Quantitative and Statistical Approaches to Geography Nov 22 2019 *Quantitative and Statistical Approaches to Geography: A Practical Manual* is a practical introduction to some quantitative and statistical techniques of use to geographers and related scientists. This book is composed of 15 chapters, each begins with an outline of the purpose and necessary mechanics of a technique or group of techniques and is concluded with exercises and the particular approach adopted. These exercises aim to enhance student's ability to use the techniques as part of the process by which sound judgments are made according to scientific standards while tackling complex problems. After a brief introduction to the principles of quantitative and statistical geography, this book goes on dealing with the topics of measures of central tendency; probability statements and maps; the problem of time-dependence, time-series analysis, non-normality, and data transformations; and the elements of sampling methodology. Other chapters cover the confidence intervals and estimation from samples, statistical hypothesis testing, analysis of contingency tests, and non-parametric tests for independent and dependent samples. The final chapters consider the evaluation of correlation coefficients, regression prediction, and choice and limitations of statistical techniques. This book is of value to undergraduate geography students.

Introduction to Psychology May 21 2022 "This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

Intermediate Algebra: An Applied Approach Apr 27 2020 As in previous editions, the focus in INTERMEDIATE ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Navigating Chapter 9 of the Bankruptcy Code Aug 24 2022 This manual strives to provide a clearer path for judges and clerks of court handling a chapter 9 case. It outlines the statutory requirements and processes that apply in any Chapter 9 case and provides examples of relevant cases and resources. It is organized into several parts including: Part II summarizes the history of Chapter 9 and discusses constitutional challenges to the original municipal bankruptcy laws enacted in 1934 and the structural and constitutional issues analyzed by lower courts in the context of Chapter 9. Part II presents an overview of the Chapter 9 process, contrasting it with the Chapter 11 process and providing several primers on issues unique to a Chapter 9 case. This section also includes basic information on matters, such as municipal accounting, the municipal bond market, and public pension obligations. Part IV identifies key administrative matters for the judge and the clerk of court in a Chapter 9 case. Part V explains what transpires after the filing of a Chapter 9 petition and appointment of the bankruptcy judge. It follows not only the legal steps required at the beginning of the case and eligibility determination, but also covers questions, issues, and information the judge may want to consider as the case starts down the Chapter 9 path. Part VI discusses the administration of the case -- i.e. what happens after the order for relief but before the plan confirmation process. Part VII covers the end of a case: it examines the plan, the disclosure statement, and the confirmation process. It includes information on postconfirmation jurisdiction and implementation issue. You will also find information about modification of the plan or if the debtor is unable to confirm a plan within a reasonable time, or dismissal of a case. Part VII is devoted to smaller municipal cases and cases involving special purpose entities or instrumentalities of a state. Part IX focuses on larger municipal cases. These cases can present factors and considerations unique to the size of, and stakeholders, in these cases. Part X summarizes key takeaway points for judges and clerks of the court handling Chapter 9 cases.

Debt Adjustments for Municipalities Under Chapter 9 of the Bankruptcy Code: A Collier Monograph Dec 16 2021 This Collier Monograph presents a thorough treatment of chapter 9 of the Bankruptcy Code. Chapter 9 is a powerful yet underutilized restructuring tool available to financially challenged municipalities and public corporations within the United States. It provides an express means to compromise municipal obligations against a creditor's wishes, unlike state law, which generally speaking, cannot impose an involuntary debt reduction or contract impairment. Chapter 9 also gives a municipality the ability to operate while in bankruptcy with relatively minimal judicial oversight, protected by the automatic stay, free of the risk of a competing plan, liquidation, the appointment of a trustee or many of the other controls that normally act as a check upon a debtor during a bankruptcy reorganization case. The topics covered include: • the purpose of municipal bankruptcy • nonbankruptcy alternatives to chapter 9 • comparison of chapter 9 to chapter 11 • prepetition planning, including negotiations with creditors and creation of a restructuring plan • eligibility to file under chapter 9 commencement of the chapter 9 case • a municipality's operating in chapter 9 • reducing liabilities and exiting bankruptcy • history of chapter 9 and • a listing of chapter 9 state authorizing statutes. This eBook features links to Lexis Advance for further legal research options.

