Being a Beast Dec 26 2021 LONGLISTED FOR THE BAILLIE GIFFORD PRIZE 2016 Charles Foster wanted to know what it was like to be a beast: a badger, an otter, a deer, a fox, a swift. What it was really like. And through knowing what it was like he wanted to get down and grapple with the beast in us all. So he tried it out; he lived life as a badger for six weeks, sleeping in a dirt hole and eating earthworms, he came face to face with shrimps as he lived like an otter and he spent hours curled up in a back garden in East London and rooting in bins like an urban fox. A passionate naturalist, Foster realises that every creature creates a different world in its brain and lives in that world. As humans, we share sensory outputs, lights, smells and sound, but trying to explore what it is actually like to live in another of these worlds, belonging to another species, is a fascinating and unique

neuro-scientific challenge. For Foster it is also a literary challenge. Looking at what science can tell us about what happens in a fox's or badger's brain when it picks up a scent, he then uses this to imagine their world for us, to write it through their eyes or rather through the eyes of Charles the beast. An intimate look at the life of animals, neuroscience, psychology, nature writing, memoir and more, it is a journey of extraordinary thrills and surprises, containing wonderful moments of humour and joy, but also providing important lessons for all of us who share life on this precious planet.

Approaches to Learning, Testing and Researching L2 Vocabulary Jul 29 2019 This volume brings together a collection of chapters focused on the learning, testing, and researching of L2 vocabulary by leading international researchers including Paul Nation, Batia Laufer, Frank Boers, Elke Peters, Ana Pellicer-Sánchez, Anna Siyanova-Chanturia, and Stuart Webb. Questions that are examined include: Is it useful to read a book to learn vocabulary? Which types of input encountered outside of the classroom contribute most to vocabulary knowledge? What should a test measuring the skill of guessing from context consist of? Should loan words be included in vocabulary tests? How should we evaluate

vocabulary learning that occurs through watching captioned video? How has eye-tracking been used in vocabulary research? Together, the chapters in this volume highlight innovation in vocabulary studies and many directions for researching, testing, and learning words. The changing face of ESP in today's classroom and workplace

Jun 27 2019 Despite the growth and development of English for Specific Purposes (ESP) as an area of study since the 1960s, few books related to classroom applications in combination with other disciplines such as Content and Language Integrated Learning (CLIL), English Language Teaching (ELT), or English as a Medium of Instruction (EMI), exist. Each section of this volume includes scholarly written studies from across the globe, indicating the extent and the importance ESP has in the current academic world. Filling the present void in available material on this subject, this book contains various useful and effective applications of ESP, teaching activities for classroom settings, as well as insights on how ESP can be combined with, and adopted by, other disciplines. Written from a variety of backgrounds and perspectives, this text is sure to contribute to this field and will be of interest to ESP teachers, as well as postgraduate and undergraduate students.

How World Events Are Changing Education Jul 09 2020 "Education was established to create employees for 19th and 20th century manufacturing models. The 21st century requires a rethink. Change is happening fast, with jobs not guaranteed as robots are taking over routines. We must prepare students for uncertainty & higher-level employment - helping them think and communicate instead of retain and recall facts for passing exams. Some curricula is either irrelevant for today or gained at the press of a button. Listening and literate talk (narratives) for collaboratively solving real problems should be the focus, not facts forgotten after tests. The book explores this important debate. Contributors are: Daryle Abrahams, Nigel Adams, Peter Chatterton, Stefano Cobello, Joanna Ebner, Pierre Frath, Irene Glendinning, Susan James, Riccarda Matteucci, Gloria McGregor, Elena Milli, Elizabeth Negus, Juan Eduardo Romero, Rosemary Sage and Emma Webster"--

Decoding is for teachers, teacher trainers, textbook and course book authors in English language teaching (ELT). This book will help you add a decoding dimension to all your listening activities, which means that your students will be better prepared for real-world spontaneous speech encounters. If you are designing a listening course, or writing listening exercises for a course book, this is essential reading. There are four parts. Decoding and Perception presents key ideas which are essential to understanding why the teaching and learning of listening needs to be improved. A Critique of Training, Theory and Practice presents a critical analysis of conventional approaches to listening in teacher training and the ELT classroom. A Syllabus for Listening presents specific items for the syllabus, including word clusters, streamlining processes and, crucially, ear-training. Education, Tools and Activities describes innovative classroom activities for teaching decoding: exploiting recordings and classroom language, using pen-and-paper prompts, together with the voices of teachers and learners. Sound files are available for download from www.speechinaction.com My teaching of listening has changed utterly. Happy teacher. Happy students. It's fabulous. Jane Hadcock, Teacher, Essex Integration. To inspire ELT, another original book from a pioneer of teaching listening.
