Neanderthal Man Sep 26 2019 "What can we learn from the genes of our closest evolutionary relatives? Neanderthal Man tells the story of geneticist Svante Pääbo's mission to answer that question, beginning with the study of DNA in Egyptian mummies in the early 1980s and culminating in his sequencing of the Neanderthal genome in 2009. From Pääbo, we learn how Neanderthal genes offer a unique window into the lives of our hominin relatives and may hold the key to unlocking the mystery of why humans survived while Neanderthals went extinct. Drawing on genetic and fossil clues, Pääbo explores what is known about the origin of modern humans and their relationship to the Neanderthals and describes the fierce debate surrounding the nature of the two species' interactions. A riveting story about a visionary researcher and the nature of scientific inquiry, Neanderthal Man offers rich insight into the fundamental question of who we are"-- Provided by publisher.

Man's Search for Meaning, Gift Edition Nov 01 2022 A book for finding purpose and strength in times of great despair, the international best-seller is still just as relevant today as when it was first published. "This is a book I reread a lot . . . it gives me hope . . . it gives me a sense of strength." —Anderson Cooper, Anderson Cooper 360/CNN This seminal book, which has been called "one of the outstanding contributions to psychological thought" by Carl Rogers and "one of the great books of our time" by Harold Kushner, has been translated into more than fifty languages and sold over sixteen million copies. "An enduring work of survival literature," according to the New York Times, Viktor Frankl's riveting account of his time in the Nazi concentration camps, and his insightful exploration of the human will to find meaning in spite of the worst adversity, has offered solace and guidance to generations of readers since it was first published in 1946. At the heart of Frankl's theory of logotherapy (from the Greek word for "meaning") is a conviction that the primary human drive is not pleasure, as Freud maintained, but rather the discovery and pursuit of what the individual finds meaningful. Today, as new generations face new challenges and an ever more complex and uncertain world, Frankl's classic work continues to inspire us all to find significance in the very act of living, in spite of all obstacles. This gift edition comes with endpapers, supplementary photographs, and several of Frankl's previously unpublished letters, speeches, and essays. This book was published with two different covers. Customers will be shipped one of the two at random.

Search Analytics for Your Site Jan 23 2022 Any organization that has a searchable web site or intranet is sitting on top of hugely valuable and usually under-exploited data: logs that capture what users are searching for, how often each query was searched, and how many results each query retrieved. Search queries are gold: they are real data that show us exactly what users are searching for in their own words. This book shows you how to use search analytics to carry on a conversation with your customers: listen to and understand their needs, and improve your content, navigation and search performance to meet those needs.

Information Retrieval Nov 08 2020 An introduction to information retrieval, the foundation for modern search engines, that emphasizes implementation and experimentation. Information retrieval is the foundation for modern search engines. This textbook offers an introduction to the core topics underlying modern search technologies, including algorithms, data structures, indexing, retrieval, and evaluation. The emphasis is on implementation and experimentation: each chapter includes exercises and suggestions for student projects. Wumpus—a multiuser open-source information retrieval system developed by one of the authors and available online—provides model implementations and a basis for student work. The modular structure of the book allows instructors to use it in a variety of graduate-level courses, including courses taught from a database systems perspective, traditional information retrieval courses with a focus on IR theory, and courses covering the basics of Web retrieval. In addition to its classroom use, Information Retrieval will be a valuable reference for professionals in computer science, computer engineering, and software engineering.

In Search of Schrodinger's Cat Aug 30 2022 Quantum theory is so shocking that Einstein could not bring himself to accept it. It is so important that it provides the fundamental underpinning of all modern sciences. Without it, we'd have no nuclear power or nuclear weapons, no TV, no computers, no science of molecular biology, no understanding of DNA, no genetic engineering. In Search of Schrodinger's Cat tells the complete story of quantum mechanics, a truth stranger than any fiction. John Gribbin takes us step by step into an ever more bizarre and fascinating place, requiring only that we approach it with an open mind. He introduces the scientists who developed quantum theory. He investigates the atom, radiation, time travel, the birth of the universe, superconductors and life itself. And in a world full of its own delights, mysteries and surprises, he searches for Schrodinger's Cat - a search for quantum reality - as he brings every reader to a clear understanding of the most important area of scientific study today - quantum physics. In Search of Schrodinger's Cat is a fascinating and delightful introduction to the strange world of the quantum - an essential element in understanding today's world.

