Principles and Practices for Response in Second Language Writing Oct 02 2022 Based on the assumptions that students expect feedback and want to improve, and that improvement is possible, this book introduces a framework that applies the theory of self-regulated learning to guide second language writing teachers' response to learners at all stages of the writing process. This approach provides teachers with principles and activities for helping students to take more responsibility for their own learning. By using self-regulated learning strategies, students can increase their independence from the teacher, improve their writing skills, and continue to make progress once the course ends, with or without teacher guidance. The book focuses on the six dimensions of self-regulated learning — motive, methods of learning, time, physical environment, social environment, and performance. Each chapter offers practical activities and suggestions for implementing the principles and guidelines, including tools and materials that teachers can immediately use.

Planning for Cycling Sep 08 2020 Successful cycling planning depends on combining improvements to infrastructure with education. There are chapters examining both national strategies and local initiatives in cities around the world, including such topics as changes to existing road infrastructure and the integration of cycling with public transport. Since education is a critical element in cycling planning, contributors also consider such topics as developing healthy travel habits in the young and ways of promoting cycling. A number of chapters look at the complex relationship between cars and cycling, discussing how roads can be successfully shared between these two modes of transport. With its blend of practical experience and suggestions for improvement, Planning for cycling is essential reading for urban planners, environmental groups and those researching in this area. Describes how creating an effective policy for cycling involves combining improvements to infrastructure with education Chapters examine both national strategies and local initiatives in cities around the world Examines the complex relationship between cars and cycling and discusses how roads can be successfully shared between these two modes of transport

Designing Quality Authentic Assessments Feb 11 2021 This book examines the principles and practice of authentic assessment. It seeks to answer the following questions. What is authentic assessment? How is authentic assessment different from 'performance assessment' or 'alternative assessment'? How can authentic assessment support learner-centred education, especially when a performance-oriented culture favours pen-and-paper examinations? The book is structured into two major parts. The first, 'Principles of authentic assessment design', provides readers with a conceptual explanation of authenticity; the principles for designing quality authentic assessments for valid evidence of student learning; and guidance on how to develop quality rubrics to structure assessment tasks. The second part of the book, 'Theory into practice' provides examples developed by teachers to demonstrate an understanding of authentic assessment. The subject areas covered include humanities, languages, mathematics, sciences, character and citizenship. Two case studies are discussed to demonstrate how authentic assessment can be used to comprehensively address key learning objectives in a variety of curriculum contexts. This book provides practitioners with concrete examples on how to develop authentic assessment to suit their context and also enhance their students' learning. The book will also enable teachers to face assessment challenges present in our changing world.

Ethical Principles and Practice Apr 03 2020 The second volume in applied ethics based on the distinguished Wayne Leys Memorial Lectureship Series. With guidelines from legal reasoning, Michael D. Bayles examines "Moral Theory and Application." Abraham Edel questions "Ethics Applied Or Conduct Enlightened?" The late Warner A. Wick shows in "The Good Person and the Good Society: Some Ideals Foolish and Otherwise" that devotion to ideals need not be either fanaticism or foolishness. John Lachs contends that many public gains are purchased at the cost of individuals being manipulated in "Public Benefit, Private Costs." James E. Childress in "Gift of Life..." considers ethical issues in obtaining and distributing human organs. Carl Wellman in "Terrorism and Moral Rights" argues that there can be no "rights-based justification" for anti-abortion terrorism.
