Sea Eagle Down Jun 29 2022 World War II is raging when virtually an entire squadron of new fighter planes depart Tarawa for a seven hundred mile flight south. It's supposed to be a routine trip, but only Lt. Jack Page, a member of the Marine Corps Reserves, makes it to his destination. Twenty-two other pilots are missing, and it's up to Major Rum Collins to find out what went wrong. With so many messages rocketing across the Pacific, it is hard to track down any of the pilots. Collins wonders where they are, why no emergency radio signals were detected and if it's possible that the Japanese somehow took the pilots as prisoners. While Collins and his close circle of fellow Marines know that they are investigating one of the worst disasters in aviation history, they keep the story under wraps. The investigation is labeled top secret, and everyone waits for the truth to be discovered in Sea Eagle Down.

The Bible, the Koran, and the Talmud Mar 15 2021 This collection of important scriptural stories was drawn from the Koran and other Arabic manuscripts describing the lives of the prophets. The introduction speculates that Mohammed's instruction in Jewish and Christian tradition was given to him orally by people from those faiths. Some footnotes compare the stories collected here with the same stories from the Talmud or Bible or otherwise comment on the differences in detail.

I'm Back... Nov 03 2022 As an investigative journalist, E.J.'s first priority is to report the truth, no matter the cost. But this time, the price is too high. An oblivious world suddenly finds itself on the receiving end of judgment. A strange visitor, possessing what appears to be supernatural powers, levels charges of negligence against the third planet from the sun and conveys a cryptic message: "In seventy days, your most precious asset will be taken from you." This announcement sends shockwaves of fear and anger across the globe. Reluctantly, E.J. becomes much more than just an objective observer. In the process, he discovers the truth about this "most precious asset" and the origin of the unknown visitor. He now understands that the day could be coming when tomorrow might not. E.J. feels uncontrollably compelled to record these events. His hope is that the world will figure it out before it's too late?

[A Philosophy of Madness](#) Apr 27 2022 The philosophy of psychosis and the psychosis of philosophy: a philosopher draws on

his experience of madness. In this book, philosopher and linguist Wouter Kusters examines the philosophy of psychosis—and the psychosis of philosophy. By analyzing the experience of psychosis in philosophical terms, Kusters not only emancipates the experience of the psychotic from medical classification, he also emancipates the philosopher from the narrowness of textbooks and academia, allowing philosophers to engage in real-life praxis, philosophy in vivo. Philosophy and madness—Kusters's preferred, non-medicalized term—coexist, one mirroring the other. Kusters draws on his own experience of madness—two episodes of psychosis, twenty years apart—as well as other first-person narratives of psychosis. Speculating about the maddening effect of certain words and thought, he argues, and demonstrates, that the steady flow of philosophical deliberation may sweep one into a full-blown acute psychotic episode. Indeed, a certain kind of philosophizing may result in confusion, paradoxes, unworldly insights, and circular frozenness reminiscent of madness. Psychosis presents itself to the psychotic as an inescapable truth and reality. Kusters evokes the mad person's philosophical or existential amazement at reality, thinking, time, and space, drawing on classic autobiographical accounts of psychoses by Antonin Artaud, Daniel Schreber, and others, as well as the work of phenomenological psychiatrists and psychologists and such phenomenologists as Edmund Husserl and Maurice Merleau-Ponty. He considers the philosophical mystic and the mystical philosopher, tracing the mad undercurrent in the Husserlian philosophy of time; visits the cloud castles of mystical madness, encountering LSD devotees, philosophers, theologians, and nihilists; and, falling to earth, finds anxiety, emptiness, delusions, and hallucinations. Madness and philosophy proceed and converge toward a single vanishing point.

Rising Wolf, the White Blackfoot Nov 10 2020 *Rising Wolf, the White Blackfoot: Hugh Monroe's Story of His First Year on the Plains* tells the true story of Hugh "Rising Wolf" Monroe, who came to the Blackfoot country when he was 16 and took part in buffalo hunts, accompanied war parties, saw parts of the United States no white man had ever seen before and helped make peace between the Crows and Blackfeet. Monroe died at ninety-eight and his body lies in Two Medicine Valley, "in full sight of that great sky-piercing height of red rock on the north side of Two Medicine Lake, which we named Rising Wolf Mountain."

