[Guidelines for Writing Effective Operating and Maintenance Procedures](#) Sep 21 2019 The EPA investigation of a 1994 chemical plant tragedy concluded that "the explosion resulted from a lack of written safe operating procedures..." While good written procedures can't guarantee zero accidents, they can reduce the number of accidents caused by human error. This new book shows how to remedy this problem through selecting and implementing actions that promote safe, efficient operations and maintenance, improve quality, continuity, profitability and cost control, build upon and record process experience, and promote the concept that operating and maintenance procedures are vital plant components. It includes practical samples of procedure formats, checklists and many

Guidelines for Safe Process Operations and Maintenance May 10 2021 First-line managers have to maintain the integrity of facilities, control manufacturing processes, and handle unusual or emergency situations, as well as respond to the pressures of production demand. On a daily basis, they are closest to the operating personnel who may be injured by a process accident, and they are in the best position to spot problem conditions and to act to contain them. This book offers these managers "how-to" information on process safety management program execution in the operations and maintenance departments, recommending technical and administrative process safety activities for the entire life cycle of the plant. Helpful tables and references add to the value of this process safety resource.

Guidelines for Safe Process Operations and Maintenance Feb 25 2020 Organized into ten chapters, this book provides a discussion of the roles of first- and second-line operations and maintenance supervisors through the various phases of the life cycle of a plant. Each of the remaining chapters treats one of the phases of the life cycle of a plant: design, construction, pre-startup and commissioning, startup, operation, maintenance, shutdown, decommissioning, and demolition. Each chapter provides guidance, tools, and checklists to assist supervisors in implementing and practicing of process safety program principles.

Union Catalogues of Serials, Guidelines for Creation and Maintenance, with Recommended Standards for Bibliographic and Holdings Control May 30 2020 Union Catalogue of Serials presents the practical optimum for the design, compilation, and maintenance of world-wide standardized union cataloging activities. Particularly valuable for networks, bibliographic agencies, and institutions planning the establishment of a new, or the improvement of an existing, union catalogue of serials. Although the need for common standards in union cataloging has always been recognized, no single set of rules with universal applicability existed--until the publication of this exciting volume. These guidelines introduce codes of good practice and recommended standards for bibliographic and holdings control to be used in the creation and maintenance of union catalogues of serials, bearing in mind the requirements for international exchange. All countries can benefit from the universal relevance provided in these guidelines for improving physical and bibliographic access to serials resources and in making the most of opportunities provided by computerized production. This practical volume gives useful guidance on the components in the preparation and production of a union catalogue of serials, the administrative machinery required to bring each project to fruition, and the interface with other serials control systems and other information networks.

Guidelines for use of fabrics in construction and maintenance of low-volume roads Sep 02 2020 Porous woven and non-woven fabrics have been used in road construction in Region since 1974. The fabrics have been used: 1) as filters for subsurface drainage; 2) separation layers to prevent subgrade soil contamination of base layers; 3) subgrade restraining layers for weak subgrades; 4) earth reinforcement to build retaining walls; 5) erosion control, and 6) water proofing membranes. A reference notebook titled "Fabrics In Construction" is due for release to Region 6 Forests in June 1977. This notebook contains a description of current practices and the state-of-the-art in the use of fabrics in road construction and maintenance. The notebook defines terminology and lists the key factors involved in each usage, and relates the fabric physical and chemical properties to the intended usage. The notebook also contains appropriate technical literature, manufacturers' literature and cost data on the known available fabrics. This report highlights the contents of the reference book and discusses the current knowledge for the use of fabrics in low-volume road construction and maintenance. Present and projected uses of the fabric and the most significant physical properties related to these uses are discussed. Probable future uses and the areas of greatest need for technical knowledge and experience are outlined. The process for moving a fabric or fabric use from the conception and trial use state into full use with standard specifications and design criteria is described.
