The Land of Israel as a Political Concept in Hasmonean Literature Jun 26 2019

**The Dedalus Book of Vodka** Feb 12 2021 No other drink can claim to have influenced the course of human affairs more than vodka. The green serpent transformed the Russian state into a great power but it helped to destroy both tsarism and communism as well as the lives of millions of Russian peasants. From Boris Yeltsin being dropped in a font and Shostakovich being cured of writer's block to the great vodka debauch of the Russo-Japanese War and the Churchill-Stalin drinking duel at Yalta, the spirit determined the lives of individual Russians and the fate of a nation. Both sophisticated and brutal, vodka is the best-selling spirit in the world. Distilled from rye or the humble potato, it has been known since the fourteenth century, when it was first used as a medicine, but it took James Bond and the Cold War to make it glamorous in the West, particularly with younger drinkers. The first mention of vodka in English was made by a Scotsman, Captain Cochrane, who drank the liquid serpent while in Russia in 1820. He called it 'vodka(whisky)', a sketchy comparison, at best. Any respectable Caledonian will insist whisky-drinking is far too important an activity to involve the complementary consumption of food. Vodka-drinking, on the other hand, is too important to be undertaken without food. English drinkers have never got the hang of this crucial detail. The new Dedalus Book of Vodka by Geoffrey Elborn contains an extract from Angel Pavement (1930) by J.B. Priestley, 'the first appearance of vodka in English fiction', in which Mr Golspie, a shady businessman, induces Miss Matfield, a proper typist, to down a glass or two. Miss Matfield thrills to the 'incendiary bomb' which 'had burst in her throat and sent white fire racing down every channel of her body'. It is delightful, but it lacks an essential ingredient: the pickle. 'Absent Friend in The Times Literary Supplement' Chekhov was more ambivalent. As Geoffrey Elborn shows in his new cultural history, The Dedalus Book of Vodka, he was torn between his knowledge as a doctor and his understanding of human nature. Two of his brothers were alcoholic, and he denounced vodka companies as 'Satan's blood peddlers.' But he sympathised with the Russian peasantry, for whom vodka was nectar. And in his stories and plays, those who drink excessively are portrayed with humour and compassion. Blake Morrison in *The Guardian*

**The Concept of Nature in Marx** May 30 2022 In *The Concept of Nature in Marx*, Alfred Schmidt examines humanity's relation to the natural world as understood by the great philosopher-economist Karl Marx, who wrote that human beings are 'part of Nature yet able to stand over against it; and this partial separation from Nature is itself part of their nature'. In Marx, industry and science are the mediation between historical man and external nature, leading either to reconciliation or mutual annihilation. Schmidt explores this tension between man and nature in Marx and shows how his understanding of nature is reflected in the work of writers such as Bertolt Brecht, Walter Benjamin and Ernst Bloch.

**BAM Global Movement** Feb 01 2020 Business as Mission (BAM) is a growing global movement. Christians active in the arena of business, charity and church are on a journey to integrate business and holistic mission. But what exactly is BAM? In the book, Gea Gort and Mats Tunchag explain the BAM concept through theory and theology, with stories to show what it looks like in real life. The authors explain that Business as Mission is an expression of a much broader movement. Ideas regarding mission, church, and charity are shifting, and growing number of Christians are aiming for a missional way of living out the whole incarnated gospel in their daily lives where they work and live. The inspiring stories of thirty practitioners active on all continents provide insight into how gospel passion can be shared in innovative and practical ways in challenging settings: in developing nations, secularized Western cities, or even closed countries. This book will not only capture your mind and heart as you learn about Business as Mission in theory and praxis, but it will also give you a broad overview of this remarkable movement. This book provides insight into this global movement and is of interest for a broad range of people: pioneers, early adapters and leaders within church, mission, and business, but also for Bible schools and universities.

**Advertising: Concept and Copy (Third Edition)** Jan 14 2021 'Advertising' covers the conceptual process, from developing smart strategy to executing it with strong, distinctive copy. Over 200 advertisements demonstrate the strong thinking and writing that underlie the best advertising.

