[Spanish Poetry of the Twentieth Century](#) Mar 15 2021 Twentieth-century Spanish poetry has received comparatively little attention from critics writing in English. Andrew Debicki now presents the first English-language history published in the United States to examine the sweep of modern Spanish verse. More important, he is the first to situate Spanish poetry in the context of European modernity, to trace its trajectory from the symbolists to the postmodernists. Avoiding the rigid generational schemes and catalogs of names found in traditional Hispanic literary histories, Debicki offers detailed discussions of salient

books and texts to construct an original and compelling view of his subject. He demonstrates that contemporary Spanish verse is rooted in the modern tradition and poetics that see the text as a unique embodiment of complex experiences. He then traces the evolution of that tradition in the early decades of the century and its gradual disintegration from the 1950s to the present as Spanish poetry came to reflect features of the postmodern, especially the poetics of text as process rather than as product. By centering his study on major periods and examining within each the work of poets of different ages, Debicki

develops novel perspectives. The late 1960s and early 1970s, for example, were not merely the setting for a new aestheticist generation but an era of exceptional creativity in which both established and new writers engendered a profound, intertextual, and often self-referential lyricism. This book will be essential reading for specialists in modern Spanish letters, for advanced students, and for readers inter-ested in comparative literature. **Teardrop** Jan 01 2020 Seventeen-year-old Eurekaâ€(tm)s life is taking on dark undercurrents that donâ€(tm)t make sense . . . Rice retraces Burton's steps as the first European adventurer to search for the source of the Nile; to enter, disguised, the forbidden cities of Mecca and Medina; and to travel through remote stretches of India, the Near East, and Africa. From his spying exploits to his startling literary accomplishments (the discovery and translation of the Kama Sutra and his seventeen-volume translation of Arabian Nights), Burton was an engrossing, larger-than-life Victorian figure, and Rice's splendid biography lays open a portrayal as dramatic, complicated, and compelling as the man himself.

Numerous individuals and collectives envision the creation of counterpublics or alternative educational sites as possible forms of resistance, while other anarchists see themselves as “saboteurs” within the public arena—believing that there is a need to contest dominant forms of power and educational practices from multiple fronts. nonhierarchical, anti-authoritarian, mutual, and voluntary educational spaces? Contributors to this edited volume engage readers in important and challenging issues in the area of anarchism and education. From Francisco Ferrer's modern schools in Spain and the Work People's College in the United States, to contemporary actions in developing "free schools" in the U.K. and Canada, to direct-action education such as learning to work as a "street medic" in the protests against neoliberalism, the contributors illustrate the importance of developing complex connections between educational theories and

collective actions. Anarchists, activists, and critical educators should take these educational experiences seriously as they offer invaluable examples for potential teaching and learning environments outside of authoritarian and capitalist structures. Major themes in the volume include: learning from historical anarchist experiments in education, ways that contemporary anarchists create dynamic and situated learning spaces, and finally, critically reflecting on theoretical frameworks and educational practices. Throughout Gowin's distinguished career, his work has addressed urgent concerns. The arresting images of *Mariposas Nocturnas* extend this reach, as Gowin fosters awareness for a part of nature that is generally left unobserved and calls for a greater awareness of the biodiversity and value of the tropics as a universally shared natural treasure. An essay by Gowin provides a fascinating personal history of his work with biologists and introduces both the photographic and

Essential reading for audiences both in photography and natural history, this lavishly illustrated volume reminds readers that, as Terry Tempest Williams writes in her foreword, "The world is saturated with loveliness, inhabited by others far more adept at living with uncertainty than we are."
