Something Completely Different Jul 29 2022 Between Emma Peel and tire Ministry of Silly Walks British television had a significant impact on American popular culture in the 1960s and 1970s. In Something Completely Different, Jeffrey Miller offers the first comprehensive study of British programming on American television, discussing why the American networks imported such series as The Avengers and Monty Python's Flying Circus; how American audiences received these uniquely British shows; and how the shows' success reshaped American television. Miller's lively analysis covers three genres: spy shows, costume dramas, and sketch comedies. In addition to his close readings of the series themselves, Miller considers the networks' packaging of the programs for American viewers and the influences that led to their acceptance, including the American television industry's search for new advertising revenue and the creation of PBS.

Importing Into the United States Aug 18 2021 This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers. Services of General Economic Interest in EU Competition Law Aug 06 2020 This book provides a comprehensive examination of the interaction

between Services of General Economic Interest (SGEI) and EU competition law, covering in particular Article 106 of the Treaty on the Functioning of the European Union (TFEU) and state aid rules. It also takes the telecommunications, postal service and transport sectors as case studies, taking into account the technological, economic and political backgrounds to these sectors. The area of SGEI has undergone fundamental developments over the past three decades and the most recent changes in the Lisbon Treaty, recognizing SGEI as a shared value and granting explicit competence to the EU, mark its constitutional significance. The key issue is how to balance economic values underlying competitive markets and non-economic public service values such as universal access to essential services. The essence of the question is the relationship between the market and the state. This controversial issue is addressed through a critical analysis of a number of landmark EU Court judgments and Commission decisions over the decades. Offering a clear appreciation of the evolution of the EU regulatory framework on SGEI that lays out the limits and boundaries within which the Member States define, organize and fund SGEI, the book is particularly aimed at academics with a research interest in the interaction between public services and EU competition law, but as it also demonstrates clearly how the application of EU competition law has transformed the public utilities sectors, it will be of interest to law makers, legal professionals and policy makers as well. Dr. Lei Zhu is a Research Associate at the Institute of International Law at Wuhan University in Wuhan, China. He studied at the Institute for Competition & Procurement Studies of the Bangor University Law School in Wales, United Kingdom, where he obtained his PhD in law in 2015.

Antitrust Law and Economics Jan 29 2020 In this outstanding new book Professor Keith Hylton and his collaborators examine what antitrust law has become over the past ten years, a time in which economic analysis has become its undisputed core. What has become of the old antitrust doctrine, what are the new issues for the immediate future? This book brings together the leading experts to examine this silent revolution at the core of US domestic policy. Mark Grady, UCLA School of Law, US Hylton's *Antitrust Law and Economics* brings together many of the best authors writing in antitrust today. Their essays range widely, covering proof of agreement under the Sherman Act, group boycotts, monopolization and essential facilities, tying and other vertical restraints, and merger policy. The writing is clear, accessible but still technically sophisticated and comprehensive. This book represents the best in contemporary antitrust scholarship, by authors who understand and are able to communicate the centrality of economic analysis to antitrust. No antitrust lawyer, serious antitrust student, or antitrust economist should be without this book. Herbert Hovenkamp, University of Iowa College of Law, US This comprehensive book provides an extensive overview of the major topics of antitrust law from an economic perspective. Its in-depth treatment and analysis of both the law and economics of antitrust is presented via a collection of interconnected original essays. The contributing authors are among the most influential scholars in antitrust, with a rich diversity of backgrounds. Their entries cover, amongst other issues, predatory pricing, essential facilities, tying, vertical restraints, enforcement, mergers, market power, monopolization standards, and facilitating practices. This well-organized and substantial work will be invaluable to professors of American antitrust law and European competition law, as well as students specializing in competition law. It will also be an important reference for professors and graduate students of economics and business.

International Antitrust Law & Policy: Fordham Competition Law 2012 Jul 17 2021 This volume contains articles and panel discussions delivered during the Thirty-Ninth Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. The chapters are revised and updated before publication, where necessary. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year.

Recent "hot topics" include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.
