**The Vocabulary Book** Jul 07 2020 This extensively revised and expanded edition of the bestselling text and teaching resource incorporates the newest research in vocabulary learning and instruction into a complete and balanced program for all K–12 students, from those who struggle in school to those who excel. Literacy expert Michael Graves presents a four-pronged vocabulary program that he has developed and honed for over 30 years. The program has the following four components: Frequent, Varied, and Extensive Language Experiences; Teaching Individual Words; Teaching Word Learning Strategies; and Fostering Word Consciousness. The text includes theory, research-based strategies, vocabulary interventions, classroom examples, advice for working with English learners, discussion of next-generation standards, and more. The Vocabulary Book, Second Edition will appeal to reading and subject-area teachers, teacher educators, and school, district, and state leaders. New for the Second Edition: Instructional approaches developed and classroom-tested since the release of the first edition. A chapter specifically on teaching vocabulary to English learners. A chapter specifically on selecting vocabulary words to teach. Curricular and instructional elements designed to meet and exceed Common Core State Standards. An emphasis on vocabulary as a vital resource for all students in our increasingly diverse society. “If you believe vocabulary instruction is vital to reading, writing, and thinking, then Michael Graves’ Second Edition of The Vocabulary Book will give you the tools for powerful instruction, as many teachers discovered with the First Edition. This book will shift your perspective and you will reap the benefits of placing vocabulary at the center of your instruction.” —Peter Dewitz, district level reading consultant, Mary Baldwin College “Now that ‘vocabulary’ is included on the Nation’s Report Card, teachers will want to know how to help students increase their word power. Graves’s advice will be invaluable in what to do—and what not to do.” —Robert Calfee, professor emeritus, Stanford University “This book is an excellent resource for practitioners interested in developing a comprehensive program for building vocabulary in children. It is also of great value for researchers who wish to design and test vocabulary interventions.” —Diane August, senior research scientist, Center for Applied Linguistics

**Speaking for Academic Purposes** May 05 2020 The 4 Point series is designed for English language learners whose primary goal is to succeed in an academic setting. Academic English learners need skills-based books that focus on reading, listening, and speaking, as well as the two primary language bases of vocabulary and grammar. The ultimate goal is to help your students improve these skills and earn a 4.0 (GPA). The Introduction to English for Academic Purposes (EAP) level is designed for students in academic programs who need a more general introduction to authentic academic content. The discrete skills volumes are designed for programs and courses that want to more intensively focus on key strategies and authentic academic content in one skill area. Each 4 Point volume covers academic skills while providing reinforcement and systematic recycling of key vocabulary issues and further exposure to grammar issues. These volumes focus very heavily on vocabulary because language learners know that they are way behind their native-speaker counterparts when it comes to vocabulary. Each book highlights key vocabulary items, including individual words, compound words, phrasal verbs, short phrases, idioms, metaphors, collocations and longer set lexical phrases. Speaking for Academic Purposes is an introductory textbook containing English for Academic Purposes content. Each unit includes activities to strengthen a range of speaking skills, notably: understanding classroom discourse, using academic language functions, recognizing signal words and phrases, and synthesizing information. These activities are presented within the context of one field of academic study (Architecture, Marketing, Earth Science, U.S. History, Chemistry, and Fine Arts) per unit. Unique to this speaking text are six videos showing common student interactions. Access to the videos is free. Each unit includes three academic speaking strategies (including one specific to making presentations) and tasks that involve participating in group discussions, interacting with native speakers, and making a presentation.