**Self-Concept Dec 01 2019** The aim of this book is to discuss the notions of self-concept, self-esteem, and related terms from an educational and psychological perspective. Specifically, this book is concerned with developing a model of self-concept -- and corollaries to this model -- that assesses the dimensionality of self-concept, reviews tests of self-concept, discusses the relationship between self-concept and other variables (particularly achievement), describes the development of self-concept, and evaluates programs to enhance self-concept. Throughout this volume, emphasis is placed on ordering the many studies using recent methodological advances such as meta-analysis and the analysis of covariance structures. After detailing a conceptual model of self-concept, the book offers various experimental and statistical discussions of the model. Unlike many other models, the claim is not that this model is the correct one but that it may serve as a useful "coathanger" until a better one is devised.

**The Advertising Concept Book** Sep 21 2021 Now thoroughly revised and updated, this systematically presented coursebook tells you everything you need to know about advertising, from how to write copy and choose a typeface, to how agencies work and the different strategies used for print, TV or cinema and other media, including interactive. Exercises throughout help the reader judge their own work and that of others. By getting to the heart of the creative process in a way that other guides don't, the book can help anyone produce better advertising. This new edition features a thoroughly revised and updated chapter on interactive advertising, with new exercises and some thirty new illustrations. 'Invaluable' Creative Review 'Enormously encouraging, practical and entertaining. If this book could stand in front of a class (of creative students) and talk, I'd be out of a job.' Tony Cullingham, Course Director, The Watford Creative Advertising Course, West Herts College

**The Big Book of Concepts** Mar 16 2021 Concepts embody our knowledge of the kinds of things there are in the world. Tying our past experiences to our present interactions with the environment, they enable us to recognize and understand new objects and events. Concepts are also relevant to understanding domains such as social situations, personality types, and even artistic styles. Yet like other phenomenologically simple cognitive processes such as walking or understanding speech, concept formation and use are maddeningly complex. Research since the 1970s and the decline of the "classical view" of concepts have greatly illuminated the psychology of concepts. But persistent theoretical disputes have sometimes obscured this progress. The Big Book of Concepts goes beyond those disputes to reveal the advances that have been made, focusing on the major empirical discoveries. By reviewing and evaluating research on diverse topics such as category learning, word meaning, conceptual development in infants and children, and the basic level of categorization, the book develops a much broader range of criteria than is usual for evaluating theories of concepts.

**The Concept of the Political** Mar 28 2022 In this, his most influential work, legal theorist and political philosopher Carl Schmitt argues that liberalism's basis in individual rights cannot provide a reasonable justification for sacrificing oneself for the state—a critique as cogent today as when it first appeared. George Schwab's introduction to his translation of the 1932 German edition highlights Schmitt's intellectual journey through the turbulent period of German history leading to the Hitlerian one-party state. In addition to analysis by Leo Strauss and a foreword by Tracy B. Strong placing Schmitt's work into contemporary context, this expanded edition also includes a translation of Schmitt's 1929 lecture "The Age of Neutralizations and Depoliticizations," which the author himself added to the 1932 edition of the book. An essential update on a modern classic, *The Concept of the Political*, Expanded Edition belongs on the bookshelf of anyone interested in political theory or philosophy.

The Concept of the Book Nov 04 2022

**Formal Concept Analysis** Apr 28 2022 This book constitutes the refereed proceedings of the 7th International Conference on Formal Concept Analysis, ICFA 2009, held in Darmstadt, Germany, in May 2009. The 15 revised full papers presented were carefully reviewed and selected from 29 submissions for inclusion in the book. The papers comprise state of the art research and present new results in Formal Concept Analysis and related fields. These results range from theoretical novelties to advances in FCA-related algorithmic issues, as well as application domains of FCA such as data visualization, information retrieval, machine learning, data analysis and knowledge management.

**Maisy's First 123** Jan 02 2020 Lovable Maisy Mouse is counting her favourite animals. Help her count one, two, three, four, five. Butterflies, tortoises, fizzy fish, swirly snails and one stripy tiger will guide you through your first numbers.

