*Hawksmoor at Home* Feb 08 2021 Hawsmoor at Home should be covered in fingerprints and splashes of food, as it's a great hands-on book to use every day.' HESTON BLUMENTHAL 'When we started out we had a simple plan - to open the best steak restaurant in London. We travelled the world searching for the perfect steak, but discovered that beef from traditional breeds, reared the old-fashioned way right here in Britain, and cooked simply over real charcoal, packed more flavour than anything we tried on our travels.' The critics have hailed Hawksmoor as one of the great restaurant openings of recent years. Their credo is simple: the best ingredients - dictionary-thick steaks from Longhorn cattle traditionally reared in North Yorkshire by multi-award-winners The Ginger Pig, dry-aged for at least thirty-five days, simply cooked on a real charcoal grill. Their cocktails, wines and desserts too have been applauded to the echo. Hawksmoor at Home is a practical cookbook which shows you how to buy and cook great steak and seafood and indeed much else (including how to cook the both the 'best burger in Britain' and the 'best roast beef in Britain'); how to mix terrific cocktails and choose wine to accompany your meal. Above all Hawksmoor at Home entertains and informs in the inimitable 'Hawksmoor' way.

*Vital Signs for Cancer Prevention* Sep 05 2020 Vital Signs for Cancer Prevention suggests that cancer is a two-phase process. In Phase One you do not yet have, and may never have, cancer, but predisposing factors—poor diet and digestion, toxins, adrenal exhaustion, and blood sugar imbalances, among others—can progressively and cumulatively increase your likelihood of developing it. Phase Two begins when the first permanent, transformed or cancerous cells form and are not destroyed by your defenses. Understanding that the predisposing factors of the first phase lead toward the second can help you prevent the onset of cancer by correcting or minimizing those that apply to you. Author Xandria Williams takes a natural therapies approach to healing cancer—one based on an understanding of nutrition, herbal medicine, homoeopathy, osteopathy, and energy medicine—rather than one based strictly on medicine, drugs, and surgery. She sees cancer as a problem that affects the whole body, not just the organ or system that is faulty, and thus her recommendations are systemic rather than aimed specifically at the tumor. Her main emphasis is on a series of scientifically validated tests (many of which can be self-administered) she proposes that provide vital information as to the state of your health. She also describes the CA profile, a test that can indicate the presence of permanent cancer cells within the first six weeks and possibly years before a tumor can be detected, allowing a crucial warning and the time to start an effective recovery program. Williams suggests a number of supplements, specific foods, and other remedies (detox procedures, stress reduction) to correct any of the predisposing factors that could, with a final trigger, move you from Phase One to Phase Two of the cancer process. You will learn how to avoid cancer if you have not yet developed it, avoid recurrences if you are in remission, and overcome cancer if you have been diagnosed with it.
