the future considerations and practices in professional conduct. It will be of interest to those working within the field of policing as well as students and academics focussed on policing and criminal justice.
