Global Governance and the UN May 19 2021 In the 21st century, the world is faced with threats of global scale that cannot be confronted without collective action. Although global government as such does not exist, formal and informal institutions, practices, and initiatives—together forming "global governance"—bring a greater measure of predictability, stability, and order to trans-border issues than might be expected. Yet, there are significant gaps between many current global problems and available solutions. Thomas G. Weiss and Ramesh Thakur analyze the UN's role in addressing such knowledge, normative, policy, institutional, and compliance lapses. The UN's relationship to these five global governance gaps is explored through case studies of some of the most burning problems of our age, including terrorism, nuclear proliferation, humanitarian crises, development aid, climate change, human rights, and HIV/AIDS.

World Social Science Report 2013 Changing Global Environments Apr 29 2022 This book represents a comprehensive overview of the field gathering the thoughts and expertise of hundreds of social scientists from around the world. This edition focuses on the transformative role of the social sciences in confronting climate and broader processes of environmental change.

Global Solutions, International Partnerships Nov 05 2022 The climate crisis and the COVID-19 pandemic remind us that we cannot face down our challenges alone—our solutions must be global. The European Investment Bank is at the heart of the push to turn EU policy initiatives into real development solutions on the ground. This report provides insights into our vital projects and initiatives outside the European Union, data on their impact and ideas for the future of development through a series of expert essays.

Reframing Economic Policy Towards Sustainability Jan 15 2021 In a globalized world economy, delivering the aspirations of sustainability is proving to be difficult. Progress is held back by competing objectives within a complex interplay of factors. Finding solutions to the 'wicked problem' of sustainability seems to be beyond the reach of policy makers. Even if the political will can be found to deal with the prime challenges of the twenty-first century, ranging from climate change and resource depletion to persistent poverty and increasing inequity, what is to be done in terms of real-world policy is far from clear. Do we need more globalization; or has economic globalization gone too far in growing a global economy which will strip the planet bare? This book reports twin-track research which interweaves the intellectual argument over the future of the world economy intertwined with empirical research into the challenge of sustainability in aviation. Discussing the prime challenges of this century through the lens of the intractable policy stalemate in aviation, this book leads the reader to the identification of a new way forward. Whether the political will is forthcoming will continue to be subject to debate, but we now have a clear exposition of how to address the problem. The new paradigm presented in this book opens the way to considering radical transformations to make real progress with the sustainability agenda.

Global Problems, Global Solutions Jul 01 2022 Global Problems, Global Solutions: Prospects for a Better World by JoAnn Chirico approaches social problems from a global perspective with an emphasis on using one's sociological imagination. Perfect for instructors who involve students in research, this text connects problems borne by individuals to regional, global, and historical forces, and stresses the importance of evidence in forming opinions and policies addressing social issues. The book introduces readers to the complexities of the major problems that confront us today such as violent conflict, poverty, climate change, human trafficking and other issues that we encounter in our lives. It book concludes with a chapter on politics and government, underscoring the need for good governance at all levels–and cooperation among many layers of government–to build a better world.

Ten Years to Midnight Jul 21 2021 "Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." --Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

Exceptional Selling Aug 29 2019 Praise for Exceptional Selling "Thull's leading-edge thinking makes this book extraordinary. This straightforward guide to communicating across all cultures with credibility and respect will give you a significant competitive advantage in a complex and crowded global marketplace." —Guenter Lauber, Vice President, Siemens Energy & Automation, Inc., EA Systems "Exceptional Selling may be one of the most important books written on sales and marketing communications for high stakes sales. It shows you how to stand apart from your competition, communicate with great clarity, and position your solution as the most compelling choice for the long term." —Rob Mancuso, Senior Vice President,

