[The Production of Modernization](#) Dec 09 2020 Daniel Lerner's 1958 book *The Passing of Traditional Society* was central in shaping Cold War-era ideas about the use of mass media and culture to promote social and economic progress in postcolonial nations. Based on a study of the effectiveness of propaganda in the Middle East, Lerner's book claimed that exposure to American media messages could motivate "traditional" people in the postcolonial nations to become "modern" by cultivating empathy for American ideas, goods, and ways of life. *The Production of Modernization* examines Lerner's writings to construct the intellectual trajectory of his thinking about mass media and modernization up to and beyond the publication of his famous book. Shah has written not just an intellectual biography of Lerner but also a history of the discipline he shaped.

[Database and Expert Systems Applications](#) Mar 31 2020 DEXA 2005, the 16th International Conference on Database and Expert Systems Applications, was held at the Copenhagen Business School, Copenhagen, Denmark, from August 22 to 26, 2005. The success of the DEXA series has partly been due to the way in which it has kept abreast of recent developments by spawning specialized workshops and conferences each with its own proceedings. In 2005 the DEXA programme was co-located with the 7th International Conference on Data Warehousing and Knowledge Discovery [DaWaK 2005], the 6th International Conference on Electronic Commerce and Web Technologies [EC-Web 2005], the 4th International Conference on Electronic Government [EGOV 2005], the 2nd International Conference on Trust, Privacy, and Security in Digital Business [TrustBus 2005], the 2nd International Conference on Industrial Applications of Holonic and Multi-agent Systems [HoloMAS 2005], as well as 19 specialized workshops. These proceedings are the result of a considerable amount of hard work. Beginning with the preparation of submitted papers, the papers went through the reviewing process. This process was supported by online discussion between the reviewers to determine the final conference program. The authors of accepted papers revised their manuscripts to produce this fine collection. DEXA 2005 received 390 submissions, and from those the Program Committee selected the 92 papers in these proceedings. This year the reviewing process generated more than 1000 referee reports. The hard work of the authors, the referees and the Program Committee is gratefully acknowledged.

[Selected Logic Papers](#) Oct 31 2022 The author selects 23 of his papers in mathematical logic that pursue definability via priority, forcing, compactness and fine structure applied to classical recursion, hyperarithmetical sets, recursion in objects of finite type, measure, models and E-recursion. His general introduction provides a chronology both personal and technical. Contents: On the Degrees Less Than 0^{\prime} Recursive Enumerability and the Jump Operator The Recursively Enumerable Degrees are Dense A Simple Set Which is Not Effectively Simple Metarecursive Sets (with G Kreisel) Post's Problem, Admissible Ordinals, and Regularity On a Theorem of Lachlan and Martin A Minimal Hyperdegree (with R O Gandy) Measure-Theoretic Uniformity in Recursion Theory and Set Theory Recursion in Objects of Finite Type Forcing with Perfect Closed Sets The α -Finite Injury Method (with S G Simpson) The 1-Section of a Type n Object Remarks Against Foundational Activity Countable Admissible Ordinals and Hyperdegrees The k -Section of a Type n Object Effective Bounds on Morley Rank Post's Problem, Absoluteness and Recursion in Finite Types On the Number of Countable Models Post's Problem in E-Recursion The Limits of E-Recursive Enumerability Inadmissible Forcing (with T A Slaman) Effective Forcing Versus Proper Forcing Readership: Mathematical logicians and computer scientists. keywords: Recursion Theory; Computability Theory; Classical Degree Theory; α -Recursion; E-Recursion; Model Theory; Splitting; Density; Jump "... this volume, together with Sacks' monograph on the subject, will be a useful source of information to those who want to bring life to the subject again." Mathematical Reviews

[The Collected Mathematical Papers of James Joseph Sylvester](#) Oct 07 2020 From the Preface: "The longest paper in volume 1 is 'On the Theory of the Syzygetic Relations of two Rational Integral Functions, comprising an application to the Theory of Sturm's Functions', and to this many of the shorter papers in the volume are contributory ... the volume contains also Sylvester's dialytic method of elimination, his Essay on Canonical Forms, and early investigations in the theory of Invariants. It also contains celebrated theorems as to Determinants and investigations as to the Transformation of Quadratic Forms and the recognition of the Invariant factors of a matrix."

[30 Years of the Landau Institute - Selected Papers](#) Sep 05 2020 The Landau Institute for Theoretical Physics was created in 1965 by a group of LD Landau's pupils. Very soon, it was widely recognized as one of the world's leading centers in theoretical physics. According to Science Magazine, the Institute in the eighties had the highest citation index among all the scientific organizations in the former Soviet Union. This collection of the best papers of the Institute reflects the development of the many directions in the exact sciences during the last 30 years. The reader can find the original formulations of well-known notions in condensed matter theory, quantum field theory, mathematical physics and astrophysics, which were introduced by members of the Landau Institute. The following are some of the achievements described in this book: monopoles (A Polyakov), instantons (A Belavin et al.), weak crystallization (S Brazovskii), spin superfluidity (I

