An Introduction to PERT Cost May 24 2022 A general introduction to PERT COST, an innovation in the field of management. This technique employs a networking, statistical and scheduling methodology using advanced data processing procedures. The PERT COST technique is based on the principle that planning must be developed in a

manner that facilitates its use as a management control tool and a management control system must use as its base the planning that governs the program. Accordingly, PERT COST can be used in both the planning and control functions of management. (Author).

Image Processing Aug 03 2020 Focusing on mathematical methods in computer tomography, *Image Processing: Tensor Transform and Discrete Tomography with MATLAB®* introduces novel approaches to help in solving the problem of image reconstruction on the Cartesian lattice. Specifically, it discusses methods of image processing along parallel rays to more quickly and accurately reconstruct images from a finite number of projections, thereby avoiding overradiation of the body during a computed tomography (CT) scan. The book presents several new ideas, concepts, and methods, many of which have not been published elsewhere. New concepts include methods of transferring the geometry of rays from the plane to the Cartesian lattice, the point map of projections, the particle and its field function, and the statistical model of averaging. The authors supply numerous examples, MATLAB®-based programs, end-of-chapter problems, and experimental results of implementation. The main approach for image reconstruction proposed by the authors differs from existing methods of back-projection, iterative reconstruction, and Fourier and Radon filtering. In this book, the authors explain how to process each projection by a system of linear equations, or linear convolutions, to calculate the corresponding part of the 2-D tensor or paired transform of the discrete image. They then describe how to calculate the inverse transform to obtain the reconstruction. The proposed models for image reconstruction from projections are simple and result in more accurate reconstructions. Introducing a new theory and methods of image reconstruction, this book provides a solid grounding for those interested in further research and in obtaining new results. It encourages readers to

develop effective applications of these methods in CT.

The Fathers Refounded Oct 17 2021 In the early twentieth century, a new generation of liberal professors sought to prove Christianity's compatibility with contemporary currents in the study of philosophy, science, history, and democracy. These modernizing professors—Arthur Cushman McGiffert at Union Theological Seminary, George LaPiana at Harvard Divinity School, and Shirley Jackson Case at the University of Chicago Divinity School—hoped to equip their students with a revisionary version of early Christianity that was embedded in its social, historical, and intellectual settings. In *The Fathers Refounded*, Elizabeth A. Clark provides the first critical analysis of these figures' lives, scholarship, and lasting contributions to the study of Christianity. *The Fathers Refounded* continues the exploration of Christian intellectual revision begun by Clark in *Founding the Fathers: Early Church History and Protestant Professors in Nineteenth-Century America*. Drawing on rigorous archival research, Clark takes the reader through the professors' published writings, their institutions, and even their classrooms—where McGiffert tailored nineteenth-century German Protestant theology to his modernist philosophies; where LaPiana, the first Catholic professor at Harvard Divinity School, devised his modernism against the tight constraints of contemporary Catholic theology; and where Case promoted reading Christianity through social-scientific aims and methods. Each, in his own way, extricated his subfield from denominationally

and theologically oriented approaches and aligned it with secular historical methodologies. In so doing, this generation of scholars fundamentally altered the directions of Catholic Modernism and Protestant Liberalism and offered the promise of reconciling Christianity and modern intellectual and social culture.