Investors Financial Services Corp. "Thull has taken consultative and collaborative sales to new heights. The knowledge in this book is priceless. The trust and respect created by the diagnostic process is a must-have for success here in Asia and around the globe. It enables us to differentiate ourselves early and achieve long-lasting success." —Tay Chong Siew, Major Customer Director, North Asia, BOC Gases "Having achieved exceptional success by working with Thull and implementing the strategy and process in his first two books, I'm astounded that his leading-edge thinking is captured in yet more detail in another brilliant book. The conversation examples of his powerful diagnostic approach will bring even greater success to our organization. Truly exceptional!" —Alberto Chacin, Director of On Demand Services LAD, Oracle USA "Exceptional Selling is a dramatic departure from the vast majority of sales books. It scares me to see all the ways in which we can self-sabotage our sales opportunities-but that's only chapter one. Throughout the book, Thull describes compelling examples of how to succeed in a cluttered marketplace." —Steven Rodriguez, Senior Vice President, Ceridian Corporation "Thull has again extended the concepts and thinking he developed in The Prime Solution and Mastering the Complex Sale. This is an essential read for anyone working to understand his customers in a complex world." —Wayne Hutchinson, Vice President of SalesMarketing and Consulting, Shell Global Solutions International B.V.

Global Visions of Olof Palme, Bruno Kreisky and Willy Brandt Nov 12 2020 This book analyses the global visions of Olof Palme, Bruno Kreisky and Willy Brandt, European social democratic statesmen who earned international esteem for their contributions to global developments during the second half of the twentieth century. Their visions encompassed, inter alia, international peace and security, East-West and North- South Cooperation, and other important domains pertinent to developing countries of Asia, Africa and Latin America. In this volume, the author closely examines the advancements Palme, Kreisky and Brandt made and demonstrates how their visions remain valid for shaping the future of mankind.

From Centralised to Decentralising Global Economic Architecture Sep 10 2020 This book focuses on the recent rise of new regional economic institutions such as the Chiang Mai Initiative Multilateralisation, the Asian Infrastructure Investment Bank, and the Regional Comprehensive Economic Partnership, which were established, in part, as a result of dissatisfaction of dynamic emerging markets with global economic institutions such as the IMF, the World Bank, and the GATT/WTO. The latter were formed by advanced economies in the West, after the historic Bretton Wood Conference of 1944. In doing so, the book addresses how this recent round of decentralisation, defined as the co-existence of "senior" global institutions and a plethora of newly-established regional institutions, has affected global economic governance, and the delivery of global public goods. It also poses the question if this has led to the fragmentation of global economic governance. The book adds value to existing literature by using a benefit-risk analytical framework to study the decentralisation

process. Unlike the "contested multilateralism" argument used by some authors which focuses on the costs of decentralisation, the authors argue that benefits must also be considered. It also describes and analyses the establishment of global and regional international economic institutions and the evolving relationships between the two. Third, the authors argue that this decentralisation process will continue in the postpandemic period and recommend policies to reset the relationship between global and regional institutions. And lastly, the book discusses proposals to reform the international monetary system including the global reserve system with a view to reducing the hegemony of the US dollar. Throughout the book, the role for Asia is also identified, and elaborated on.

Investigations Into Living Systems, Artificial Life, and Real-world Solutions Aug 02 2022 "This book provides original research on the theoretical and applied aspects of artificial life, as well as addresses scientific, psychological, and social issues of synthetic life-like behavior and abilities"--Provided by publisher.

MEDINFO 2021: One World, One Health — Global Partnership for Digital Innovation Sep 22 2021 The World Health Organization defines health as "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity", and its constitution also asserts that health for all people is "dependent on the fullest co-operation of individuals and States". The ongoing pandemic has highlighted the power of both healthy and unhealthy information, so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge, social media has shown how unhealthy misinformation can be spread and amplified, reinforcing existing prejudices, conspiracy theories and political biases. This book presents the proceedings of MedInfo 2021, the 18th World Congress of Medical and Health Informatics, held as a virtual event from 2-4 October 2021, with pre-recorded presentations for all accepted submissions. The theme of the conference was One World, One Health – Global Partnership for Digital Innovation and submissions were requested under 5 themes: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. The Programme Committee received 352 submissions from 41 countries across all IMIA regions, and 147 full papers, 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings. Providing an overview of current work in the field over a wide range of disciplines, the book will be of interest to all those whose work involves some aspect of medical or health informatics.