There Are No Such Things As Theories Sep 08 2020 *There Are No Such Things as Theories* considers the fundamental question: what is a scientific theory? It presents a range of options - from theories are sets of propositions, to theories are families of models, abstract artefacts, or fictions - and highlights the various problems they all face. In so doing it draws multiple comparisons between theories and artworks: on the one hand, theories are like certain kinds of paintings with regard to their representational capacity; on the other, they are like musical works in that they can be multiply presented. An alternative answer to the question is then offered, drawing on the metaphysics of musical works: there are no such things as theories. Nevertheless, we can still talk about them, since that talk is made true by the various practices that scientists engage in. The implications of this form of eliminativism for the realism debate is then discussed and it is concluded that this may offer a more flexible framework in which we can understand both the history and the philosophy of science in general.

Nephilim Jan 31 2020 Two years ago, Art "Mac" Mackenzie was a respected newspaper journalist with a wonderful family and a great future. Now he lives by himself, eking out an existence as a freelance writer. His faith in God, humanity, and virtually everything else is gone. What's left is a pile of bills and the ache of his eldest son's death. Enter a woman in a psychiatric ward, with an off-the-wall story of how aliens abducted her, created a baby within her, and later stole it. From her seemingly twisted account springs the potential media story of the century . . . and more trouble than Mac has ever imagined. In this engrossing page-turner, Mac follows his story to Israel, where he comes across the remains of one of the nephilim: an ancient biblical giant, sired by demons and born of human women. Mac's encounter is just the tip of a terrifying supernatural iceberg — for the nephilim are back on earth. And Mac has stumbled onto their secret. Nephilim winds from the Holy Land to the Nevada desert, through mind-numbing dangers and choices that will affect the future of the human race. Just one hope stands between Mac and destruction: the power of the risen Messiah. But can it save Mac and his children from the evil spiritual forces that spawned the nephilim? Or fulfill his agonizing quest for meaning and purpose in life?

Compendium Creationis: The Universal Symbolism of Aquarius Genesis Oct 22 2021 "In the Beginning when nothing was created yet, God created NUMBER ... " Classical Occultism - i.e. Spiritual Tradition - very often rests on imitation of old usages and forgotten rituals - or on texts and images the inner (i.e. esoteric) content of which is recognized only by Initiates. This most typically applies for old sacred scriptures where cosmic and supracosmic processes are commented on under the veils of ciphers, myths, pseudo-history, and tales about countries or family clans. Creation myths of all cultures throughout space and time most clearly illustrate this fact: They report how a God - or a community of gods - conjure "out of nothing" a Universe along with its physical and spiritual processes that are, usually, consciously perceived again only by Initiates. Modern Science since the century of "Enlightenment" has always tried to supplant such myths by so-called "objective" discoveries and "facts". However, it has become clear, more and more, that those "scientific" views are just another myth - but which remains blind to the essence of things, namely: to what we call Spirit, Light and Life. The popular myth of the "Big Bang" - so typical for noise and aggression in our modern world - is the grossest cankerous outgrowth thereof. The present book brings a Genesis in twelve Theses, in a modern language on the basis of the simplest symbols ever. Its elucidations by P. Martin, occasionally using some neologisms for relations never described before, include the paradigmata of oldest myths, but in the meantime formulate a consequent synthesis of modern Physics and classic spirituality: It also shows where the fundamental Hermetic laws come from; how divine idea-forms grow into material realities; how the Kingdoms of Nature came forth - and the principles of the spiritual Path of Transfiguration leading to the redemption of Humanity. Besides the Aquarius Genesis this book contains two tales in a typical mythic style, making visible the inner Plan of the Universe, along with a scenic dialogue and a classic philosophical treatise: "About the Essence of Being" is a modern theory of ideas which - authored 60 years ago - already achieves to reduce all processes to vibration cycles, and to Energy. Numerous pictures, some of them full-page, and in-depth Notes explaining further the text and images complete this book. An international review comments: "Thus it must be: Old Truths of the Past are being confirmed by the new Truths of today !"

Voices from Early China May 29 2022 The Chinese "Book of Odes" (Shijing) is a collection of 305 poems dating from between 1000 and 600 B.C., and, thus, is one of the earliest literary works in any living language. It offers vignettes of life in an almost unimaginably remote society; many of the poems have great charm, for instance, some are authored by women about their love problems. (For such early literature it is remarkable how many poems are by women.) Over the centuries the content of the Odes has become obscured by developments in the Chinese language, by prudishness and pomposity on the part of commentators, and because earlier translators were often more interested in philological technicalities than in the poems' human significance. This book cuts through these obscurities to present a new translation into straightforward, down-to-earth English. The Odes are the earliest rhyming poetry in any language, and they make use of alliteration and assonance to achieve their poetic effects, but changes in the sounds of modern Chinese have destroyed all this speech-music. This book restores it: alongside the author's translations, it spells the Chinese wording out in the sounds used by the original poets—something which has only recently become possible through advances in the reconstruction of Old Chinese speech.
