Six Men Built the Modern Auto Industry Oct 21 2021 This is the story of six extraordinary men who each built something from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and

Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again.- The compelling story of the global car business over the past half-century.- A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men- Full of business revelations at the highest level, written by a journalist operating at the heart of the industry- Global appeal that shows how automotive groups in the USA, Europe and Asia have influenced each other- A business story interlaced with personal details that explains why the six were determined to be successful. --Publisher.

BMW 5 Series Aug 07 2020 The full international story of BMW's backbone model through three decades and four model generations. This definitive history includes design and the development background of BMW's mid-ranger: the car which became the industry standard for the sporting saloon/sedan. Colour throughout.

The BMW 5 Series and X5 Jun 16 2021 BMW is a company associated with motoring firsts. The very idea of a sports sedan was merely a novelty until BMW introduced the 5 series in 1972. As BMW's "middle child," the 5 series has drawn features from the company's smallest and largest models, establishing a reputation for performance and practicality through multiple generations. This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60's major makeover for 2008 and the development of the e70 X5. Specific mechanical, electronic and cosmetic changes are described, including the time of and reasons for their introduction. Several aspects of BMW's corporate history and technically related models such as the 6-series are also described, as are aftermarket modifications by Alpina, Hartge, and other specialist BMW tuners and speed shops. The book includes more than 200 photographs.

Market Entry in China Nov 29 2019 This book compiles brand new case studies on the intricacies and market entry strategies of different companies in China. The sheer speed and scope of China's growth makes it unique and investment opportunities are very attractive. Despite the potential, many western companies fail in their market entry strategies. This book traces the major sources of failure and uses cases to illustrate how firms can better cope with the challenging Chinese market. With a special focus on marketing, positioning, and branding, this book presents issues and solutions of both large multinationals and small niche market players.

Dreams and Dilemmas Apr 14 2021 This volume consists of two parts. Part one discusses economic friction in the Asia-Pacific region from three aspects: macroeconomic and microeconomic friction, and that between the state and the market mechanism. In part two, four types of legal frameworks for dispute resolution are examined.

Japanese Foreign Direct Investment and the East Asian Industrial System Apr 02 2020 Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

[The Mobility Diaries](#) Jul 06 2020 With well over 25 years of experience, Sven Beiker is widely regarded as the mobility expert in Silicon Valley specializing in future trends for the automotive and mobility industries including autonomous driving, connectivity, electrification, and shared mobility. In *The Mobility Diaries: Connecting the Milestones of Innovation Leading to ACES*, he opens up his personal diary regarding his take on 50 years of mobility innovation and history interwoven with his experiences from 1978 to 2018. From the Foreword by Reilly P. Brennan: "Understanding how transportation itself evolved requires a unique prism. The core components of vehicles today have stories and engineering journeys worth their own telling, and that is what is so exciting about the way we can learn about them in this text. Dr. Beiker's curriculum vitae, from BMW to Stanford University to McKinsey, are a compendium of experiences that created this unique historical and biographical book." "Sven and I are kindred spirits in the mobility world. His view on the evolution of mobility and technology illustrates why Detroit and Silicon Valley need one another." Carla Bailo, Former President and CEO, Center for Automotive Research