**The Architecture Concept Book** Jul 20 2021 Inspired by the complexity and heterogeneity of the world around us, and by the rise of new technologies and their associated behaviors, *The Architecture Concept Book* seeks to stimulate young architects and students to think outside of what is often a rather conservative and self-perpetuating professional domain and to be influenced by everything around them. Organized thematically, the book explores thirty-five architectural concepts, which cover wide-ranging topics not always typically included in the study of architecture. James Tait traces the connections between concepts such as familiarity, control, and memory and basic architectural components such as the entrance, arch, columns, and services, to social phenomena such as gathering and reveling, before concluding with texts on shelter, relaxing, and working. Even in this digital age, Tait insists that "we must always think before we design. We must always have a reason to build." Each theme is accompanied by photographs, plans, and illustrations specially drawn by the author to explain spatial ideas, from the small scale to the urban.

**Fashion Jun 30 2022** Organized according to the product development and marketing process adopted in the fashion industry, the new edition of this introductory text follows products from design concept through to consumer purchase. This complete coverage includes a complete description of global influences on the entire fashion industry.

**Fire Alarm Dec 13 2020** This illuminating study of Benjamin's final essay helps unlock the mystery of this great philosopher Revolutionary critic of the philosophy of progress, nostalgic of the past yet dreaming of the future, romantic partisan of materialism—Walter Benjamin is in every sense of the word an "unclassifiable" philosopher. His essay "On the Concept of History" was written in a state of urgency, as he attempted to escape the Gestapo in 1940, before finally committing suicide. In this scrupulous, clear and fascinating examination of this essay, Michael Löwy argues that it remains one of the most important philosophical and political writings of the twentieth century. Looking in detail at Benjamin's celebrated but often mysterious text, and restoring the philosophical, theological and political context, Löwy highlights the complex relationship between redemption and revolution in Benjamin's philosophy of history.

**The License Giver Business Concept of Technological Innovation** Apr 04 2020 Innovation is one of the avenues in which companies can move up the value chain, and has become a popular demand from stock markets and governments. Many of its proponents though lack insight as to what it takes to be an innovator, and instead hype and impel innovation based on a romanticized view that with enough willpower and support from a board, investors, or government every company can pursue innovation. This book offers a theoretical framework, the License Giver Business concept, that clarifies the core characteristics of a truly innovating company, and differentiates it from three other company archetypes with differing core business identities. It describes key aspects and pitfalls in the practical application of the License Giver Business concept and provides cases from the marine industry and computer industry.

**The Concept of the Positron** Dec 25 2021 Originally published in 1963, *The Concept of the Positron* forms a detailed analysis of quantum theory. Whilst it is not as well known as Professor Hanson's previous book, *Patterns of Discovery* (1958), the text has many interesting aspects. In many ways it goes further than Hanson's earlier work in approaching the problems of theory competition and the rationality of science, topics that have since become central to the philosophy of science. It is also notable for a rigorous and forthright defence of the Copenhagen Interpretation. Taken together, the ideas presented in this book constitute a first-rate achievement in the history and philosophy of science. This paperback reissue comes with a new preface from Matthew Lund, Assistant Professor, Faculty of Philosophy and Religious Studies at Rowan University.

**Bobath Concept Sep 09 2020** Authored by members of the British Bobath Tutors Association, *Bobath Concept: Theory and Clinical Practice in Neurological Rehabilitation* is a practical illustrated guide that offers a detailed exploration of the theoretical underpinning and clinical interventions of the Bobath Concept. The evolution of the Bobath concept is brilliantly captured in this volume. The recognition that the best inhibition may come from engaging the patient in normal activities is an example of the way one of the notions central to the original Bobath Concept has developed. In short, the Bobath Concept lies at the heart of an approach to neurorehabilitation that is ready to take advantage of the rapidly advancing understanding, coming from neuroscience, of brain function in, in particular, of the effects of and responses to damage, and the factors that may drive recovery. It is no coincidence that neuroplasticity figures so prominently in the pages that follow. Emeritus Professor Raymond Tallis BM BCh BA FRCP FMedSci LittD DLitt FRSA This book guides the reader through general principles to more specific application of neurophysiological principles and movement re-education in the recovery of important areas, including moving between sitting and standing, locomotion and recovery of upper limb function. *Bobath Concept: Theory and Clinical Practice in Neurological Rehabilitation* will be invaluable to undergraduate and qualified physiotherapists/occupational therapists and all professionals working in neurological rehabilitation. Covers the theoretical underpinning of the Bobath Concept. Presents a holistic, 24-hour approach to functional recovery. Focuses on efficient movement and motor learning, to maximise function. Forges links between theory and clinical practice. Illustrated throughout.