Fomin), finite band potentials (S Novikov) and paraconductivity (A Larkin, L Aslamasov). Contents: Condensed Matter: Phase Transition in Uniaxial Ferroelectrics (A I Larkin & D E Khmel'nitskii) Contribution to the Theory of Domain Structures (I A Privorotskii) Correlation Functions of a One-Dimensional Fermi System with Long-Range Interaction (Tomonaga Model) (I E Dzyaloshinskii & A I Larkin) Investigation of Singularities in Superfluid He3 in Liquid Crystals by the Homotopic Topology Methods (G E Volovik & V P Mineev) Towards an Exact Solution of the Anderson Model (P B Wiegmann) Long Wavelength Dynamics of Free Smectic Films (E I Kats & V V Lebedev) The Augmented Models of Associative Memory Asymmetric Interaction and Hierarchy of Patterns (M V Feigelman & L B Ioffe) Superconductivity Transition Temperature in Amorphous Film (A M Finkel'shtein) Mathematical Physics: A Scheme for Integration the Nonlinear Equations of Mathematical Physics by the Method of the Inverse Scattering Problem (V E Zakharov & A B Shabat) Note on the Integration of Euler's Equations of the Dynamics of an n-Dimensional Rigid Body (S V Manakov) Extension of the Module of Invertible Transformations. Classification of Integrable Systems (A V Mikhailov et al.) Field Theory and Nuclear Physics: Particle Spectrum in Quantum Field Theory (A M Polyakov) Pseudoparticle Solutions of the Yang-Mills Equations (A A Belavin et al.) Infinite Conformal Symmetry in Two-Dimensional Quantum Field Theory (A A Belavin et al.) Conformal Algebra and Multipoint Correlation Functions in 2d Statistical Models (V Dotsenko & V A Fateev) Higgs and Top Quark Masses in the Standard Model without Elementary Higgs Boson (V N Gribov) Astrophysics: Spectrum of Relict Gravitational Radiation and the Early State of the Universe (A A Starobinskii) and other papers Readership: Graduates and researchers in theoretical physics. keywords: "The articles reprinted in this volume are impressive. Many of these articles are still referenced, and even more are the basis for experimental and theoretical studies today." Mathematical Reviews "This collection of the best papers of the Institute reflects the development of the many directions in the exact sciences during the last 30 years. The reader can find the original formulations of well-known notions in condensed matter theory, quantum field theory, mathematical physics and astrophysics, which were introduced by members of the Landau Institute." 11 Years Solved Papers IIT JEE Advanced & IIT JEE 2022 May 14 2021 '11 Years' IIT JEE Solved Papers' provides solid practice, strong and strong grip on concepts Provides solved papers [2021-2011] IIT JEE (JEE Main & Advanced) for practice. Inculcates problem solving skills in students Step-by-step detailed solutions to questions in all three subjects Builds the concept deeply from the basic level for better understanding Solved Papers of Previous Years' Questions uphold numerous advantages in cracking various entrances and competitive exams. A regular practice from well versed solved papers help students to get familiar with the exam pattern, its marking schemes, Question Types and Important topics, etc. The upcoming JEE Entrance has created an intense atmosphere for aspirants who are aiming to crack the exams. The newly revised edition of "11 Years' JEE Advanced & IIT JEE Solved Papers (2021 - 2022)" has been cautiously designed to improve the problem solving skills on the basis of which this cutting edge examination screens candidates. Enabling the in-depth conceptual understanding from the very basic level, this book provides a step by step solution for the questions. These features will help students develop greater focus in their preparation on important and frequently asked topics.

Oswaal ISC English Paper-1, English Paper-2, Physics, Chemistry & Biology Class 11 Sample Question Papers (Set of 5 Books) (For 2023 Exam) Nov 07 2020 The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Physics, Chemistry & Biology 2022-2023 is considered by an expert panel to be one of the best ISC reference books for class 11 English Paper-1, English Paper-2, Physics, Chemistry & Biology exam. It includes MCQs & objective type questions for ample practice. Students of class 11 shouldn't leave any stone unturned, and therefore this is the best ISC reference book for class 11 English Paper-1, English Paper-2, Physics, Chemistry & Biology exam as it's curated with latest ISC specimen papers. The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Physics, Chemistry & Biology 2022-2023 includes 10 sample question paper which are further divided into 5 solved and 5 self-assessment papers which are strictly designed as per the latest CISCE syllabus & board specimen paper making it the best ISC reference book for class 11 English Paper-1, English Paper-2, Physics, Chemistry & Biology exam. On top of that, the ISC Class 11 sample Paper for English Paper-1, English Paper-2, Physics, Chemistry & Biology 2022-2023 on-tips notes and revision notes for 1000+ concepts for quick and advanced revision. The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Physics, Chemistry & Biology 2022-2023 also contains Mind Maps and Mnemonics for robust learning to prepare for ISC class 11 exams 2023. This best ISC reference book for the class 11 English Paper-1, English Paper-2, Physics, Chemistry & Biology exam contains 200+ MCQs and objective-type questions for robust practice and score maximum in the ISC exam. It contains proper explanations for all the ISC exam questions that students might encounter in exams. The ISC Class 11 sample Paper for English Paper-1, English Paper-2, Physics, Chemistry & Biology 2022-2023 will assist in understanding the dos and don'ts for the ISC class 11 exams. This ISC reference book for the class 11 English Paper-1, English Paper-2, Physics, Chemistry & Biology exam provides a holistic approach toward learning, and therefore, enhances the preparation level of students making it the best ISC Class 11 sample Paper for English Paper-1, English Paper-2, Physics, Chemistry & Biology 2022-2023