Global Health Impact Oct 12 2020 "Every year 9 million people are diagnosed with tuberculosis, every day more than 13,400 people are infected with AIDs, every 30 seconds malaria kills a child. Many people suffer and die young because they cannot access essential medicines. This book argues that people have a right to access these medicines and proposes some new Global Health Impact labelling, investment, and licensing strategies that encourage pharmaceutical companies to improve global health (global-health-impact.org/new). The idea is to

rate these companies based on their medicines' impacts. Highly rated companies will get a Global Health Impact label to use on their products. Socially responsible investment companies and universities might also take the ratings into account in making investment or licensing decisions. After arguing that people do have a right to access essential medicines, this book explores this proposal, its philosophical justification, and its prospects for success"--

Almost Global Solutions of Capillary-Gravity Water Waves Equations on the Circle May 31 2022 The goal of this monograph is to prove that any solution of the Cauchy problem for the capillary-gravity water waves equations, in one space dimension, with periodic, even in space, small and smooth enough initial data, is almost globally defined in time on Sobolev spaces, provided the gravity-capillarity parameters are taken outside an exceptional subset of zero measure. In contrast to the many results known for these equations on the real line, with decaying Cauchy data, one cannot make use of dispersive properties of the linear flow. Instead, a normal forms-based procedure is used, eliminating those contributions to the Sobolev energy that are of lower degree of homogeneity in the solution. Since the water waves equations form a quasi-linear system, the usual normal forms approaches would face the well-known problem of losses of derivatives in the unbounded transformations. To overcome this, after a paralinearization of the capillary-gravity water waves equations, we perform several paradifferential reductions to obtain a diagonal system with constant coefficient symbols, up to smoothing remainders. Then we start with a normal form procedure where the small divisors are compensated by the previous paradifferential regularization. The reversible structure of the water waves equations, and the fact that we seek solutions even in space, guarantees a key cancellation which prevents the growth of the Sobolev norms of the solutions.

The United Nations System Dec 14 2020 A reference guide to the United Nations.

Drawdown Sep 03 2022 NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin todecline. So what are we waiting for?

Creating Resilient Landscapes in an Era of Climate Change Oct 31 2019 This book delivers a realistic and feasible framework for creating resilient landscapes in an era of anthropogenic climate change. From across six continents, this book presents fifteen case studies of differing sociocultural, economic, and biophysical backgrounds that showcase opportunities and limitations for creating resilient landscapes throughout the world. The potential to create socio-

ecological resilience is examined across a wide range of landscapes, including agricultural, island, forest, coastal, and urban landscapes, across sixteen countries: Argentina, Australia, Brazil, Denmark, Finland, Greece, Guatemala, Japan, Mexico, Norway, Samoa, South Africa, the United States, Turkey, Uruguay, and Vanuatu. Chapters discuss current and future issues around creating a sustainable food system, conserving biodiversity, and climate change adaptation and resilience, with green infrastructure, nature-based architecture, green-tech, and ecosystem services as just a few of the approaches discussed. The book emphasizes solution-oriented approaches for an "ecological hope" that can support landscape resiliency in this chaotic era, and the chapters consider the importance of envisioning an unpredictable future with numerous uncertainties. In this context, the key focus is on how we all can tackle the intertwined impacts of climate change, biodiversity loss, and large-scale land-cover conversion in urban and non-urban landscapes, with particular attention to the concept of landscape resiliency. The volume provides that much-needed link between theory and practice to deliver forward-thinking, practical solutions. This book will be of great interest to students, researchers, practitioners and policymakers who are interested in the complex relationship between landscapes, climate change, biodiversity loss, and land-based conversion at local, national and global scales.