**The Concept and Present Status of the International Protection of Human Rights** Oct 30 2019 Vulnerable groups : minorities.

**The Concept of an International Organization in International Law** Oct 23 2021 This book asks what the legal definition of an international organization is by examining how they create particular legal systems that derive from international law, and analysing the systems of governance in these organizations.

**The Concept of Sin** Nov 23 2021 This 1912 book was intended to redress the vague and inconsistent conceptions of sin in the early twentieth century.

**The key concept of culture and the Khan family's identity in the film "East is East"** Aug 28 2019 Academic Paper from the year 2022 in the subject English Language and Literature Studies - Other, grade: 1.0, Klagenfurt University, language: English, abstract: When Rudyard Kipling published "The Balled of East and West" a new notion of intercultural competence was created. This very concept is to be elucidated in the proseminar paper with regard to the ballad and the film "East is East". With the ballad providing the backbone for Khan-Din's play (1996) and Damien O'Donnell's film (1999), it is to be discussed in further detail alongside my elucidations on the Khan family's cultural identity and affiliation throughout the course of the film. The paper will concentrate on the Khan family and their - what I deem - a bitter struggle with their cultural identity and belonging, which is also suggested by Delany (2022) and Zapata (2010). Both argue with me in unison that the film displays various manifestations of identity conflicts, proceeding from the pursuit of affiliating to the concept of Britishness. Based on these and other additional scientific texts, the paper will present findings on the Khan family's search for identity and their evolution over the course of the movie. Since the research questions amount to "How does the Khan family evolve throughout the film and in which ways does the concept of East is East, and West is West, and never the twain shall meet apply to their demeanor?", the Ballad of East and West will be referenced oftentimes in the paper. By virtue of the relevance for the film, the paper will also provide a brief elucidation on key concepts such as culture and identity construction. To refer to quotes and scenes from the film, the paper will consistently provide textualization and indicate the respective time frame; still, the paper requires the reader to be acquainted with the movie and its milieu.

**Farriery** Oct 11 2020 This book has been written to appeal to all relevant audiences, i.e. in the tack-room, the forge and the surgery. It is easy to read and understand and above all, the book is informative and thought provoking. The gulf of understanding between owner, farrier and veterinary surgeon is bridged, by bringing together all interested parties to share a common pool of knowledge and understanding of natural biomechanics, technique and systems practiced. A different perception of Farriery has long been overdue. Foot balance is the main quintessential aspect of farriery and the questions of what is normal and what is undesirable have teased farriers and veterinarians for

generations. A number of authors have set down their opinions but none have explored hoof balance in such detail. This book looks at anteroposterior and mediolateral hoof balance, not only defining what is normal and ideal but explaining how, through the forces imposed by the weight of the animal and the levers which make up the limb, the hoof can change shape. Lameness and shoe loss are often considered a reflection of the competence of an individual farrier. This book will help provide the confidence and the evidence to help all parties involved in farriery to understand how form and function are inextricably linked. This book is essential reading for those who are looking to expand their knowledge and for those who seek a more philosophical approach to this ancient craft. It starts as a journey of inquiry, reviewing the past and examining the present, objectively introducing to the reader the wider perspective of farriery; not just about 'shoes on horses' but as a benign manipulative therapy, which forms an integral part of the whole horse concept.

