[Iggy Pop: Open Up And Bleed](#) Oct 25 2019 'For those who like their rock biogs thick with tales of heroic over-indulgence, OPEN UP AND BLEED is hard to beat' - Irish Evening Herald Iggy Pop's life has been one of extraordinary highs and terrifying lows. Infamous for his wild ways, he is also a towering figure of the rock scene - hugely influential, charismatic and provocative. Every 'mad, bad, dangerous to know' rock star owes a debt to him, and the stories of his shocking behaviour are legendary. But Iggy Pop is also, to a large extent, a construct, the alter ego of the quietly spoken and intriguing Jim Osterberg: the kid voted 'Most Likely to Succeed' by his classmates. So what turned this charming, well-mannered, straight-A student into a poster child for rock 'n' roll debauchery? Iggy Pop: Open up and Bleed reveals the truth behind the myths. Former MOJO editor Paul Trynka tracked down the star's friends, family, lovers and fellow musicians, conducting over two hundred and fifty interviews, unearthing countless new stories about Iggy's rollercoaster life, his music and his often misunderstood friendship with David Bowie. From this impeccable research he creates a fascinating portrait of a man at war with the world and with himself. The book also features dozens of never-before seen photos.

Dark Mirror Apr 30 2020 'A remarkable, authentic and chilling expos é of a global conspiracy that reads like a first-rate conspiracy thriller: a book of gripping, compulsive and disturbing impact' William Boyd Dark Mirror is the ultimate inside account of the vast, global surveillance network that now pervades all our lives. Barton Gellman's informant called himself 'Verax' - the truth-teller. It was only later that Verax unmasked himself as Edward Snowden. But Gellman's primary role in bringing Snowden's revelations to light, for which he shared the Pulitzer prize, is only the beginning of this gripping real-life spy story. Snowden unlocked the door: here Gellman describes what he found on the other side over the course of a years-long journey of investigation. It is also the story of his own escalating battle against unknown digital adversaries after he discovered his own name on a file in the leaked document trove and realised that he himself was under attack. Through a gripping narrative of paranoia, clandestine operations and jaw-dropping revelations, Dark Mirror delineates in full for the first time the hidden superstructure that connects government espionage with Silicon Valley. Who is spying on us and why? Here are the answers.

Sounds of Two Eyes Opening Aug 23 2019 Spot landed in Hermosa Beach, CA in the mid-1970s. A serious musician, he helped build Media Art Recording Studio and stumbled into photojournalism via "Easy Reader," the local news weekly. Hermosa proved to be a crossroads abounding with oddball roller skaters who were mostly overshadowed by Venice disco rollers and the Dogtown-inspired leaps into professional skateboarding (never mind that the first skateboard competition ever was in Hermosa in 1963). Then, in the late 70s, a cultural shift hit, fueled largely by music. This time the South Bay was in the vanguard. Spot became the in-house producer and engineer at SST Records--the label founded in 1978 by Greg Ginn as a vehicle for Black Flag, the band that defined LA hardcore. Between 1979 and 1985, he recorded, mixed, produced or co-produced most of SST's pivotal acts, working on all of Black Flag's greatest releases, and on classic albums by the Minutemen, Meat Puppets, Saint Vitus, Descendents, Big Boys, Husker Du, The Dicks, Subhumans and Misfits. Throughout this period, Spot remained a master photographer who documented various Los Angeles subcultures in intelligently composed black-and-white photographs. As this volume reveals, there was no distinction between the musical and the visual--he heard what he saw, saw what he heard--hence, the title of this collection. Spanning the late 1960s through the early 1980s, "Sounds of Two Eyes Opening" offers an amazing portrait of Southern California beach life, set against the dark clubs and rehearsal spaces of the burgeoning punk scene.

Atlas of Pelvic Anatomy and Gynecologic Surgery E-Book Apr 23 2022 Combining detailed descriptions of pelvic anatomy with easy-to-follow instructions for gynecologic procedures, Atlas of Pelvic Anatomy and Gynecologic Surgery, 5th Edition, is a comprehensive, up-to-date atlas that reflects current practices in this fast-changing field. Pelvic anatomy and surgical operations are depicted through full-color anatomic drawings, correlative surgical artwork with step-by-step photographs, and computer-assisted hybrid photo illustrations. Complete coverage of both conventional and endoscopic surgeries helps you master the full spectrum of surgical procedures. Covers all frequently performed gynecologic operations including laparotomy, laparoscopic, robotic, hysteroscopic, vaginal, vulvar, and cystoscopic procedures. Includes expanded sections on gender reassignment surgery and vulvar and cervical surgery, as well as a new chapter devoted to laparoscopic techniques. Contains a revised anatomic section with updated figures, plus high-quality artwork and clinical photographs throughout--now entirely in full color. Features numerous videos of surgeries and cadaver dissection. Ideal for practicing obstetricians-gynecologists, obstetrics-gynecology residents, general surgeons, subspecialists, nurses, and medical students with an interest in gynecology.

