The Master Key System Nov 06 2020 The Master Key System is a personal development book by Charles F. Haanel that was originally published as a 24-week correspondence course. The ideas it describes and explains come mostly from New Thought philosophy. It was one of the main sources of inspiration for Rhonda Byrne's film and book The Secret. The book describes many beliefs such as the law of attraction, creative visualization and man's unity with God, and teaches the importance of truth, harmonious thinking and the ability to concentrate.

[Independent Power Projects in Sub-Saharan Africa](#) Jun 01 2020 Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse loans, with long-term power purchase agreements with the state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-Saharan Africa and are now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

[Communication and Cooperation in Early Imperial China](#) Feb 09 2021 Challenges traditional views of the Qin dynasty as an oppressive regime by revealing cooperative aspects of its governance. This revealing book challenges longstanding notions of the Qin dynasty, China's first imperial dynasty (221–206 BCE). The received history of the Qin dynasty and its founder is one of cruel tyranny with rule through fear and coercion. Using a wealth of new information afforded by the expansion of Chinese archaeology in recent decades as well as traditional historical sources, Charles Sanft concentrates on cooperative aspects of early imperial

government, especially on the communication necessary for government. Sanft suggests that the Qin authorities sought cooperation from the populace with a publicity campaign in a wide variety of media—from bronze and stone inscriptions to roads to the bureaucracy. The book integrates theory from anthropology and economics with early Chinese philosophy and argues that modern social science and ancient thought agree that cooperation is necessary for all human societies.

The Power of the Mine Sep 04 2020 The mining industry could play a key role in Africa's energy sector, since it requires power in large quantity and reliable quality to run its processes. The integration of mining with power system development, with appropriate risk mitigation mechanisms, could bring a win-win solution to utilities, mines, and people at large.
