**Becoming a Sports Coach** Jul 12 2021 A 'coach' is more than just somebody who leads in the organisation and delivery of structured sport. The role of a coach goes beyond leadership, requiring an understanding of theories of teaching and learning. To become a coach you must know how people learn. *Becoming a Sports Coach* aims to introduce the multi-dimensional and inter-locking knowledge bases that any aspiring coach will need to develop, and that any established coach needs to master in order to improve their professional practice. While traditional coach education pathways have focused on what to coach, this book argues that understanding how knowledge can be communicated to learners is just as important. Asking why we coach, through critical reflection and self-knowledge, is also an essential part of the process of becoming a sports coach. The book explores three types of knowledge – content knowledge, pedagogic knowledge and self-knowledge – challenging the reader to reflect on their own coaching experiences and to develop a personal philosophy of coaching. It explores key pedagogic themes in contemporary coaching studies, such as humanistic coaching, inclusive practice, coaching for understanding, and the athlete-coach relationship. Real case studies are used to illuminate the ways – transferrable across sports - in which coaches can apply theory to practice and ultimately enhance their work. With contributions from leading coaching researchers and practitioners, combining practical guidance with important theoretical insights, this book will help any coaching student or developing professional to better understand the journey to becoming an effective sports coach.

**Sport Coaching Research and Practice** Aug 25 2022 Research shapes our understanding of practice in powerful and important ways, in sports coaching as in any other discipline. This innovative study explores the philosophical foundations of sport coaching research, examining the often implicit links between research process and practice, descriptions and prescriptions. Arguing that the assumptions of traditional single-disciplinary accounts, such as those based in psychology or sociology, risk over-simplifying our understanding of coaching, this book presents an alternative framework for sports coaching research based on critical realism. The result is an embedded, relational and emergent conception of coaching practice that opens new ways of thinking about coaching knowledge. Drawing on new empirical case study research, it demonstrates vividly how a critical realist-informed approach can provide a more realistic and accountable knowledge to coaching stakeholders. This knowledge promises to have important implications for coaching, and coach education and development practices. *Sport Coaching Research and Practice: Ontology, Interdisciplinarity and Critical Realism* is fascinating reading for any student or researcher working in sports coaching, sport pedagogy, physical education, the philosophy or sociology of sport, or research methodology in sport and exercise.

Each chapter demonstrates the complexities associated with developing football coaches within grassroots and high-performance domains, while providing recommendations for national governing bodies, policy makers, and coach developers. This book is the first of its kind to explicitly investigate football coach education globally. This accessible book is an important read for students, academics, and practitioners with an interest in sports coaching, coach education, and football.

**Leadership, Coaching and Followership** Nov 04 2020 This volume presents evidence-based ideas on all three converging forces to suit an array of individuals and their organisations. The volume is thick with evidence, detail and case studies that the reader can draw upon and apply to their own situations. ? Defining exactly what is leadership has been a persistent problem for researchers and theorists. Discovering how to create or produce leaders likewise has been a difficult challenge over the years. Written by an academic, executive and coach, the author focuses on three important converging aspects: leadership, followership and coaching. Focus on leaders is disproportionate to what actually occurs within most organisations especially the relationship between the leader and the followers. That leadership is tantamount with being in control of a situation is challenged, together with the belief that leadership capability is primarily shaped in line with a set of success criteria. The coach plays a significant part in this process although rarely visible.