The Market Revolution Feb 27 2020 In The Market Revolution, one of America's most distinguished historians offers a major reinterpretation of a pivotal moment in United States history. Based on impeccable scholarship and written with grace and style, this volume provides a sweeping political and social history of the entire period from the diplomacy of John Quincy Adams to the birth of Mormonism under Joseph Smith, from Jackson's slaughter of the Indians in Georgia and Florida to the Depression of 1819, and from the growth of women's rights to the spread of the temperance movement. Equally important, he offers a provocative new way of looking at this crucial period, showing how the boom that followed the War of 1812 ignited a generational conflict over the republic's destiny, a struggle that changed America dramatically. Sellers stresses throughout that democracy was born in tension with capitalism, not as its natural political expression, and he shows how the massive national resistance to commercial interests ultimately rallied around Andrew Jackson. An unusually comprehensive blend of social, economic, political, religious, and cultural history, this accessible work provides a challenging analysis of this period, with important implications for the study of American history as a whole. It will revolutionize thinking about Jacksonian America.

Treatment of the Postmenopausal Woman Nov 25 2019 For anyone who treats postmenopausal women, this latest edition of Rogerio Lobo's classic work combines the best from two well-known references: Menopause, and the second edition of Treatment of the Postmenopausal Woman. By adding significant discussions of the basic science behind menopause, it is possible to objectively assess the clinical value and limitations of current approaches to treatment and provide a basis and rationale for strategies that will result in better individualized and specialized care. Not only does the third edition discuss diagnosis and treatment of menopause but it covers biological, anatomical, physiological, pathobiological, and pharmacological aspects as well bringing together, in one source, all of the information needed to understand and treat postmenopausal conditions. Over 50% new material representing the vast amount of information available since the Women's Health Initiative (WHI) clinical trials were completed making this the most up-to-date reference on postmenopausal women Includes several new sections on comparisons between clinical trials and observational data, urology, and pelvic support Each section is preceded by a preface to put the area into context with many chapters having suggested treatment regimens

Instrumentation Reference Book Oct 05 2020 The discipline of instrumentation has grown appreciably in recent years because of advances in sensor technology and in the interconnectivity of sensors, computers and control systems. This 4e of the Instrumentation Reference Book embraces the equipment and systems used to detect, track and store data related to physical, chemical, electrical, thermal and mechanical properties of materials, systems and operations. While traditionally a key area within mechanical and industrial engineering, understanding this greater and more complex use of sensing and monitoring controls and systems is essential for a wide variety of engineering areas--from manufacturing to chemical processing to aerospace operations to even the everyday automobile. In turn, this has meant that the automation of manufacturing, process industries, and even building and infrastructure construction has been improved dramatically. And now with remote wireless instrumentation, heretofore inaccessible or widely dispersed operations and procedures can be automatically monitored and controlled.

This already well-established reference work will reflect these dramatic changes with improved and expanded coverage of the traditional domains of instrumentation as well as the cutting-edge areas of digital integration of complex sensor/control systems. Thoroughly revised, with up-to-date coverage of wireless sensors and systems, as well as nanotechnologies role in the evolution of sensor technology Latest information on new sensor equipment, new measurement standards, and new software for embedded control systems, networking and automated control Three entirely new sections on Controllers, Actuators and Final Control Elements; Manufacturing Execution Systems; and Automation Knowledge Base Up-dated and expanded references and critical standards

Female Urology Mar 22 2022 The 2nd Edition of this essential text covers all aspects of female urology. Includes chapters on the anatomy of continence and pelvic support, rectocele repair, enterocele repair, hysterectomy, perineal repair, vaginal vault prolapse, sacrospinous fixation, and continent pouches. Other material focuses on the treatment of urinary incontinence using functional electrical stimulation, needle urethral-vesicle suspension procedures, retropubic operative procedures for stress urinary incontinence, surgical treatment of detrusor hyperreflexia, gynecologic injuries to the ureter, bladder, and urethra, and vaginal flap technique. The newest techniques for managements of urinary incontinence and intrinsic sphincter dysfunction including injections of collagen and/or fat, artificial sphincters, vaginal and abdominal suspensions, slings of fascia and synthetics, and the authors' own vaginal wall sling method as well as non-surgical techniques such as biofeedback, behavioral therapy, and pelvic floor rehabilitation. Extensive review of the newest techniques in the transvaginal repair of enterocele, rectocele, and uterine prolapse. Detailed descriptions of the repair of the damaged urethra and ureter and construction of neovagina. **WHAT'S NEW:** The anatomy and pathophysiology of stress incontinence. Neurophysiology of micturition. Pharmacology of lower urinary tract. Social impact of incontinence. Epidemiology. Medical and surgical treatment of urinary incontinence. Urinary tract infection. Interstitial cystitis. Geriatric incontinence. Nerve stimulation

