**Quality Assurance and Institutional Transformation** Jul 25 2019 This book illustrates the higher education quality assurance system and its impact on institutional transformation in China. It starts by describing the higher education system in China and its quality assessment schemes. It discusses in detail the Quality Assessment of Undergraduate Education (QAUE) and the Subject Evaluation, two of the most influential external quality assessment schemes, which are conducted on the institutional and subject levels respectively. In the second part of this book, QAUE is taken as an example for the impact analysis. Using case studies, it explores the impact of the QAUE on various dimensions of

quality provisions in universities with different statuses and presents the views of various stakeholders. Based on the empirical findings from the Chinese schemes and the theories on organizational change and the mechanism of external quality assessment, it proposes a model to describe how quality assessment interacts with the evaluated universities and causes them to change.

*Teaching Chemistry Around the World* Dec 22 2021 As teachers we often tend to expect other countries to teach chemistry in much the same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world: Teaching Chemistry around the World. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand – due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving – we have to learn from each others' educational systems.

**ELT in a Changing World** Apr 13 2021 A novel ELT resource for language specialists and teachers across the world, this selection of papers is a collection of the most compelling and innovative ideas presented at a seminar hosted by the Centre of English Language, Aga Khan University, Pakistan, in January 2011, entitled 'ELT in a Changing World: Innovative Approaches to New Challenges'. The book is divided into three sections, the first of which is 'Global change and language learning'. This section offers a guided tour of language teaching evolution, highlighting the merits of enhanced language awareness, self-immersive and input/output-based learning, and innovative pedagogical interventions. Section Two, 'Developments in Second Language theory and practice in Pakistan', reveals the findings of the latest research conducted in Pakistan on language policy scholarship, the development of traditional and e-learning environments, the relationship between language learning and immigration opportunities, and the impact of language ideologies on individual identities. Section Three, 'Learning innovations', discusses the need for change and fresh approaches to English language education, and highlights the efforts made within the context of Pakistan to ensure the successful implementation of holistic, needs-based and socially driven curricula. Highly readable and virtually jargon free, the book will prove to be an excellent resource for those seeking up-to-date information on the teaching of English in Pakistan and other related parts of the developing world today.

Text Complexity and Reading Comprehension Tests May 15 2021 Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language (EFL) reading tests at different levels of proficiency, this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests. It brings together linguistic investigations into the text-inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students. The study of text complexity draws on corpus linguistics, text linguistics and systemic functional linguistics. Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests. The assessment of test difficulty, on the other hand, is informed by research on language testing, and, in particular, by findings and methodologies of Classical Test Theory and Item Response Theory. Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and actual test difficulty.