Combinatorial Algorithms Mar 25 2022 This textbook thoroughly outlines combinatorial algorithms for generation, enumeration, and search. Topics include backtracking and heuristic search methods applied to various combinatorial structures, such as: Combinations Permutations Graphs Designs Many classical areas are covered as well as new research topics not included in most existing texts, such as: Group algorithms Graph isomorphism Hill-climbing Heuristic search algorithms This work serves as an exceptional textbook for a modern course in combinatorial algorithms, providing a unified and focused collection of recent topics of interest in the area. The authors, synthesizing material that can only be found scattered through many different sources, introduce the most important combinatorial algorithmic techniques - thus creating an accessible, comprehensive text that students of mathematics, electrical engineering, and computer science can understand without needing a prior course on combinatorics.

In Search of the Cradle of Civilization Jan 29 2020 Arguing that India, not Sumer, was the cradle of civilization, looks at India's ancient history by examining the symbols and myths contained in the Rig-Veda and exploring the mathematical and astronomical data contained in the Vedic hymns.

Understanding Deaf Culture Jun 15 2021 This book presents a 'Traveller's Guide' to Deaf Culture, starting from the premise that Deaf cultures have an important contribution to make to other academic disciplines, and human lives in general. Within and outside Deaf communities, there is a need for an account of the new concept of Deaf culture, which enables readers to assess its place alongside work on other minority cultures and multilingual discourses. The book aims to assess the concepts of culture, on their own terms and in their many guises, and to apply these to Deaf communities. The author illustrates the pitfalls which have been created for those communities by the medical concept of 'deafness' and contrasts this with his new concept of "Deafhood", a process by which every Deaf child, family and adult implicitly explains their existence in the world to themselves and each other.

In Search of Coherence Jun 23 2019 Marcel Jousse's anthropology of mimism is a plea for a change of civilization. Our present-day Western civilization has decomposed the human being into a mind-soul-spirit and a body, put writing as the apex of this human's expression, and set this human as the conqueror of his world. Jousse pleads for a threefold re-composition: a human compound, expressing himself as a whole, and in exchange with a cosmos that he mimes and infuses with consciousness. What is needed is an evolution, neither progressive nor regressive, but an evolution in depth, reconnecting the new with the old—in short, coherence.

Man's Search for Ultimate Meaning Sep 18 2021 Presents ideas and searches for answers about life, death, faith and suffering. A Search for Sovereignty Apr 13 2021 A Search for Sovereignty maps a new approach to world history by examining the relation of law and geography in European empires between 1400 and 1900. Lauren Benton argues that Europeans imagined imperial space as networks of corridors and enclaves, and that they constructed sovereignty in ways that merged ideas about geography and law. Conflicts over treason, piracy, convict transportation, martial law, and crime created irregular spaces of law, while also attaching legal meanings to familiar geographic categories such as rivers, oceans, islands, and mountains. The resulting legal and spatial anomalies influenced debates about imperial constitutions and international law both in the colonies and at home. This original study changes our understanding of empire and its legacies and opens new perspectives on the global history of law.

The Socrates Express Dec 10 2020 The New York Times bestselling author of The Geography of Bliss embarks on a rollicking intellectual journey, following in the footsteps of history's greatest thinkers and showing us how each—from Epicurus to Gandhi, Thoreau to Beauvoir—offers practical and spiritual lessons for today's unsettled times. We turn to philosophy for the same reasons we travel: to see the world from a different perspective, to unearth hidden beauty, and to find new ways of being. We want to learn how to embrace wonder, face regrets, sustain hope. Eric Weiner combines his twin passions for philosophy and global travel in a pilgrimage that uncovers surprising life lessons from great thinkers around the world, from Rousseau to Nietzsche, Confucius to Simone Weil. Traveling by train (the most thoughtful mode of transport), he journeys thousands of miles, making stops in Athens, Delhi, Wyoming, Coney Island, Frankfurt, and points in between to reconnect with philosophy's original purpose: teaching us how to lead wiser, more meaningful lives. From Socrates and ancient Athens to Simone de Beauvoir and twentieth-century Paris, Weiner's chosen philosophers and places provide important signposts as we navigate today's chaotic times. In The Socrates Express, Weiner invites us to voyage alongside him on his life-changing pursuit of wisdom and discovery as he attempts to find answers to our most vital questions.

Modern Classics: In Search of Lost Time Volume 1 - Way By Swann Jul 29 2022 Since the original prewar translation there has been no completely new rendering of the French original into English. This translation brings to the fore a more sharply engaged, comic and lucid Proust. IN SEARCH OF LOST TIME is one of the greatest, most entertaining reading experiences in any language. As the great story unfolds from its magical opening scenes to its devastating end, it is the Penguin Proust that makes Proust accessible to a new generation. Each volume is translated by a different, superb translator working under the general editorship of Professor Christopher Prendergast, University of Cambridge.