Seven Ways to Change the World Oct 04 2022 THE SUNDAY TIMES TOP TEN BESTSELLER 'His vision, ideas and passion shine through on every page' Ed Balls 'Compelling, challenging, inspiring and very timely' Piers Morgan 'Immensely powerful and persuasive...I found it exhilarating throughout' Joanna Lumley When the Covid-19 pandemic swept across the globe in 2020, it created an unprecedented impact, greater than the aftermath of 9/11 or the global financial crisis. But out of such disruption can come a new way of thinking, and in this superb new book former UK prime minister Gordon Brown offers his solutions to the challenges we face in 2021 and beyond. In the book, he states that there are seven major global problems we must address: global health; climate change and environmental damage; nuclear proliferation; global financial instability; the humanitarian crisis and global poverty; the barriers to education and opportunity; and global inequality and its biggest manifestation, global tax havens. Each one presents an immense challenge that requires an urgent global response and solution. All should be on the world's agenda today. None can be solved by one nation acting on its own, but all can be addressed if we work together as a global community. However, Brown remains optimistic that, despite the many obstacles in our way, we will find a path to regeneration via a new era of global order. Yes, there is a crisis of globalisation, but we are beginning to see the means by which it might be resolved. Crises create opportunities and having two at once shouldn't just focus the mind, it might even be seen as giving greater grounds for hope. In Seven Ways to Change the World, Brown provides an authoritative and inspirational pathway to a better future that is essential reading for policy makers and concerned citizens alike.

Collaborative Leadership and Global Transformation Jun 19 2021 Collaboration in organizations and group cultures is changing the way we think about leadership as well as individual, social and global transformation. Change is inevitable and the transformations which occur through group synergy are reshaping the world in which we live in every area of community life. We are becoming a more collaborative society. Leaders who understand how to facilitate collaboration are better able to improve performance and motivate people to learn, develop, share and adapt to c hanges at home, at work and throughout the global community. The transformations which occur through this process help each individual and group to reach their highest potential and in the process generate benefits for society and the environment. This book is a blueprint for leaders and individuals to understand this collaborative process and learn how to work together better to create higher levels of synergy and performance in every group effort.

A Divine Invitation to Create a New World Mar 17 2021 Television, radio, newspapers or the internet show a daily dismal world scenario. Every week, every month there is a major civil conflict or a terrorist attack somewhere. All over the world innocent are imprisoned, women are victims of domestic violence, are forced into underpaid labor or sex work. Children are still dying by the millions before they are five years old due to unsanitary conditions, lack of safe drinking water or malnourishment. Malaria and HIV-AIDS kill millions yearly and thousands of adolescents are kidnapped to become rebel soldiers. Autocratic governments deny democratic participation to the majority and suppress ferociously any popular peaceful manifestation. The worlds climate is now threatened due to man-made disequilibrium inflicted on the atmosphere by uncontrolled fumes and gas emissions of all types. Water sources are being poisoned by unscrupulous corporations dumping huge amounts of deadly chemicals into waterways. The inequality between rich and poor nations is so vast that 7 - 10% of the worlds population controls the natural and financial resources of the world at the expense of the rest who have no access to a minimum for survival. The reasons for this hellish situation are multiple and varied. They encompass deeply ingrained religious beliefs, unacceptable economic, military and power disparities, and uncontrolled moral degradation affecting all realms of everyday life. These problems have profound spiritual causes and thus require a spiritual perspective. Discover the origin of the new Divine Invitation and the specific solutions it offers for todays major world problems.
Revise for German GCSE Oct 24 2021 A revision book enabling students to consolidate their skills and achieve the best possible grades in their GCSE exams.
Introduction to Brazilian Law Dec 02 2019 This is an updated edition of the only full-scale book in English on the law of a country that in recent years has emerged as a leading player on the world's stage. Brazil's markets have flourished as courts, legislators and a sophisticated legal elite have continuously adapted foreign rules to the country's realities, giving Brazil a formidable edge in attracting foreign investors. Sixteen notable Brazilian authorities describe and analyse the laws, regulations and jurisprudence in all the major fields