**The Concept of Modernism Jun 18 2021** The term "modernism" is central to any discussion of twentieth-century literature and critical theory. Astradur Eysteinnsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes, but is in fact a product of critical practices relating to nontraditional literature. Intervening in these practices, and correlating them with modernist works and with modern literary theory, Eysteinnsson undertakes a comprehensive reexamination of the idea of modernism. Eysteinnsson critically explores various manifestations of modernism in a rich array of American, British, and European literature, criticism, and theory. He first examines many modernist paradigms, detecting in them a conflict between modernism's culturally subversive potential and its relatively conservative status as a formalist project. He then considers these paradigms as interpretations-and fabrications-of literary history. Seen in this light, modernism both signals a historical change on the literary scene and implies the context of that change. Laden with the implications of tradition and modernity, modernism fills its major function: that of highlighting and defining the complex relations between history and postrealist literature. Eysteinnsson focuses on the ways in which the concept of modernism directs our understanding of literature and literary history and influences our judgment of experimental and postrealist works in literature and art. He discusses in detail the relation of modernism to the key concepts postmodernism, the avant-garde, and realism. Enacting a crisis of subject and reference, modernism is not so much a form of discourse, he asserts, as its interruption-a possible "other" modernity that reveals critical aspects of our social and linguistic experience in Western culture. Comparatists, literary theorists, cultural historians, and others interested in twentieth-century literature and art will profit from this provocative book.

**The Fundamental Concepts of Metaphysics Aug 09 2020** This book, the text of Martin Heidegger's lecture course of 1929/30, is crucial for an understanding of Heidegger's transition from the major work of his early years, *Being and Time*, to his later preoccupations with language, truth, and history. First published in German in 1983 as volume 29/30 of Heidegger's collected works, *The Fundamental Concepts of Metaphysics* presents an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature. Heidegger's concepts of organism, animal behavior, and environment are uniquely developed and defined with intensity. Of major interest is Heidegger's brilliant phenomenological description of the mood of boredom, which he describes as a fundamental attunement of modern times.

**The Concept of Knowledge Nov 11 2020**

**Bow Ties in Risk Management Sep 02 2022** AN AUTHORITY GUIDE THAT EXPLAINS THE EFFECTIVENESS AND IMPLEMENTATION OF BOW TIE ANALYSIS, A QUALITATIVE RISK ASSESSMENT AND BARRIER MANAGEMENT METHODOLOGY From a collaborative effort of the Center for Chemical Process Safety (CCPS) and the Energy Institute (EI) comes an invaluable book that puts the focus on a specific qualitative risk management methodology – bow tie barrier analysis. The book contains practical advice for conducting an effective bow tie analysis and offers guidance for creating bow tie diagrams for process safety and risk management. Bow Ties in Risk Management clearly shows how bow tie analysis and diagrams fit into an overall process safety and risk management framework. Implementing the methods outlined in this book will improve the quality of bow tie analysis and bow tie diagrams across an organization and the industry. This important guide: Explains the proven concept of bow tie barrier analysis for the preventing and mitigation of incident pathways, especially related to major accidents Shows how to avoid common pitfalls and is filled with real-world examples Explains the practical application of the bow tie method throughout an organization Reveals how to treat human and organizational factors in a sound and practical manner Includes additional material available online Although this book is written primarily for anyone involved with or responsible for managing process safety risks, this book is applicable to anyone using bow tie risk management practices in other safety and environmental or Enterprise Risk Management applications. It is designed for a wide audience, from beginners with little to no background in barrier management, to experienced professionals who may already be familiar with bow ties, their elements, the methodology, and their relation to risk management. The missions of both the CCPS and EI include developing and disseminating knowledge, skills, and good practices to protect people, property and the environment by bringing the best knowledge and practices to industry, academia, governments and the public around the world through collective wisdom, tools, training and expertise. The CCPS has been at the forefront of documenting and sharing important process safety risk assessment methodologies for more than 30 years. The EI's Technical Work Program addresses the depth and breadth of the energy sector, from fuels and fuels distribution to health and safety, sustainability and the environment. The EI program provides cost-effective, value-adding knowledge on key current and future international issues affecting those in the energy sector.

