The Distribution Atlas of European Butterflies Jun 01 2020 In a very short time - only about six years since the Mapping European Butterflies project was announced or some seven years since the preparations were started - the results in the form of The Distribution Atlas of European Butterflies can now be presented to the public. The database of the Atlas consists of 228,931 data records provided by 250 recorders from all over Europe or extracted from all the major national, regional and private data banks. The Atlas contains about 450 dot distribution maps of all the European butterflies. For the first time ever a distribution atlas of European butterflies will be available and at the same time Europe will be the first continent ever to have all its butterfly species plotted on precise and comprehensive distribution maps. Apart from providing significant species specific chronological data for taxonomists and biogeographers, the prime purpose of the Atlas is to aid and promote the conservation of European butterflies. The analysis and evaluation of the distribution data contained in the Atlas will facilitate the identification of priorities in selecting species and areas for European significance for conservation purposes. Thus, The Distribution Atlas of European Butterflies constitutes a major contribution towards the advancement of our knowledge of European butterflies.

Evolutionary Strategies of Parasitic Insects and Mites Aug 27 2022 This volume contains the invited lectures presented in a symposium entitled "Evolutionary strategies of parasitic insects and mites" at

the national meeting of the Entomological Society of America in Minneapolis, Minnesota, 2-5 December, 1974. The intent was to bring together biologists who have worked on arthropods that are either plant or animal parasites in order to foster consideration of general aspects of the parasitic way of life. There seems to be a deficiency of ecological and evolutionary concepts relating to parasitism, in contrast to the burgeoning literature on predation, and it appeared that an amalgamation of studies on plant and animal parasites might help development of some generalities. Since parasites are far more numerous than predators in the world fauna, or in any particular community, emphasis on their study is justified. I freely admit that parasitoids have been usefully regarded as predators by ecologists, and many concepts on predation have been derived from their study. Also, in whichever category one places the parasitoids, that is the one which contains the most species. However, from an evolutionary point of view they show many characteristics that must be regarded as those of a parasite. Notably, they are small, highly specific to their host, highly coevolved with it, as a result many species can coexist, and their adaptive radiation has produced the majority of the species diversity seen on Earth today.

By Fire, By Water Feb 27 2020 Recipient of the Independent Publishers Award for Historical Fiction (Gold Medal), the Foreword Book of the Year Award for Historical Fiction (Bronze Medal), and an honorable mention in the category of General Fiction for the Eric Hoffer Award. Luis de Santángel, chancellor to the court and longtime friend of the lusty King Ferdinand, has had enough of the Spanish Inquisition. As the power of Inquisitor General Tomás de Torquemada grows, so does the brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend's

demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada. While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise, and only Luis de Santángel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in *By Fire, By Water*, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life.

Kasher in the Rye Jul 14 2021 A hopeful and inspiring "act of comedic magic" from comedian—and now memoirist!—Moshe Kasher (Artie Lange, #1 New York Times bestselling author of *Too Fat to Fish*). Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *Kasher in the Rye* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control—his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Word, Phrase, and Sentence in Relation Jul 26 2022 The contributions contained in this volume offer a multidisciplinary approach into the history of the parts of speech and their role in building phrases and sentences. They fulfill a current interest for syntactic problems for combining recent linguistic theories with the long tradition of the Classical studies. The studies cover a chronological range reaching from Aristotle to Priscian and deal with concepts like ῥῆμα and λόγος, or the two Aristotelian expressions λέξις εἰρομένη and λέξις κατεστραμμένη as well as διάβασις and μετάβασις

in Apollonius Dyscolos and the corresponding Latin term transitio and finally the Latin pronouns qui or quis. Through the metalinguistic approach the authors tackle syntactic structures like dependency or government, syntactic features or properties such as transitivity or subject and predicate or the development of the syntactic role of pronouns in introducing relative sentences. Furthermore, in providing testimonies of the historical existence of the controversy anomaly-analogy, the history of this quarrel is drawn from the Alexandrinian tradition to the Latin one with emphasis on the studium grammaticae as a development of an independent field of study.

The Nepticulidae of Eastern Europe and Asia Oct 17 2021 This fine book treats the Nepticulidae of the former Soviet Union. It provides an illustrated key to all the known species found in this vast

region. Included are original descriptions and line drawings of the adult insects and genitalia of over 200 species. For each species there is a short description of morphology, taxonomy, and distribution, incl. the names of the known foodplants on which the larvae of these leaf-mining moths. A number of these leaf-mines are also illustrated. This book will remain an important identification guide for decades to come. 840 line drawings of adult moths and genitalia.

Bad Love Strikes Dec 27 2019 In October 1939, Albert Einstein warns President Franklin D. Roosevelt that Nazi Germany is actively pursuing an atomic bomb and urges him to make sure that the United States develops the bomb first. Roosevelt heeds the warning and launches the “Manhattan Project” in June 1942.

Beyond Terman Mar 30 2020 Lewis Terman heralded the field of gifted education in the United States by tracing the development of high-IQ children from their childhood in the 1920s to midlife and beyond. The contemporary field of gifted education, building on the work of Terman and others, presumes that gifted children become exceptional adults. Longitudinal research offers the opportunity for critical examination of the way gifted children and adolescents are identified and illuminates the characteristics and experiences that affect sustained achievement. Only long-term studies can directly address whether or not gifted education is finding the right people and doing the right things. The studies demonstrate the fit between longitudinal methodology and the central issues of gifted education. Collectively, they investigate the early determinants of later academic and career achievement and creativity while employing varied identification practices, perspectives, theoretical orientations, and populations.

Medieval Woman's Song Apr 30 2020 The number of surviving medieval secular poems attributed to named female authors is small, some of the best known being those of the troubairitz the female troubadours of southern France. However, there is a large body of poetry that constructs a particular textual femininity through the use of the female voice. Some of these poems are by men and a few by women (including the troubairitz); many are anonymous, and often the gender of the poet is unresolvable. A "woman's song" in this sense can be defined as a female-voice poem on the subject of love, typically characterized by simple language, sexual candor, and apparent artlessness. The chapters in Medieval Woman's Song bring together scholars in a range of disciplines to examine how both men and women contributed to this art form. Without eschewing consideration of authorship, the collection deliberately overturns the long-standing scholarly practice of treating as separate and distinct entities female-voice lyrics composed by men and those composed by women. What is at stake here is less the voice of women themselves than its cultural and generic construction.

Francisco Suárez: Metaphysics, Politics And Ethics Mar 10 2021 O presente volume publica as Atas do Iº Encontro Internacional "Pensar o Barroco em Portugal" (26-28 de Junho de 2017), que se ocupou do pensamento metafísico, ético e político de Francisco Suárez. Contando com a colaboração de alguns dos maiores especialistas internacionais na obra e no pensamento deste famoso professor da Universidade de Coimbra no século XVII, este volume celebra os 400 anos da sua morte e

assinala a produtividade do seu legado filosófico-teológico.

Radio Frequency and Microwave Electronics Illustrated Aug 03 2020 Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications

include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

Waiting for Elijah Aug 23 2019 *Waiting for Elijah* is an intimate portrait of time-reckoning, syncretism, and proximity in one of the world's most polarized landscapes, the Bosnian Field of Gacko. Centered on the shared harvest feast of Elijah's Day, the once eagerly awaited pinnacle of the annual cycle, the book shows how the fractured postwar landscape beckoned the return of communal life that entails such waiting. This seemingly paradoxical situation—waiting to wait—becomes a starting point for a broader discussion on the complexity of time set between cosmology, nationalism, and embodied memories of proximity.
