From building a chassis to outfitting it to meet your specific needs, The Complete Trailer Handbook provides clearly illustrated step-by-step instructions for putting a trailer of any sort to work: constructing it, using it, finding parts and maintaining it, and, finally, hauling it. **Fighting over Words** Jan 16 2022 Most people fight over something or other and language is usually at the very center of the conflict. Often the way we use language is the cause of the battle. There are many areas in which fighting about language can be observed but civil law cases offer the most fertile examples of this warfare over words. What did the contract actually say? Was there deception in the advertising? Was the warning label clear and effective? Did the company evidence race or age discrimination against employees or customers? Was one company's name too similar to that of another company? Did the corporation plagiarize the work of another? Did it fraudulently represent what its work? This book is about the ways linguistic analysis describes, exposes, and aids disputes in 18 civil cases where language framed the battleground. Roger Shuy, a well-known forensic linguist and consultant, shows how the skills of linguistic analysis can help resolve disputed meanings, while also showing how civil cases can prove to be fertile ground for linguistic scholarship. He does this by collecting and analyzing cases involving contracts, trademark disputes, advertisements, product liability, copyright infringement, discrimination, trademark disputes, and fraud controversies. In each case he employs all the tools of formal linguistics to show how it can be as helpful as other physical sciences

in resolving legal disagreements. The work will be of interest primarily to linguists -- sociolinguists, forensic linguists, and scholars and students of law and society -- as well as lawyers and law students. [World-Wide-Walks](#) Nov 02 2020 This book presents Peter d'Agostino's World-Wide-Walks project, providing a unique perspective on walking practices across time and place considered through the framework of evolving technologies and changes in climate. Performed on six continents during the past five decades, d'Agostino's work lays a groundwork for considering walks as portals for crossing natural, cultural and virtual frontiers. Broad in scope, it addresses topics ranging from historical concerns including traditional Australian

Aboriginal rites of passage and the exploits of explorers such as John Ledyard, to artists' walks and related themes covered in the mass media in recent years. D'Agostino's work shows that the act of walking places the individual within a world of empirical awareness, statistical knowledge, expectation and surprise through phenomena like anticipating unknown encounters around the bend. In mediating the frontiers of human knowledge, walking and other forms of exploration remain a critical means of engaging global challenges, especially notable now as environmental boundaries are undergoing radical and potential cataclysmic change.