**The Donghak Concept of God/heaven May 06 2020** Original Scholarly Monograph

**The Concept of Time Oct 03 2022** The Concept of Time presents the reconstructed text of a lecture delivered by Martin Heidegger to the Marburg Theological Society in 1924. It offers a fascinating insight into the developmental years leading up to the publication, in 1927, of his magnum opus *Being and Time*, itself one of the most influential philosophical works this century. In *The Concept of Time* Heidegger introduces many of the central themes of his analyses of human existence which were subsequently incorporated into *Being and Time*, themes such as *Dasein*, *Being-in-the-world*, *everydayness*, *disposition*, *care*, *authenticity*, *death*, *uncanniness*, *temporality* and *historicity*. Starting out by asking: *What is time?*, Heidegger proceeds to radicalise the concept of time and our relation to it, ending with the question: *Are we ourselves time? Am I time?* William McNeill is currently British Academy Postdoctoral Research Fellow at the University of Warwick England. He has published several articles on Heidegger and is at present co-translating Heidegger's 1929/30 course *The Fundamental Concepts of Metaphysics: World - Finitude - Solitude*.

**Concepts of Space May 18 2021** Historical surveys of the concept of space considers Judeo-Christian ideas about space, Newton's concept of absolute space, space from 18th century to the present. Numerous original quotations and bibliographical references. "Admirably compact and swiftly paced style." — *Philosophy of Science*. Foreword by Albert Einstein.

**Concepts in Surface Physics Sep 29 2019** A tutorial treatment of the main concepts of the physics of crystal surfaces. Emphasis is placed on simplified calculations and the corresponding detailed analytical derivations, that are able to throw light on the most important physical mechanisms. More rigorous techniques, which often require a large amount of computer time, are also explained. Wherever possible, the theory is compared to practice, with the experimental methods being described from a theoretical rather than a technical viewpoint. The topics treated include thermodynamic and statistical properties of clean and adsorbate-covered surfaces, atomic structure, vibrational properties, electronic structure, and the theory of physisorption and chemisorption. The whole is rounded off with new exercises.

**The European Capital Markets Union Jul 08 2020** In March 2015, the Institute for Law and Finance in Frankfurt am Main held a full-day symposium which brought together leading representatives of the public and private sectors to deliver the first high level response to the questions posed by the Commission's Green Paper on Building a Capital Markets Union. These responses are collected in this volume.

**Design Thinking Business Analysis Jun 06 2020** This book undertakes to marry the concepts of "Concept Mapping" with a "Design Thinking" approach in the context of business analysis. While in the past a lot of attention has been paid to the business process side, this book now focuses information quality and valuation, master data and hierarchy management, business rules automation and business semantics as examples for business innovation opportunities. The book shows how to take "Business Concept Maps" further as information models for new IT paradigms. In a way this book redefines and extends business analysis towards solutions that can be described as business synthesis or business development. Business modellers, analysts and controllers, as well as enterprise information architects, will benefit from the intuitive modelling and designing approach presented in this book. The pragmatic and agile methods presented can be directly applied to improve the way organizations manage their business concepts and their relationships. "This book is a great contribution to the information management community. It combines a theoretical foundation with practical methods for dealing with important problems. This is rare and very useful. Conceptual models that communicate business reality effectively require some degree of creative imagination. As such, they combine the results of business analysis with communication design, as is extensively covered in this book." Dr. Malcolm Chisholm, President at AskGet.com Inc. "Truly understanding business requirements has always been a major stumbling block in business intelligence (BI) projects. In this book, Thomas Frisendal introduces a powerful technique—business concept mapping—that creates a virtual mind-meld between business users and business analysts. Frisendal does a wonderful explaining and demonstrating how this tool can improve the outcome of BI and other development projects." Wayne Eckerson, executive director, BI Leadership Forum

**Writing and Immanence Jul 28 2019** Writing and Immanence is a book that is attentive to the unabatingly potent, sometimes agonistic, forces at play in the continuing unfoldings of crises of representation. As immanent doing, the writing in the book writes to destabilise the orthodoxies, conventions and unquestioned givens of writing in the academy and, in so doing, is troubled by the ontogenetic uncertainties of its own writing coming into being. In the always active processualism of presenting, the fragility of word and concept creation animates, what Meillassoux has described as 'the absolute necessity of the contingency of everything'. In working to avoid the formational and structural linearities of a series of numbered consecutive chapters, the book is constructed in and around the movements of the always actualising capaciousness of Acts. In offering engagements with education research and pedagogy and always sensitive to the dynamics of multiplicity, each Act emanates from and feeds into other en(Act)ments in the unfolding emergence of the book. Hence, in agencement, the book offers multiple points of entry and departure. Deleuze has said that a creator is 'someone who creates their own impossibilities, and thereby creates possibilities...it's by banging your head on the wall that you find a way through.' Therefore, the writing of this book writes to the writing, pedagogic and qualitative research practices of those in education and the humanities who are writing to the creation of such impossibilities.