of legal practice and administration, paying detailed attention to such elements as the following: - the multiple interwoven sources of Brazilian law; - administrative agencies and procedures; - Brazil's unique 'social function of contracts' principle; - corporate and related structures; - the new Brazilian civil procedure code and arbitration rules; - constitutional principles and judicial review; - fiduciary transfers and insolvency issues; - complex rules of criminal procedure; - mandatory succession rules; - labour law compliance; - private international law; and - taxation. Each chapter is followed by an up-to-date reference list of works both in English and in Portuguese. This book provides practitioners with information more than sufficient to navigate through any area of Brazilian law. Lawyers and scholars will find here an overview that will continue to be useful as a resource in facing and overcoming the challenges inherent in engaging with Brazil's economy and legal realities.

Global Solutions Feb 25 2022 This new book, after two years' discussion among 70 members in many countries, including the United States, Canada, Mexico, United Kingdom, Netherlands, Poland, Sweden, India, Pakistan, Bangladesh, Mali, Australia, and New Zealand, looks at the root causes of global problems and points the way to solutions. It explains the growing gap between rich and poor, offers routes to greater democracy, exposes the global corporate oligarchy, addresses the tyranny of the banking structure, details the concentrated control of media, explores spiritual approaches to sustainable living, and suggests solutions through civil society, alternative life styles, education, and useful information sources. "Global Solutions is an impressive, well-researched and honest summary of our sorry global predicament which provides vehicles for achieving practical solutions ." -John Bunzl of London, England, founder, International Simultaneous Policy Organisation "I think that humane and concerned world citizens, of all faiths or none, can welcome this book's commitment to our common quest for sensitive celebration of humanity and our world with justice and mature tolerance." -Doug Everingham, former Australian Minister for Health "I have to say WOW! What a wonderful job you all did with it and what a treasure of resources listed at the end." -Lugene Trefsger, Rowan University, New Jersey
International Buisness Review Nov 24 2021
Thinking about Global Governance Aug 22 2021 One of the more prolific and influential analysts of multilateral approaches to global problem-solving over the last three decades is Thomas G. Weiss. Thinking about Global Governance, Why People and Ideas Matter, assembles key scholarly and policy writing. This collection organizes his most recent work addressing the core issues of the United Nations, global governance, and humanitarian action. The essays are placed in historical and intellectual context in a substantial new introduction, which contains a healthy dose of the idealism and ethical orientation that invariably characterize his best work. This volume gives the reader a comprehensive understanding of these key topics for a globalizing world and is an invaluable resource for students and scholars alike.