A Search in Secret Egypt Aug 18 2021 In this book, philosopher Paul Brunton (1898-1981) encounters the mysteries and magic of Egypt in the 1930s, including an eerie yet illuminating night spent alone inside the Great Pyramid. Alongside his explorations of ancient Egypt's monuments and gods, Brunton encounters a variety of occultists, fakirs, and dervishes, and even manages to become initiated into the deadly art of snake charming. His frank interviews with Muslim leaders remain relevant today, and his description of the Hajj reflects the beauty and inspiring faith of Mohammad's true followers. Brunton's journey to discover

the furthest reaches of what the mind and body are capable of--and to distinguish various forms of yoga and magic from true spirituality--lead him to the myth of Osiris and to the mystery that is the Sphinx itself. In the end, Brunton turns his attention to his own spiritual path, connecting all of his experiences into a single discovery: that we are more than the body and that the freedom of our spirit can be experienced here and now. This new edition has been updated to incorporate Brunton's final revisions and includes an introduction by the Paul Brunton Philosophic Foundation. "Paul Brunton was a great original and got to a place of personal evolution that illumines the pathways of a future humanity." --Jean Houston, author of *A Passion for the Possible* and *A Mythic Life* "Any serious man or woman in search of spiritual ideas will find a surprising challenge and an authentic source of inspiration and intellectual nourishment in the writings of Paul Brunton."--Jacob Needleman, author of *What is God?*

The Woman in White Sep 06 2020 Considered one of the mystery genre's greatest novels, *The Woman in White* was first serialized from 1859 to 1860. Published as a book in 1860, it was among the first mystery novels. Setting the stage for other works of mystery fiction, *The Woman in White* is an early detective story starring Walter Hartright, a young art teacher from London who works to find the true identity of a mysterious woman in white who appears to be in deep trouble.

A Sea Monster's Tale May 15 2021 There are few marine creatures as spectacular as the Basking Shark. At up to 11 metres in length and seven tonnes in weight, this colossal, plankton-feeding fish is one of the largest in the world, second only to the whale shark. Historically, Basking Sharks were a familiar sight in the northern hemisphere – off the coasts of Norway, Scotland, Ireland, Canada and the USA, for example. In an 18th Century world without electricity, they became the focus of active hunting for their huge livers containing large amounts of valuable oil, primarily used in lamps. Catch numbers were small enough to leave populations largely intact, but during the 20th Century a new breed of hunter joined the fray, some driven as much by a need for adventure as for financial gain. With improved equipment and experience, they exploited the shark on an industrial scale that drastically reduced numbers, leading to localised near-extinction in some areas. From the 1970's onward a new generation took to the seas, this time with conservation in mind to identify where the shark might still be found in the waters around the British Isles, employing new technologies to solve long-standing mysteries about the behaviour of this elusive creature. Using the best of both old and new research techniques, the case was built to justify the species becoming one of the most protected sharks in the oceans. Today, the Basking Shark is a much-loved cornerstone of our natural heritage. There are positive signs that the population has stabilised and may even be slowly recovering from the damage of the past, proving that timely conservation measures can be effective. Join us on a journey amidst wild seas, places, people and conservation history in the battle to protect this iconic creature – a true sea monster's tale.

Heavens on Earth Jul 25 2019 "In his most ambitious work yet, Shermer sets out to discover what drives humans' belief in life after death, focusing on recent scientific attempts to achieve immortality by radical life extensionists, extropians, transhumanists, cryonicists, and mind-uploaders, along with utopians who have attempted to create heaven on earth. For millennia, religions have concocted numerous manifestations of heaven and the afterlife, the place where souls go after the death of the physical body. Religious leaders have toiled to make sense of this place that a surprising 74% of Americans believe exists, but from which no one has ever returned to report what it is really like. *Heavens on Earth* concludes with an uplifting paean to purpose and progress and what we can do in the here-and-now, whether or not there is a hereafter" --

The Best Word Search Book Ever Made (So Far) Jul 05 2020 Are you sick of the same old word search books over and over again? Let me guess, it's a block of random letters with thirty loosely-related boring words to find, over and over and over again until your brain rots? Not this book! This is a real word-searcher's word search book, and I truly believe it is the best one out there - especially if you're an adult looking for something more engaging. Sometimes it's a little tougher than typical word searches, but it's nothing you can't handle! It is great for all ages - kids and adults alike - and though some of the trivia questions, concepts, and words may be unfamiliar to a younger audience, they can still find and circle the words, and maybe learn something new! There are additional puzzles within the 115 word searches in this book, there are interesting words, there are interesting word lists, a little trivia, a little humor, and it's pretty large print. If you're new to these kinds of puzzles, it's a great book to start with, and if you've been doing word searches for years, it's a great book to get next. It's a great gift for you, a loved one, or even a not-so-loved one. It's great for airplanes, trains, cars, and possibly boats. It's handcrafted with love, and I promise you will enjoy it.