Agile Testing Sep 13 2021 This book is written by testers for testers. In ten chapters, the authors provide answers to key questions in agile projects. They deal with cultural change processes for agile testing, with questions regarding the approach and organization of software testing, with the use of methods, techniques and tools, especially test automation, and with the redefined role of the tester in agile projects. The first chapter describes the cultural change brought about by agile development. In the second chapter, which addresses agile process models such as Scrum and Kanban, the authors focus on the role of quality assurance in agile development projects. The third chapter deals with the agile test organization and the positioning of testing in an agile team. Chapter 4 discusses the question of whether an agile tester should be a generalist or a specialist. In Chapter 5, the authors turn to the methods and techniques of agile testing, emphasizing the differences from traditional, phase-oriented testing. In Chapter 6, they describe which documents testers still need to create in an agile project. Next, Chapter 7 explains the efficient use of test automation, which is particularly important in agile development, as it is the main instrument for project acceleration and is necessary to support state-of-the-art DevOps approaches and Continuous Integration. Chapter 8 then adds examples from test tool practice extending test automation to include test management functionality. Chapter 9 is dedicated to training and its importance, emphasizing the role of employee training in getting started with agile development. Finally, Chapter 10 summarizes the results of the agile journey in general with a special focus on testing. To make the aspects described even more tangible, the specific topics of this book are accompanied by the description of experiences from concrete software development projects of various organizations. The examples demonstrate that different approaches can lead to solutions that meet the specific challenges of agile projects.

Econometric Modeling Feb 24 2020 Econometric Modeling provides a new and stimulating introduction to econometrics, focusing on modeling. The key issue confronting empirical economics is to establish sustainable relationships that are both supported by data and interpretable from economic theory. The unified likelihood-based approach of this book gives students the required statistical foundations of estimation and inference, and leads to a thorough understanding of econometric techniques. David Hendry and Bent Nielsen introduce modeling for a range of situations, including binary data sets, multiple regression, and cointegrated systems. In each setting, a statistical model is constructed to explain the observed variation in the data, with estimation and inference based on the likelihood function. Substantive issues are always addressed, showing how both statistical and economic assumptions can be tested and empirical results interpreted. Important empirical problems such as structural breaks, forecasting, and model selection are covered, and Monte Carlo simulation is explained and applied. Econometric Modeling is a self-contained introduction for advanced undergraduate or graduate students. Throughout, data illustrate and motivate the approach, and are available for computer-based teaching. Technical issues from probability theory and statistical theory are introduced only as needed. Nevertheless, the approach is rigorous, emphasizing the coherent formulation, estimation, and evaluation of econometric models relevant for empirical research.

Introduction to Statistics Jan 05 2021 The introductory statistics course presents serious pedagogical problems to the instructor. For the great majority of students, the course represents the only formal contact with statistical thinking that he or she will have in college. Students come from many different fields of study, and a large number suffer from math anxiety. Thus, an instructor who is willing to settle for some limited objectives will have a much better chance of success than an instructor who aims for a broad exposure to statistics. Many statisticians agree that the primary objective of the introductory statistics course is to introduce students to variability and uncertainty and how to cope with them when drawing inferences from observed data. Additionally, the introductory course should enable students to handle a limited number of useful statistical techniques. The present text, which is the successor to the author's *Introduction to Statistics: A Nonparametric Approach* (Houghton Mifflin Company, Boston, 1976), tries to meet these objectives by introducing the student to the basic ideas of estimation and hypothesis testing early in the course after a rather brief introduction to data organization and some simple ideas about probability. Estimation and hypothesis testing are discussed in terms of the two-sample problem, which is both conceptually simpler and more realistic than the one-sample problem that customarily serves as the basis for the discussion of statistical inference.