International Institutions and Economic Development in Asia
Jan 27 2022 Are international and Asian regional institutions serving the development goals of Asian and Pacific Economies as well they should? The global economy, led by the Asia Pacific region, has undergone immense change and growth. Have the existing institutions and arrangements been able to keep pace with those changes in the global economy? International Institutions and Asian Development tackles these questions and is an essential book for the assessment of regional and international institutions, as well as policy prescriptions for reforming them to ensure they deliver on sustainable, peaceful growth and development in the region. Drawing from papers presented to the 32nd Pacific Trade and Development conference in Hanoi in 2007, the contributions by distinguished authors add to the understanding of the purpose, evolution, relevance and gaps in regional and global institutions and their arrangements. Shiro Armstrong is a Research Fellow at the Crawford School of Economics and Government at the Australian National University. Vo Tri Thanh is Director of the Department for International Economic Integration Studies of the Central Institute of Economic Management in Vietnam
Accelerating Leadership Development Dec 26 2021 Proven strategies and innovative solutions for developing and retaining successful leaders Many organizations today are facing a crisis of leadership. As the Baby Boomer generation exits the workforce, companies are struggling to find qualified leaders to fill critical roles. Accelerating Leadership Development offers solutions for leadership development, management, and retention from award-winning development firm Global Knowledge. Accelerating Leadership Development provides a proven model to help companies develop high-potential employees with the competencies and knowledge capital to assume critical roles successfully. It includes practical and rigorous tools that enable organizations to identify targets and predict those targets' success with six measurable factors. With this proven development system, companies can develop a pipeline of ready leaders with high levels of engagement and retention. Features actionable, effective principles and strategies for leadership development using a results-oriented framework Chapters address communication and delegation strategies, effective feedback models, shifting of responsibility and accountability to direct reports, and contemporary coaching and development approaches Based on in-depth research and client interactions from one of the most prominent names in workforce development For any business that experiences a leadership failure or a lack of qualified leaders for vital positions, the consequences can be devastating. This practical and effective guide to leadership development offers real solutions for long-term excellence.
Encyclopedia of Global Warming and Climate Change Mar 29 2022 2008 Best Reference, Library Journal "The impact of global warming is rapidly evolving. This valuable resource provides an excellent historical overview and framework of this topic and serves as a general resource for geography, oceanography, biology, climatology, history, and many other subjects. A useful reference for a wide audience of business professionals and government officials as well as

for the general public; essential for both academic and public libraries." —Library Journal "This is a useful set because of the individual country entries as well as the general-audience language . . ." — Booklist (Starred Review) The Encyclopedia of Global Warming and Climate Change helps readers learn about the astonishingly intricate processes that make ours the only planet known to be habitable. These three volumes include more than 750 articles that explore major topics related to global warming and climate change—ranging geographically from the North Pole to the South Pole, and thematically from social effects to scientific causes. Key Features Contains a 4-color, 16-page insert that is a comprehensive introduction to the complexities of global warming Includes coverage of the science and history of climate change, the polarizing controversies over climate-change theories, the role of societies, the industrial and economic factors, and the sociological aspects of climate change Emphasizes the importance of the effects, responsibilities, and ethics of climate change Presents contributions from leading scholars and institutional experts in the geosciences Serves as a general resource for geography, oceanography, biology, climatology, history, and many other subjects The Encyclopedia of Global Warming and Climate Change provides a primarily nonscientific resource to understanding the complexities of climate change for academic and public libraries. READER'S GUIDE Atmospheric Sciences Climate climate and Society Climate Change, Effects Climate Feedbacks Climate Models Countries: Africa Countries: Americas Countries: Asia Countries: Europe Countries: Pacific Glaciology Government and International Agencies Institutions Studying Climate Change Oceanography Paleo-Climates People Programs And Conventions
PC World Jun 07 2020
International Development Policy May 07 2020 International development cooperation is undergoing a revolution. The authors question how far bilateral and multilateral aid agencies succeed in mainstreaming global issues in their operations and assess how emerging and traditional donors address competing objectives, often with diverging rationales. Cases include Brazil, China and South Africa.
Network World Jul 29 2019 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.
Eco-Responsible Cities and the Global Ocean Apr 05 2020 This book examines the nexus of cities and oceans and the interrelations between the Sustainable Development Goals (SDGs) 11 and 14, just after the first two critical years following the milestone year of hope in 2015. It advocates for actions both for sustainable cities, the largest interconnected and only human ecosystem, and for the global ocean that is the largest physical ecosystem. Cutting-edge concepts and