**How to Illustrate and Design Concept Cars Aug 21 2021** The automobile seems to be as popular now as it ever was. Posters of cars still adorn many a child's bedroom wall, and school exercise books are full of doodles of cars. This book takes those notebook sketches and teaches you how to develop them into the car designs you see in magazines. Using simple to follow step-by-step drawings it guides you from pencil sketch to marker rendering, from doodle to highly visual computer generated artwork. Adrian Dewey has worked on designs as diverse as small sports cars to double decker buses, modified motors to concept Formula 1 cars, using various techniques and styles. In this book, he uses his knowledge of the different styles to guide the reader in creating great artwork and designs of their own. The book shows in detail how to use different materials and how to get the most out of each one, whether it be a great pencil sketch or a photo realistic vector illustration. The book also features an easy to follow index for quick reference on different types of drawing.

**The Concept of Discrimination in International Law Apr 16 2021** This book was written as a dissertation for the Doctorate of Laws, University of Amsterdam. I am most grateful, first of all, to Professor A. J. P. Tammes, who acted as Promotor. Throughout my working at this study he managed to afford at the same time guidance, inspiration, and complete freedom. I have also benefited much from the suggestions and advice of Dr. Th. e. van Boven of the Dutch Ministry of Foreign Affairs, Member of the U.N. Commission on Human Rights, who was a very helpful Co referent. In earlier stages of the work, the critical remarks by Mr. S. A. Kuipers, Dr. H. Meijers and Miss J. M. van Wouw were of great importance to me. So was the experience of participating in the program of graduate studies of the Columbia University School of Law, in 1968- 1969, how gratitude to the Amsterdam Law Faculty for having offered this opportunity to me. I am indebted to Miss Sinja Alma for her transforming a chaotic manuscript into a neat typescript in a most capable and patient manner; to Miss E. D. J. Jongsens for her assistance in sorting out the United Nations documentation; and to Howard S. Gold (Gersono vitch), who was so kind as to correct the faults in my English. Since I went on tinkering with the text I am to blame for all linguistic errors in it. The research for this study was concluded in October, 1972.

**The Logic System of Concept Graphs with Negation Jan 26 2022** The aim of contextual logic is to provide a formal theory of elementary logic, which is based on the doctrines of concepts, judgements, and conclusions. Concepts are mathematized using Formal Concept Analysis (FCA), while an approach to the formalization of judgements and conclusions is conceptual graphs, based on Peirce's existential graphs. Combining FCA and a mathematization of conceptual graphs yields so-called concept graphs, which offer a formal and diagrammatic theory of elementary logic. Expressing negation in contextual logic is a difficult task. Based on the author's dissertation, this book shows how negation on the level of judgements can be implemented. To do so, cuts (syntactical devices used to express negation) are added to concept graphs. As we can express relations between objects, conjunction and negation in judgements, and existential quantification, the author demonstrates that concept graphs with cuts have the expressive power of first-order predicate logic. While doing so, the author distinguishes between syntax and semantics, and provides a sound and complete calculus for concept graphs with cuts. The author's treatment is mathematically thorough and consistent, and the book gives the necessary background on existential and conceptual graphs.

**Freedom to Teach and Learn Literature Mar 04 2020** This book is based on the author's practice in teaching and learning literature. It approaches this subject as a privileged context for critical thinking, knowledge construction, and autonomy both for teachers and learners. It emphasizes practice though linking it with theory. Readers will find many examples to clarify explanations. It presents concept mapping as a powerful tool to facilitate one's expression of thinking+feeling+acting when experiencing a literary text. The book offers the opportunity of a hands-on participation in working with concept maps and of interacting with the author through email, if the reader feels like doing it. The aim here is to suggest ways to achieve a context of freedom and autonomy in literature classes as well as to encourage more readers to love reading and literature.
