**Microaggression Theory** Feb 05 2021 Get to know the sociopolitical

context behind microaggressions Microaggressions are brief, everyday exchanges that send denigrating messages to certain individuals because of their group membership (e.g., race, gender, culture, religion, social class, sexual orientation, etc.). These daily, common manifestations of aggression leave many people feeling vulnerable, targeted, angry, and afraid. How has this become such a pervasive part of our social and political rhetoric, and what is the psychology behind it? In *Microaggression Theory*, the original research team that created the microaggressions taxonomy, Gina Torino, David Rivera, Christina Capodilupo, Kevin Nadal, and Derald Wing Sue, address these issues head-on in a fascinating work that explores the newest findings of microaggressions in their sociopolitical context. It delves into how the often invisible nature of this phenomenon prevents perpetrators from realizing and confronting their own complicity in creating psychological dilemmas for marginalized groups, and discusses how prejudice, privilege, safe spaces, and cultural appropriation have become themes in our contentious social and political discourse. Details the psychological effects of microaggressions in separate chapters covering clinical impact, trauma, related stress syndromes, and the effect on perpetrators Examines how microaggressions affect education, employment, health care, and the media Explores how social policies and practices can minimize the occurrence and impact of microaggressions in a range of environments Investigates how microaggressions relate to larger social movements If you come across the topic of microaggressions in your day-to-day life, you can keep the conversation going in a productive manner—with research to back it up!

Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is in two parts: In Part 1, *Literacies in the Digital Age*, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, *Enabling and Supporting Digital Literacies*, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful *Information and IT*

Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

**Critical English for Academic Purposes** Mar 06 2021 Critical English for Academic Purposes: Theory, Politics, and Practice is the first book to combine the theory and practice of two fields: English for academic purposes and critical pedagogy. English for academic purposes (EAP) grounds English language teaching in the cognitive and linguistic demands of academic situations, tailoring instruction to specific rather than general purposes. Critical pedagogy acknowledges students' and teachers' subject-positions, that is, their class, race, gender, and ethnicity, and encourages them to question the status quo. Critical English for academic purposes engages students in the types of activities they are asked to carry out in academic classes while inviting them to question and, in some cases, transform those activities, as well as the conditions from which they arose. It takes into account the real challenges non-native speakers of English face in their discipline-specific

classes while viewing students as active participants who can help shape academic goals and assignments. Critical English for Academic Purposes: Theory, Politics, and Practice: \* relates English for academic purposes and critical pedagogy, revealing and problematizing the assumptions of both fields, \* provides theoretical and practical responses to academic syllabi and other institutional demands to show that teachers can both meet target demands and take students' subjectivities into account in a climate of negotiation and possibility, \* offers "rights analysis" as a critical counterpart to needs analysis, \* discusses the politics of "coverage" in lecture classes and proposes alternatives, and \* features teaching examples that address balancing the curriculum for gender; building community in an EAP class of students from diverse economic and social backgrounds; students' rights; and organizing students to change unfavorable conditions. This book is intended for undergraduate and graduate courses for preservice and in-service ESL and EAP teachers. It is also a professional book for those interested in critical approaches to teaching and EAP.

**Women in Early British and Irish Astronomy** Sep 19 2019 Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally.

*The Devil in History* Apr 26 2020 The Devil in History is a provocative analysis of the relationship between communism and fascism. Reflecting the author's personal experiences within communist totalitarianism, this is a book about political passions, radicalism, utopian ideals, and their catastrophic consequences in the twentieth century's experiments in social engineering. Vladimir Tismaneanu brilliantly compares communism and fascism as competing, sometimes overlapping, and occasionally strikingly similar systems of political totalitarianism. He examines the inherent ideological appeal of these radical, revolutionary political movements, the visions of salvation and revolution they pursued, the value and types of charisma of leaders within these political movements, the place of violence within these systems, and their

legacies in contemporary politics. The author discusses thinkers who have shaped contemporary understanding of totalitarian movements—people such as Hannah Arendt, Raymond Aron, Isaiah Berlin, Albert Camus, François Furet, Tony Judt, Ian Kershaw, Leszek Kolakowski, Richard Pipes, and Robert C. Tucker. As much a theoretical analysis of the practical philosophies of Marxism-Leninism and Fascism as it is a political biography of particular figures, this book deals with the incarnation of diabolically nihilistic principles of human subjugation and

conditioning in the name of presumably pure and purifying goals. Ultimately, the author claims that no ideological commitment, no matter how absorbing, should ever prevail over the sanctity of human life. He comes to the conclusion that no party, movement, or leader holds the right to dictate to the followers to renounce their critical faculties and to embrace a pseudo-miraculous, a mystically self-centered, delusional vision of mandatory happiness.