actions are presented by and for cities and oceans, following the global engagements during the years 2015-2017. In the era of global geopolitics, cities offer major democratic spaces between the micro-regulations of the local communities and the governance of the global commons. The role of education, trust, and citizen empowerment cannot be stressed enough. This book offers an evidence-based, holistic and integrated view of key urban and ocean sustainability issues at the horizon of 2030 and of 2050. The chapters cover the most prominent issues at the heart of the matter, and highlight systemic multi-stakeholder eco-responses towards sustainability with economic, social, environmental dimensions, including political and cultural aspects. This book offers a full exploration of cities and seas with an emphasis on vigorous paradigm shifts, redesigning human systems, and reconciling them with nature. Building on robust evidence, and transformational cases, it provides structured advice for world leaders, stakeholders and scholars.
Network World Jun 27 2019 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.
A Guide to Global Private International Law Mar 05 2020 "[This book addresses] specific areas/aspects of private international law and [considers] the existing global solutions and the possibilities of improving/creating them. Where appropriate, the chapters are co-authored by experts from different legal perspectives in order to achieve as balanced a picture as possible. The range of contributions includes authors from Europe, North America, Latin America, Africa, Asia and Oceania"--
Global Studies Directory Apr 17 2021 The Global Studies Directory identifies people and institutions who have been key in the field of Global Studies or made an impact on the formation of a global world.
Global Clinical Trials for Alzheimer's Disease Feb 13 2021 Global Clinical Trials for Alzheimer's Disease is a handy one-stop reference for researchers and physicians planning and conducting global clinical trials in this area. This book addresses important considerations that may arise during the successful design and execution of these trials, including site selection, local regulatory issues, pharmacogenomics, ethical matters and much more. Given the saturation of traditional clinical trial markets and the worldwide progression of Alzheimer's disease, there is a need to focus on clinical trials in emerging markets and developing countries. This book provides you with a practical approach to recognizing the opportunities and tackling the challenges that are present during the planning and execution of global clinical trials for Alzheimer's disease. Written by leading experts with hands-on experience in designing and running global Alzheimer's disease and other neurodegenerative diseases clinical trials A step-by-step guide that provides critical information on the design, conduct and standardization necessary to effectively execute clinical trials and

accelerate drug development in this area Includes practical examples, ethical considerations, lessons learned and other valuable tools to aid the planning and implementation of Alzheimer's disease global clinical trials in emerging markets and developing countries

Minding the Gap Between Restorative Justice, Therapeutic Jurisprudence, and Global Indigenous Wisdom Jan 03 2020 Foundational principles of the contemporary practices of both restorative justice and the concept of therapeutic jurisprudence often import organic and indigenous practices of conflict resolution to resolve insufficiencies and even to explain fundamental ideas. Too often, the indiscriminate use of such practices does not mind the gap between the defining principles, the guiding principles, or the limiting principles that challenge particular features of practical applications. Minding the Gap Between Restorative Justice, Therapeutic Jurisprudence, and Global Indigenous Wisdom gives an authentic voice to practitioners and theorists whose work originates in organic or indigenous conflict resolution. It raises awareness of the diversity of approaches to dispute resolution from the deep perspective of their foundations and understands the challenges that arise in the practical application of restorative justice and therapeutic jurisprudence models when using principles disconnected from their foundation. It further offers ways to bridge the gap so that it is no longer an obstacle but a source of transformation. Covering topics such as justice praxes, indigenous conflict resolution, and global indigenous wisdom, this premier reference source is a dynamic resource for HR managers, lawyers, government officials, mediators, counselors, students and faculty of higher education, librarians, researchers, and academicians.

Global Trends in Computing and Communication Systems Aug 10 2020 This two-volume set, CCIS 0269-CCIS 0270, constitutes the refereed post-conference proceedings of the International Conference on Global Trends in Computing and Communication, ObCom 2011, held in Vellore, India, in December 2011. The 173 full papers presented together with a keynote paper and invited papers were carefully reviewed and selected from 842 submissions. The conference addresses all current issues associated with computing, communication and information. The proceedings consists of invited papers dealing with the review of performance models of computer and communication systems and contributed papers that feature topics such as networking, cloud computing, fuzzy logic, mobile communication, image processing, navigation systems, biometrics and Web services covering literally all the vital areas of the computing domains.