Mr. P. C. Dec 27 2019 Winner of the 2013 Association for Recorded Sound Collections Award for Excellence in Historical Recorded Sound Research in Jazz During his 13 year career between 1955 and 1968, Paul Chambers was one of the leading double bass players in jazz, performing with a wide variety of artists and a range of the music's sub-genres and recording over 300 albums for labels such as Blue Note, Riverside, Mercury and Columbia Records. Chambers performed alongside some of the greatest names in jazz including Miles Davis, John Coltrane, Cannonball Adderley, Sonny Rollins, Wes Montgomery, Joe Henderson, Bill Evans, Wayne Shorter, Herbie Hancock, Hank Mobley, Lee Morgan, Gil Evans and Freddie Hubbard. Although he recorded half a dozen LPs under his own name, including his own compositions, he is probably best remembered for his contribution to the greatest jazz recording of all time; Miles Davis' Kind Of Blue where his bass notes are legendary. Mr P. C. tells the story of this quiet giant of jazz; his birth in Pittsburgh, youth in Detroit, his early rise to jazz celebrity, his time at the top, his struggle against alcoholism and heroin addiction and the circumstances surrounding his tragic death of tuberculosis, aged 33, in 1969. Using material from other literary sources and interviews with family members, friends and colleagues in the jazz fraternity, this book tells in full for the first time this influential musician's story. The book includes a comprehensive discography detailing all of his recordings both as a sideman and bandleader.

Signs of Music Sep 04 2020 Music is said to be the most autonomous and least representative of all the arts. However, it reflects in many ways the realities around it and influences its social and cultural environments. Music is as much biology, gender, gesture - something intertextual, even transcendental. Musical signs can be studied throughout their history as well as musical semiotics with its own background. Composers from Chopin to Sibelius and authors from Nietzsche to Greimas and Barthes illustrate the avenues of this new discipline within semiotics and musicology.

Digital Transformation of the Design, Construction and Management Processes of the Built Environment Feb 21 2022 This open access book focuses on the development of methods, interoperable and integrated ICT tools, and survey techniques for optimal management of the building process. The construction sector is facing an increasing demand for major innovations in terms of digital dematerialization and technologies such as the Internet of Things, big data, advanced manufacturing, robotics, 3D printing, blockchain technologies and artificial intelligence. The demand for simplification and transparency in information management and for the rationalization and optimization of very fragmented and splintered processes is a key driver for digitization. The book describes the contribution of the ABC Department of the Polytechnic University of Milan (Politecnico di Milano) to R&D activities regarding methods and ICT tools for the interoperable management of the different phases of the building process, including design, construction, and management. Informative case studies complement the theoretical discussion. The book will be of interest to all stakeholders in the building process - owners, designers, constructors, and faculty managers - as well as the research sector.

The Sense of Music Aug 15 2021 The fictional Dr. Strabismus sets out to write a new comprehensive theory of music. But music's tendency to deconstruct itself combined with the complexities of postmodernism doom him to failure. This is the parable that frames *The Sense of Music*, a novel treatment of music theory that reinterprets the modern history of Western music in the terms of semiotics. Based on the assumption that music cannot be described without reference to its meaning, Raymond Monelle proposes that works of the Western classical tradition be analyzed in terms of temporality, subjectivity, and topic theory. Critical of the abstract analysis of musical scores, Monelle argues that the score does not reveal music's sense. That sense--what a piece of music says and signifies--can be understood only with reference to history, culture, and the other arts. Thus, music is meaningful in that it signifies cultural temporalities and themes, from the traditional manly heroism of the hunt to military power to postmodern "polyvocality." This theoretical innovation allows Monelle to describe how the Classical style of the eighteenth century--which he reads as a balance of lyric and progressive time--gave way to the Romantic need for emotional realism. He argues that irony and ambiguity subsequently eroded the domination of personal emotion in Western music as well as literature, killing the composer's subjectivity with that of the author. This leaves Dr. Strabismus suffering from the postmodern condition, and Raymond Monelle with an exciting, controversial new approach to understanding music and its history.
